

Q1 2023 Summary

The Fund was negative in Q1 2023 as losses for the Managed Futures strategy outweighed gains for the Long Equity strategy.

Some key drivers of quarterly performance included:

- ▶ Losses for the Managed Futures strategy in several sectors, most prominently in fixed income but also in metals and major currencies; and
- ▶ Gains for the Long Equity strategy as the S&P 500 rose +7.0%

Performance as at 31 March 2023

	Launch date	QTD	YTD	1 YR	5 YR	10 YR	ITD
Class I	11 April 2018	-0.45%	-0.45%	-2.17%	N/A	N/A	11.61%
Class C (MAFCX)*	11 April 2018	-0.73%	-0.73%	-3.20%	N/A	N/A	10.49%
Class C (with load)*	11 April 2018	-1.72%	-1.72%	-4.13%	N/A	N/A	10.49%

The fund commenced operations as a series of The RBB Fund, Inc. on 11 April 2018, when all of the assets of Abbey Global LP transferred to Class I Shares of the Fund. **For clarity, on 28th February 2023, reference to Abbey Global LP performance was removed from the Fund Prospectus.**

*The inception date of the Class C Shares was 8 November 2021. Returns for Class C Shares prior to 8 November 2021 are pro forma (i.e. returns of Class I Shares from 11 April 2018 are adjusted for Class C Shares expenses). Performance results with sales charges reflect the deduction of the applicable contingent deferred sales charge (CDSC). Class C shares are subject to a CDSC of 1.00% if you redeem your shares within twelve (12) months of purchase, based on the lesser of the shares' cost at purchase or current net asset value at time of redemption. Performance presented at NAV does not include the CDSC and would be lower if a charge was reflected. **The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Performance would have been lower without fee waivers in effect. Visit www.abbeycapital.com for returns updated daily. Call (US Toll Free) 1-844-261-6484 or (international callers) +1-414-203-9540 for returns current to the most recent month-end. Abbey Capital has contractually agreed through December 31, 2023 to waive its advisory fee and/or reimburse expenses.**

Morningstar Overall Rating for MAFIX based on risk adjusted returns among 48 US Multistrategy funds. Derived from a weighted average of the Fund's 3-year risk-adjusted return measures. The overall rating applies to the I Share Class of the Fund as of 31 March 2023. Ratings may differ per share class.

Private and Confidential. Past results are not indicative of future results. Investing in managed futures is not suitable for all investors given the level of risk involved, including the risk of loss

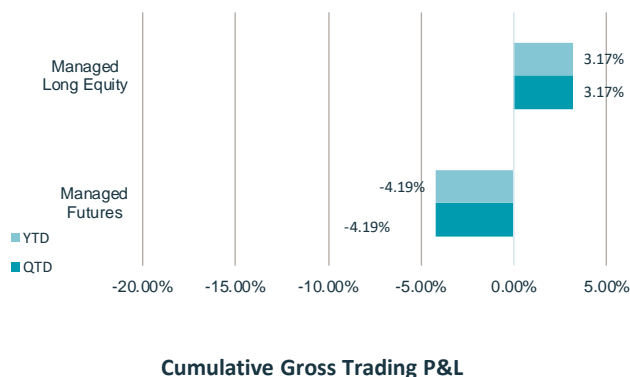

Performance Analysis

- ▶ Monetary policy uncertainty drove markets for much of the quarter. Weaker inflation data in January saw bonds and equities rally, before yields recovered in February following strong jobs data and hawkish comments from the Federal Reserve.
- ▶ Concerns for the global banking sector in March then caused a sharp move lower in yields and interest rate expectations as doubts on the Federal Reserve maintaining a hawkish monetary policy stance intensified. These moves were most pronounced at the short-end of the curve, with the 2-year US Treasury experiencing its largest one-day yield change since the 1980s. Silicon Valley Bank and Signature Bank both collapsed during the month, while Credit Suisse was forced into an acquisition by UBS after contagion concerns emerged.
- ▶ Short fixed income positions were the main driver of negative performance for the Managed Futures strategy. Losses were concentrated in eurozone and US contracts.
- ▶ Losses in metals stemmed from mixed positioning in silver and long positions in gold. Losses in major currencies were incurred from mostly long US Dollar positioning relative to the Japanese Yen and long positions in the Canadian Dollar against the Australian Dollar.
- ▶ Gains were recorded in emerging market currencies as long positions in the Mexican Peso relative to the US Dollar recorded gains.
- ▶ Short natural gas was the best performing contract for the Managed Futures strategy. Prices fell continually over the period on mild weather and an improved inventory outlook.
- ▶ Overall performance in equities was positive. The Long Equity strategy recorded gains from its long allocation to S&P 500 futures, while the Managed Futures strategy was positive due to long positions held throughout the quarter in eurozone indices.

Positioning

- ▶ The Managed Futures strategy significantly and swiftly reduced its bond positions in mid-March as yields fell sharply on banking sector concerns. Longs in equities in the Managed Futures strategy initially increased over the first half of the quarter before reducing in March.
- ▶ The Fund finished the quarter short in energy and agricultural commodities and long in metals. The most prominent currency positions at the end of the period included longs in the Euro and the Swiss Franc, and shorts in the Canadian Dollar, US Dollar and the Australian Dollar.
- ▶ Positioning for the Long Equity strategy was maintained close to its 50% target during the quarter.

Please read the Prospectus carefully before investing. Investors should carefully consider the Fund's investment objectives, risks, charges and expenses before investing in the Fund. This and other information is in the Prospectus. A copy of the Prospectus and summary prospectus, and other information about the Fund, may be obtained by contacting businessdevelopment@abbeycapital.com or by calling (646) 453 7850. Managers referenced in this report are referenced as "Trading Advisers" in the Fund's Prospectus and SAI.

RISK CONSIDERATIONS:

▶ All mutual fund investing involves risk including the possible loss of principal value. Investing in a managed futures fund entails special risks and may not be suitable for all investors given its speculative nature and the high level of risk involved. The Fund is appropriate only for investors who can understand and bear the risks associated with the product. **You may lose part or all of your investment in the Fund.**

▶ Except for fund returns, the portfolio statistics shown in this fact sheet are based only on the open forward, future and option contracts held by the wholly-owned and controlled subsidiaries of the Fund and does not take into account any other assets held by the Fund (primarily cash and cash-equivalents). The Fund may invest approximately 25% of its total assets in the ACMAF Master Offshore Limited, which invests substantially all its assets in ACMAF Offshore SPC. Individual managers are appointed to separate segregated portfolios of ACMAF Offshore SPC and are permitted to trade certain financial, managed futures and foreign exchange contracts.

▶ Futures and forward contracts may involve substantial risk, such as losses caused by unanticipated market movements, which are potentially unlimited; possible lack of a liquid secondary market; the inability to close a contract when desired; and the possibility of counterparty default.

▶ Short sales theoretically involve unlimited loss potential since the market price of securities or contracts sold short may continuously increase. The use of certain derivatives may also have a leveraging effect which may increase the volatility of the Fund and may increase the risk of loss.

▶ Exposure to commodities markets and commodity-linked derivatives may subject the Fund to greater volatility affected by industry-related factors, value, supply and demand, governmental policies, weather, economic and political factors.

▶ Investments in foreign and emerging markets are subject to risks from currency fluctuation, political instability, social and economic risks. In particular, emerging and frontier markets may be more volatile and less liquid than more developed markets and therefore may involve greater risks.

▶ The Fixed Income strategy invests the Fund's assets primarily in investment grade fixed income securities (of all durations and maturities) in order to generate interest income and capital appreciation. Fixed income securities that the fund may invest are

subject to credit risk, prepayment risk and interest rate risk so that as interest rates rise the value of bond prices will decline. These risks are usually greater for longer-term debt securities.

▶ The Fund is non-diversified which means it may be invested in a limited number of issuers and susceptible to any economic, political and regulatory events than a more diversified fund.

▶ **This brief statement cannot disclose all of the risks and other factors necessary to evaluate a participation in the Fund.** Investors are urged to take appropriate investment advice and to carefully consider their investment objectives, personal situation, and factors such as net worth, income, age, risk tolerance and liquidity needs before investing in the Fund. Before investing, investors should carefully consider the Fund's investment objectives, risks, conflicts, tax considerations, charges and expenses.

▶ **Abbey Capital Limited** ("Abbey Capital") is a private company limited by shares incorporated in Ireland (registration number 327102). Abbey Capital is authorised and regulated by the Central Bank of Ireland as an Alternative Investment Fund Manager under Regulation 9 of the European Union (Alternative Investment Fund Managers) Regulations 2013 ("AIFMD"). Abbey Capital is registered as a Commodity Pool Operator and Commodity Trading Advisor with the U.S. Commodity Futures Trading Commission ("CFTC") and is a member of the U.S. National Futures Association. Abbey Capital is also registered as an Investment Advisor with the U.S. Securities Exchange Commission ("SEC"). Abbey Capital (US) LLC is a wholly owned subsidiary of Abbey Capital. None of the regulators listed herein endorse, indemnify or guarantee the member's business practices, selling methods, the class or type of securities offered, or any specific security.

▶ The CFTC, the SEC, the Central Bank of Ireland or any other regulator have not passed upon the merits of participating in any trading programs or funds promoted by Abbey Capital, nor have they reviewed or passed on the adequacy or accuracy of this report.

▶ Third party distributors are appointed, and may be paid by Abbey Capital, to distribute or promote funds managed by Abbey Capital to their clients. A distributor that receives a payment from Abbey Capital may have an incentive to promote one fund to investors over another product.

▶ Currency Key:

USD	United States Dollar	CHF	Swiss Franc
EUR	Euro	CAD	Canadian Dollar
JPY	Japanese Yen	AUD	Australian Dollar
NOK	Norwegian Krone	GBP	British Pound
BRL	Brazilian Real	NZD	New Zealand Dollar
ILS	Israeli Shekel	MXN	Mexican Dollar

▶ VaR Definition:

Value-at-Risk (VaR) expresses market risk as a percentage of a portfolio's value. The VaR figures quoted are as of 31 December 2022, based on a historic VaR calculation with a 5-year lookback period (1300 days). The historical approach to evaluating a portfolio's VaR involves applying the current positions to the historical portfolio prices of the corresponding instruments, and then calculating how the current positioning would have performed historically. For any chosen threshold value, the hypothetical returns then provide an estimate of the current VaR figure.

▶ %VaR:

%VaR is the contract VaR as a percentage of the sum of the individual contract VaRs within the Fund.

▶ Basis Point ("BPS") Definition:

A basis point is one hundredth of one percent and refers to a common unit of measure for interest rates and other percentages in finance.

▶ Description of investment strategies:

Managed Futures: Bi-directional managed futures exposure at a targeted level of approximately 100% of the Fund's net assets achieved through allocations to five underlying managers.

Long U.S. Equity ("Managed Long Equity" or "Long Equity"): A long exposure to S&P 500 executed through a rolling long position in S&P 500 futures.

▶ Explanation of indices:

S&P 500 Total Return Index: This index is the total return version of the S&P 500 Index. Dividends are reinvested on a daily basis and all regular cash dividends are assumed reinvested in the index on the ex-date.

SG Trend Index: This index is designed to track the 10 largest trend following Commodity Trading Advisors by assets under management and be representative of the trend followers in the managed futures space. The index is equally weighted and rebalanced annually. It is not possible to invest directly in an index.

► **Morningstar**

The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Abbey Capital Multi Asset Fund (Share Class I) received a 5-star Rating applying for the 3 year period ending March 31, 2023 in the Multistrategy Category out of 48 funds; based on risk adjusted returns. Past performance is no guarantee of future results. Morningstar Rating is for Class I Shares only; other classes may have different performance characteristics.
