

Q1 2023 Summary

Fund performance was negative in Q1 2023 as a sharp change in the interest rate environment late in the quarter proved difficult for many of the Fund’s managers.

Drivers of performance included:

- ▶ Losses in several sectors, most prominently in bonds but also in metals and major currencies;
- ▶ Diversified Trendfollowing (“Trendfollowing”) was the main driver of negative performance for the Fund as each of the other trading styles were slightly positive; and
- ▶ Gains in emerging market currencies

Performance as at 31 March 2023

	Inception Date	Cumulative Return As at 31 March 2023		Annualized Return As at 31 March 2023		
		QTD	YTD	1yr	5yr	ITD
Class I (ABYIX)	01 July 2014	-3.24%	-3.24%	3.88%	5.99%	5.01%
Class A (ABYAX) (pro forma 1 Jul 2014 - 29 Aug 2014)*	29 August 2014	-3.28%	-3.28%	3.66%	5.75%	4.75%
Class A (with max. Load, ABYAX) (pro forma 1 Jul 2014 - 29 Aug 2014)*	29 August 2014	-8.87%	-8.87%	-2.30%	4.50%	4.04%
Class C (ABYCX) (pro forma 1 Jul 2014 - 6 Oct 2015)*	06 October 2015	-3.49%	-3.49%	2.90%	4.95%	3.97%

**Source: Abbey Capital based on administrator data. Class A Shares returns prior to 29 August 2014 are pro forma (i.e. returns of Class I Shares adjusted for fees and expenses of Class A Shares). Returns for Class A Shares with Load reflect a deduction for the maximum front-end sales charge of 5.75%. Class C Shares returns prior to 06 October 2015 are pro forma (i.e. returns of Class I Shares, adjusted for Class C Shares expenses). The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current returns may be lower or higher than the past performance data quoted. Visit www.abbeycapital.com for returns updated daily. Call (US Toll Free) 1-844-261-6484 or (international callers) +1-414-203-9540 for returns current to the most recent month-end. Returns would have been lower without fee waivers in effect. Annual Fund Operating Expenses after fee waiver are as of the most recent prospectus and are applicable to investors. The Fund’s net expenses are 1.79% for Class I Shares, 2.04% for Class A Shares and 2.79% for Class C Shares, net of the Fee Waiver (described below). The gross expenses are 1.85% for Class I Shares, 2.10% for Class A Shares and 2.85% for Class C Shares. Abbey Capital has contractually agreed to waive its advisory fee and/or reimburse expenses to limit Total Annual Fund Operating Expenses (excluding Excluded Items below) to 1.79%, 2.04% and 2.79% for Class I Shares, Class A Shares and Class C Shares, respectively (the “Fee Waiver”). This contractual limitation is in effect until December 31, 2023. The following are not included in the Fee Waiver: acquired fund fees and expenses, brokerage commissions, extraordinary items, interest or taxes (“Excluded Items”).*

Morningstar Overall Rating based on risk adjusted returns among 22 US Multistrategy funds. Derived from a weighted average of the Fund’s 3-year and 5-year risk-adjusted return measures. The overall rating applies to the I Share Class of the Fund as of 31 March 2023. Ratings may differ per share class.

Performance Analysis

- ▶ Monetary policy uncertainty drove markets for much of the quarter. Weaker inflation data in January saw bonds and equities rally, before yields recovered in February following strong jobs data and hawkish comments from the Federal Reserve.
- ▶ Concerns for the global banking sector in March then caused a sharp move lower in yields and interest rate expectations as doubts on the Federal Reserve maintaining a hawkish monetary policy stance intensified. These moves were most pronounced at the short-end of the curve, with the 2-year US Treasury experiencing its largest one-day yield change since the 1980s. Silicon Valley Bank and Signature Bank both collapsed during the month, while Credit Suisse was forced into an acquisition by UBS after contagion concerns emerged.
- ▶ Short bond positions were the main driver of negative Fund performance. Losses were concentrated in Canadian, eurozone and Australian contracts. Losses for the Trendfollowing and Value trading styles were partially offset by gains for the Short-term Systematic trading style.
- ▶ Losses in metals stemmed from mixed positioning in silver and aluminium, while losses in major currencies were incurred from mostly long Euro positioning relative to the US Dollar when the greenback appreciated during February.
- ▶ Gains were recorded in emerging market currencies as long positions in the Mexican Peso relative to the US Dollar recorded gains.
- ▶ Short natural gas was the best performing contract at the Fund level. Prices fell continually over the period on mild weather and an improved inventory outlook.

Positioning

- ▶ The Fund significantly and swiftly reduced its bond positions in mid-March as yields fell sharply on banking sector concerns. Longs in equities initially increased over the first half of the quarter before reducing in March.
- ▶ The Fund finished the quarter short in energy and long in metals and agricultural commodities.
- ▶ The most prominent currency positions at the end of the period included longs in the Euro and the US Dollar, and shorts in the Canadian Dollar, Australian Dollar and the Japanese Yen.

► Please read the Prospectus carefully before investing. Investors should carefully consider the Fund's investment objectives, risks, charges and expenses before investing in the Fund. This and other information is in the Prospectus. A copy of the Prospectus and summary prospectus, and other information about the Fund, may be obtained by contacting businessdevelopment@abbeycapital.com or by calling (646) 453 7850. Managers referenced in this report are referenced as "Trading Advisers" in the Fund's Prospectus and SAI.

RISK CONSIDERATIONS:

► An investment in the Abbey Capital Futures Strategy Fund is speculative and involves substantial risk and conflicts of interest. It is possible that an investor may lose some or all of their investment.

► All investments in securities involve risk of the loss of capital. An investment in the Fund includes the risks inherent in an investment in securities, as well as specific risks associated with this open-ended investment product. Among the risks associated with investing in this Fund are Commodity Sector Risk, Counter-Party Risk, Credit Risk, Currency Risk, Manager and Management Risks, Advisory Risk, Subsidiary Risks, Tax Risks, Emerging Markets Risk, Leveraging Risks, Foreign Investment Risks, Fixed Income Securities Risks, Short Sale Risk and Portfolio Turnover Risks.

► The Fund may invest in or utilize derivative investments, futures contracts, and hedging strategies. A portfolio of hedge funds may increase the potential for losses or gains. One or more underlying managers, from time to time, may invest a substantial portion of the assets managed in a specific industry sector. As a result, the underlying manager's investment portfolio (as well as the Fund's) may be subject to greater risk and volatility than if investments had been made in the securities of a broader range of issuers. Trading in futures is not suitable for all investors given its speculative nature and the high level of risk involved.

► There can be no assurance that the Fund's or an underlying manager's strategy (hedging or otherwise) will be successful or that it will employ such strategies with respect to all or any portion of its portfolio. The value of the Fund's portfolio investments should be expected to fluctuate.

Investing in managed futures is not suitable for all investors given its speculative nature and the high level of risk involved. The Fund is appropriate only for investors who can bear the risks associated with the product. Investors may lose some or all of their investment.

► This brief statement cannot disclose all of the risks and other factors necessary to evaluate a participation in the Fund.

Investors are urged to take appropriate investment advice and to carefully consider their investment objectives, personal situation, and factors such as net worth, income, age, risk tolerance and liquidity needs before investing in the Fund. Before investing, investors should carefully consider the Fund's investment objectives, risks, conflicts, tax considerations, charges and expenses.

► **Abbey Capital Limited** ("Abbey Capital") is a private company limited by shares incorporated in Ireland (registration number 327102). Abbey Capital is authorised and regulated by the Central Bank of Ireland as an Alternative Investment Fund Manager under Regulation 9 of the European Union (Alternative Investment Fund Managers) Regulations 2013 ("AIFMD"). Abbey Capital is registered as a Commodity Pool Operator and Commodity Trading Advisor with the U.S. Commodity Futures Trading Commission ("CFTC") and is a member of the U.S. National Futures Association. Abbey Capital is also registered as an Investment Adviser with the U.S. Securities Exchange Commission ("SEC"). Abbey Capital (US) LLC is a wholly owned subsidiary of Abbey Capital. None of the regulators listed herein endorse, indemnify or guarantee the member's business practices, selling methods, the class or type of securities offered, or any specific security.

► The CFTC, the SEC, the Central Bank of Ireland or any other regulator have not passed upon the merits of participating in any trading programs or funds promoted by Abbey Capital, nor have they reviewed or passed on the adequacy or accuracy of this report.

► Abbey Capital Futures Strategy Fund is distributed by Quasar Distributors, LLC.

► Third party distributors are appointed, and may be paid by Abbey Capital, to distribute or promote funds managed by Abbey Capital to their clients. A distributor that receives a payment from Abbey Capital may have an incentive to promote one fund to investors over another product.

► VaR Definition:

Value-at-Risk (VaR) expresses market risk as a percentage of a portfolio's value. The VaR figures quoted are as of 31 March 2023, based on a historic VaR calculation with a 5-year lookback period (1300 days). The historical approach to evaluating a portfolio's VaR involves applying the current positions to the historical portfolio prices of the corresponding instruments, and then calculating how the current positioning would have performed historically. For any chosen threshold value, the hypothetical returns then provide an estimate of the current VaR figure.

► %VaR:

%VaR is the contract VaR as a percentage of the sum of the individual contract VaRs within the Fund.

► Basis Point ("BPS") Definition:

A basis point is one hundredth of one percent and refers to a common unit of measure for interest rates and other percentages in finance.

► Correlation Definition:

Correlation is a statistical measure which quantifies the extent to which two assets, or securities, move in relation to each other. The correlation coefficient between two assets can vary from between -1 and +1, with a positive correlation indicating a tendency to rise and fall together, and a negative correlation indicating a tendency to move in opposite directions.

► Currency Key:

USD	United States Dollar	CHF	Swiss Franc
EUR	Euro	CAD	Canadian Dollar
JPY	Japanese Yen	AUD	Australian Dollar
NOK	Norwegian Krone	GBP	British Pound
BRL	Brazilian Real	NZD	New Zealand Dollar
SGD	Singapore Dollar	RUB	Russian Ruble
PLN	Polish Zloty	TRY	Turkish Lira

► Description of trading styles:

Diversified Trendfollowing: A systematic style that managers adopt to take advantage of trends in markets, with positions taken for duration of four weeks and longer.

Global Macro: A global macro approach is based on trading macroeconomic themes over multiple time frames. A Macro manager will trade looking to profit from global economic trends which include interest rates, economic policies, and currency fluctuations.

Value: A systematic trading of interest rate yield curve differentials and changes in term structure over medium term to long term. A Value manager trades based on a view that contracts are not priced correctly in the current market due to expected future trends and potential.

Short-term Systematic: Aims to capture trends and countertrends with durations from intraday to 10 days. A CTA will trade in and out of contracts using closely controlled methods which are designed to take advantage of pricing or arbitrage opportunities.

► **Morningstar Rating:** The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Abbey Capital Futures Strategy Fund (Share Class I) was rated 3 stars over the 3-year period and 4 stars over the 5-year period ending 31 March 2023 among 22 and 20 US Systematic Trend funds, respectively.
