

ABBEY CAPITAL FUTURES STRATEGY FUND
OF
THE RBB FUND, INC.
CLASS I SHARES (TICKER: ABYIX)
CLASS A SHARES (TICKER: ABYAX)
CLASS C SHARES (TICKER: ABYCX)
CLASS T SHARES (NOT CURRENTLY AVAILABLE FOR SALE)
SUMMARY PROSPECTUS
DECEMBER 31, 2024

Before you invest, you may want to review the Fund's Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus, Statement of Additional Information ("SAI"), reports to shareholders, and other information about the Fund online at <https://www.abbeycapital.com/abbey-capital-futures-strategy-fund/>. You may also obtain this information at no cost by calling 1-844-261-6484 (toll free). The Fund's Prospectus and SAI, both dated December 31, 2024, are incorporated by reference into this Summary Prospectus.

INVESTMENT OBJECTIVE

The investment objective of the Abbey Capital Futures Strategy Fund (the “Fund”) is to seek long-term capital appreciation. Current income is a secondary objective.

EXPENSES AND FEES

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (the “Shares”). You may qualify for sales charge discounts if you invest, or agree to invest in the future, at least \$25,000 in Class A Shares or at least \$250,000 in Class T Shares of the Fund. More information about these and other discounts is available from your financial professional, in the section of this Prospectus entitled “Shareholder Information – Sales Charges” and in the section of the Fund’s Statement of Additional Information (“SAI”) entitled “Purchase and Redemption Information – Reducing or Eliminating the Front-End Sales Charge.” **Financial intermediaries may impose different sales charge waivers for Class A Shares and Class T Shares, and these variations are described in Appendix A of this Prospectus.** Additionally, you may be required to pay commissions and/or other forms of compensation to a broker for transactions in Class I Shares of the Fund, which are not reflected in the tables or the examples below.

	<u>CLASS I</u>	<u>CLASS A</u>	<u>CLASS C</u>	<u>CLASS T</u>
Shareholder Fees (fees paid directly from your investment)				
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	5.75%	None	2.50%
Maximum Deferred Sales Charge (Load)	None	None ⁽¹⁾	1.00% ⁽²⁾	None
Maximum Sales Charge (Load) Imposed on Reinvested Dividends	None	None	None	None
Redemption Fee (as a percentage of amount redeemed, if applicable)	None	None	None	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)				
Management Fees ⁽³⁾	1.77%	1.77%	1.77%	1.77%
Distribution and/or Service (12b-1) Fees	None	0.25%	1.00%	0.25%
Other Expenses	0.08%	0.08%	0.08%	0.08% ⁽⁴⁾
Total Annual Fund Operating Expenses	1.85%	2.10%	2.85%	2.10%
Fee Waivers and/or Expense Reimbursements ⁽⁵⁾	-0.06%	-0.06%	-0.06%	-0.06%
Total Annual Fund Operating Expenses after Fee Waivers and/or Expense Reimbursements	1.79%	2.04%	2.79%	2.04%

(1) A contingent deferred sales charge (“CDSC”) of 1.00% is assessed on certain redemptions of Class A Shares made within 12 months after purchase where no initial sales charge was paid at time of purchase as part of an investment of \$1,000,000 or more.

(2) The CDSC applies to redemptions of Class C Shares made within 12 months of purchase and will be assessed on an amount equal to the lesser of the offering price at the time of purchase of the shares redeemed and the net asset value of the shares redeemed at the time of redemption.

(3) Management Fees include advisory fees paid to both Abbey Capital Limited (the “Adviser”) and one or more trading advisers (the “Trading Advisers”). There are no performance fees charged by the Adviser or Trading Advisers either at the Fund or at the Fund’s wholly-owned Subsidiaries.

(4) “Other Expenses” for Class T Shares, which had not commenced operations as of the date of this Prospectus, are estimated for the current fiscal year.

(5) The Adviser has contractually agreed to waive its advisory fee and/or reimburse expenses in order to limit Total Annual Fund Operating Expenses (excluding certain items discussed below) to 1.79%, 2.04%, 2.79% and 2.04% of the Fund’s average daily net assets attributable to Class I Shares, Class A Shares, Class C Shares and Class T Shares, respectively. In determining the Adviser’s obligation to waive advisory fees and/or reimburse expenses,

the following expenses are not taken into account and could cause net Total Annual Fund Operating Expenses to exceed 1.79%, 2.04%, 2.79% or 2.04%, as applicable: acquired fund fees and expenses, brokerage commissions, extraordinary items, interest or taxes. This contractual limitation is in effect until December 31, 2025 for Class I Shares, Class A Shares, Class C Shares and Class T Shares, and may not be terminated prior to that date without the approval of the Board of Directors of The RBB Fund, Inc. (the "Company"). If at any time the Fund's Total Annual Fund Operating Expenses (not including acquired fund fees and expenses, brokerage commissions, extraordinary items, interest or taxes) for a year are less than 1.79%, 2.04%, 2.79% and 2.04%, as applicable, the Adviser may recoup any waived or reimbursed amounts from the Fund within three years from the date on which such waiver or reimbursement was made by the Adviser, provided such reimbursement does not cause the Fund to exceed expense limitations that were in effect at the time of the waiver or reimbursement.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in Class A, Class C or Class T Shares, or \$1,000,000 in Class I Shares, in the Fund for the time periods indicated and then hold or redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same (taking into account the contractual expense limitation until its expiration). Although your actual costs may be higher or lower, based on these assumptions your costs of investing in the Fund would be:

	1 YEAR	3 YEARS	5 YEARS	10 YEARS
Class I Shares	\$18,187	\$57,587	\$99,509	\$216,427
Class A Shares	\$770	\$1,190	\$1,634	\$2,862
Class C Shares	\$382	\$877	\$1,498	\$3,172
Class T Shares	\$452	\$886	\$1,345	\$2,616

You would pay the following expenses on Class C Shares if you did not redeem your shares at the end of the period:

	1 YEAR	3 YEARS	5 YEARS	10 YEARS
Class C Shares	\$282	\$877	\$1,498	\$3,172

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year ended August 31, 2024, the Fund's portfolio turnover rate was 0% of the average value of its portfolio. In accordance with industry practice, derivative instruments and instruments with a maturity of one year or less at the time of acquisition are excluded from the calculation of the portfolio turnover rate, which leads to the 0% portfolio turnover rate reported above. If those instruments were included in the calculation, the Fund would have a high portfolio turnover rate.

PRINCIPAL INVESTMENT STRATEGIES

The Fund seeks to achieve its investment objective by allocating its assets between a "Managed Futures" strategy and a "Fixed Income" strategy.

The Managed Futures strategy will be achieved by the Fund investing a portion of its assets in Abbey Capital Onshore Series LLC, a wholly-owned and controlled Delaware series limited liability company (the "Onshore Subsidiary") and up to 25% of its total assets in Abbey Capital Master Offshore Fund Limited, a wholly-owned and controlled subsidiary of the Fund organized under the acts of the Cayman Islands (the "Cayman Subsidiary"). The Cayman Subsidiary will in turn invest all or substantially all of its assets in segregated portfolios of Abbey Capital Offshore Fund SPC (the "SPC" and, together with the Onshore Subsidiary and the Cayman Subsidiary, the "Subsidiaries"), a wholly-owned and controlled segregated portfolio company incorporated under the acts of the Cayman Islands. The Cayman Subsidiary will serve solely as an intermediate entity through which the Fund will invest in the SPC. The Cayman

Subsidiary makes no independent investment decisions and has no investment or other discretion over the Fund's investable assets. The Adviser may allocate assets of the SPC and the Onshore Subsidiary to multiple Managed Futures portfolios (the "Segregated Portfolios") that include investment styles or sub-strategies such as (i) trend following, (ii) discretionary, fundamentals-based investing with a focus on macroeconomic analysis, (iii) strategies that pursue both fundamental and technical trading approaches, (iv) other specialized approaches to specific or individual market sectors such as equities, interest rates, metals, agricultural and soft commodities, and (v) systematic trading strategies which incorporate technical and fundamental variables.

The Managed Futures strategy investments are designed to achieve capital appreciation in the financial and commodities futures markets. The Adviser intends to allocate the assets of the SPC and the Onshore Subsidiary to one or more Trading Advisers to manage in percentages determined at the discretion of the Adviser. Each Trading Adviser will manage one or more of its own Segregated Portfolios. Each Trading Adviser invests according to a Managed Futures strategy in one or a combination of (i) options, (ii) futures, (iii) forwards, (iv) spot contracts, or (v) swaps, including total return swaps, each of which may be tied to (i) commodities, (ii) financial indices and instruments, (iii) foreign currencies, or (iv) equity indices. **All commodities futures and commodities-related investments will be made in the Segregated Portfolios of the SPC.** Each current Trading Adviser is registered with the CFTC as a Commodity Trading Advisor ("CTA"). Trading Advisers that are not registered with the SEC as investment advisers provide advice only regarding matters that do not involve securities.

The Fixed Income strategy invests the Fund's assets primarily in investment grade fixed income securities (of all durations and maturities) in order to generate interest income and capital appreciation, which may add diversification to the returns generated by the Fund's Managed Futures strategy.

The Fund's Adviser seeks returns, in part, by (i) using Managed Futures strategy investments that are not expected to have returns that are highly correlated to the broad equity market, and (ii) through actively managed Fixed Income strategy investments that are not expected to have returns that are highly correlated to the broad equity market or the Managed Futures strategy. The Adviser believes that utilizing non-correlated strategies may mitigate losses in generally declining markets. However, there can be no assurance that losses will be avoided. Investment strategies that have historically been non-correlated or demonstrated low correlations to one another or to major world financial market indices may become correlated at certain times, such as during a liquidity crisis in global financial markets.

The trading strategies employ several different trading styles using different research and trading methodologies, in a wide range of global financial and commodity markets operating over multiple time frames. Many of the styles use systematic, automated trading systems, using a combination of mathematical, statistical, technical analysis, pattern recognition and macroeconomic models aimed at profiting from market trends of different durations. Trading Advisers may use discretionary approaches aimed at identifying value investments and turning points in trends. All Trading Advisers utilize a disciplined approach to risk management. The Adviser and Trading Advisers from time to time will employ hedging techniques. Key principles of the Fund's sell discipline include predetermined relative-value objectives for sectors, issuers and specific securities, pricing performance or fundamental performance that varies from expectations, deteriorating fundamentals, overvaluation and alternative investments offering the opportunity to achieve more favorable risk-adjusted returns.

The markets traded include bonds, money markets, foreign exchange markets and commodity markets. Most of the trading is done in derivative markets, usually listed futures markets, but some trading in cash markets may take place when this is the most effective way to enter or exit a trading position. Both long and short positions will be taken in all markets traded. Contracts are positioned either long or short based on various characteristics related to their prices. For example, the Fund may short a particular underlying security or instrument if the Adviser or a Trading Adviser believes the price of the underlying security or instrument will decrease. The Fund invests in U.S. and non-U.S. markets and in developed and emerging markets.

As much of the trading within the Fund is in futures markets, the Fund is likely to have cash balances surplus to margin requirements. The cash portfolio will be invested on a short-term, highly liquid, basis, to meet margin calls on the futures positions.

The Fund is “non-diversified” for purposes of the Investment Company Act of 1940, as amended, (the “1940 Act”) which means that the Fund may invest in fewer securities at any one time than a diversified fund. The Fund may not invest more than 15% of its net assets in illiquid investments. The Fund’s investments in certain derivative instruments and its short selling activities involve the use of leverage.

Generally, the SPC invests primarily in commodity futures but it may also invest in financial futures, options, forwards, spot contracts and swap contracts, fixed income securities, pooled investment vehicles, including those that are not registered pursuant to the 1940 Act and other investments intended to serve as margin or collateral for the SPC’s derivative positions. The Onshore Subsidiary only invests in financial futures, options, forwards, spot contracts and swap contracts, fixed income securities, pooled investment vehicles, including those that are not registered pursuant to the 1940 Act, and other investments intended to serve as margin or collateral for derivative positions. The Fund invests in the SPC in order to gain exposure to the commodities markets within the limitations of the federal tax laws, rules and regulations that apply to regulated investment companies. Unlike the Fund and Onshore Subsidiary, the SPC may invest without limitation in commodity-linked derivatives. The Fund complies with Section 8 and Section 18 of the 1940 Act, governing investment policies and capital structure and leverage, respectively, on an aggregate basis with the Subsidiaries. The Subsidiaries also comply with Section 17 of the 1940 Act relating to affiliated transactions and custody.

In addition, to the extent applicable to the investment activities of the Subsidiaries, the Subsidiaries are subject to the same fundamental investment restrictions and will follow the same compliance policies and procedures as the Fund. Unlike the Fund, none of the Subsidiaries will seek to qualify as a regulated investment company (“RIC”) under Subchapter M of Subtitle A, Chapter 1, of the Internal Revenue Code of 1986, as amended (the “Code”). The Fund is, directly or indirectly, the sole shareholder of each Subsidiary and does not expect shares of the Subsidiaries to be offered or sold to other investors.

PRINCIPAL INVESTMENT RISKS

Risk is inherent in all investing. The value of your investment in the Fund, as well as the amount of return you receive on your investment, may fluctuate significantly from day to day and over time. **You may lose part or all of your investment in the Fund** or your investment may not perform as well as other similar investments. The Fund’s principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. Different risks may be more significant at different times depending on market conditions or other factors.

The principal risk factors affecting shareholders’ investments in the Fund (and, indirectly, in the Subsidiaries) are set forth below.

- **Commodity Sector Risk:** Exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. The value of commodity-linked derivative instruments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, pandemics, embargoes or other trade barriers, tariffs and international economic, political and regulatory developments. The prices of energy, industrial metals, precious metals, agriculture and livestock sector commodities may fluctuate widely due to factors such as changes in value, supply and demand and governmental regulatory policies. The commodity-linked securities in which the Fund invests may be issued by companies in the financial services sector, and events affecting the financial services sector may cause the Fund’s Share value to fluctuate.

- **Counterparty Risk:** Counterparty risk is the risk that the other party(s) to an agreement or a participant to a transaction, such as a broker or the futures commission merchant, might default on a contract or fail to perform by failing to pay amounts due or failing to fulfill the obligations of the contract or transaction.

- **Credit Risk:** Credit risk refers to the possibility that the issuer of the security will not be able to make principal and interest payments when due. Changes in an issuer’s credit rating or the market’s perception of an issuer’s creditworthiness may also affect the value of the Fund’s investment in that issuer. Securities rated in the four highest categories by the rating agencies are considered investment grade but they may also have some speculative characteristics. Investment grade ratings do not guarantee that bonds will not

lose value or default. In addition, the credit quality of securities may be lowered if an issuer's financial condition changes. The Fund could also be delayed or hindered in its enforcement of rights against an issuer, guarantor, or counterparty.

- **Currency Risk:** Investment in foreign securities also involves currency risk associated with securities that trade or are denominated in currencies other than the U.S. dollar and which may be affected by fluctuations in currency exchange rates. An increase in the strength of the U.S. dollar relative to a foreign currency may cause the U.S. dollar value of an investment in that country to decline. Foreign currencies also are subject to risks caused by inflation, interest rates, budget deficits and low savings rates, political factors and government controls. Forward foreign currency exchange contracts may limit potential gains from a favorable change in value between the U.S. dollar and foreign currencies. Unanticipated changes in currency pricing may result in poorer overall performance for the Fund than if it had not engaged in these contracts.

- **Cyber Security Risk:** Cyber security risk is the risk of an unauthorized breach and access to Fund assets, Fund or customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, the Adviser, custodian, transfer agent, distributor and other service providers and financial intermediaries to suffer data breaches, data corruption or lose operational functionality or prevent Fund investors from purchasing, redeeming or exchanging shares or receiving distributions. The Fund and its Adviser have limited ability to prevent or mitigate cyber security incidents affecting third-party service providers, and such third-party service providers may have limited indemnification obligations to the Fund or the Adviser. Successful cyber-attacks or other cyber-failures or events affecting the Fund or its service providers may adversely impact and cause financial losses to the Fund or its shareholders. Issuers of securities in which the Fund invests are also subject to cyber security risks, and the value of these securities could decline if the issuers experience cyber-attacks or other cyber-failures.

- **Derivatives Risk:** The Fund's investments in derivative instruments including options, forward currency exchange contracts, swaps and futures, which may be leveraged, may result in losses. Investments in derivative instruments may result in losses exceeding the amounts invested. The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments. The use of derivatives is also subject to operational and legal risks. Operational risks generally refer to risks related to potential operational issues, including documentation issues, settlement issues, system failures, inadequate controls and human error. Legal risks generally refer to risks of loss resulting from insufficient documentation, insufficient capacity or authority of a counterparty, or legality or enforceability of a contract.

- **Emerging Markets Risk:** Investment in emerging market securities involves greater risk than that associated with investment in foreign securities of developed foreign countries. These risks include volatile currency exchange rates, periods of high inflation, increased risk of default, greater social, economic and political uncertainty and instability, less governmental supervision and regulation of securities markets, weaker auditing and financial reporting standards, lack of liquidity in the markets, and the significantly smaller market capitalizations of emerging market issuers. The information available about an emerging market issuer may be less reliable than for comparable issuers in more developed capital markets. In addition, investments in certain emerging markets are subject to an elevated risk of loss resulting from market manipulation and the imposition of exchange controls (including repatriation restrictions). The legal rights and remedies available for investors in emerging markets may be more limited than the rights and remedies available in the U.S., and the ability of U.S. authorities (*e.g.*, SEC and the U.S. Department of Justice) to bring actions against bad actors in emerging markets may be limited.

- **Fixed Income Securities Risk:** Fixed income securities in which the Fund may invest are subject to certain risks, including: interest rate risk, prepayment risk and credit/default risk. Interest rate risk involves the risk that prices of fixed income securities will rise and fall in response to interest rate changes. Prepayment risk involves the risk that in declining interest rate environments prepayments of principal could increase and require the Fund to reinvest proceeds of the prepayments at lower interest rates. Credit risk involves the risk that the credit rating of a security may be lowered.

- **Foreign Investments Risk:** International investing may be subject to special risks, including currency exchange rate volatility, political, social or economic instability, less publicly available information, less stringent investor protections, and differences in taxation, auditing and other financial practices. The Fund may invest in securities of foreign issuers either directly or through depositary receipts. Depositary receipts

may be available through “sponsored” or “unsponsored” facilities. Holders of unsponsored depository receipts generally bear all of the costs of the unsponsored facility. The depository of an unsponsored facility is frequently under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through, to the holders of the receipts, voting rights with respect to the deposited securities. The depository of unsponsored depository receipts may provide less information to receipt holders. Foreign securities in which the Fund invests may be traded in markets that close before the time that the Fund calculates its net asset value (“NAV”). Furthermore, certain foreign securities in which the Fund invests may be listed on foreign exchanges that trade on weekends or other days when the Fund does not calculate its NAV. As a result, the value of the Fund’s holdings may change on days when shareholders are not able to purchase or redeem the Fund’s shares.

- **Forward and Futures Risk:** The successful use of forward and futures contracts draws upon the Adviser’s and Trading Advisers’ skill and experience with respect to such instruments and are subject to special risk considerations. The primary risks associated with the use of futures contracts are (a) the imperfect correlation between the change in market value of instruments held by the Fund and the price of the forward or futures contract; (b) possible lack of a liquid secondary market, and possible regulatory position limits and restrictions, for a forward or futures contract and the resulting inability to close a forward or futures contract when desired; (c) losses caused by unanticipated market movements, which are potentially unlimited; (d) the Advisers and Trading Advisers’ inability to predict correctly the direction of securities prices, interest rates, currency exchange rates and other economic factors; (e) the possibility that the counterparty will default in the performance of its obligations; and (f) if the Fund has insufficient cash, it may have to sell securities from its portfolio to meet daily variation margin requirements, and the Fund may have to sell securities at a time when it may be disadvantageous to do so.

- **Government Intervention and Regulatory Changes:** The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”) (which was passed into law in July 2010) significantly revised and expanded the rulemaking, supervisory and enforcement authority of federal bank, securities and commodities regulators. There can be no assurance that future regulatory actions including, but not limited to, those authorized by the Dodd-Frank Act will not adversely impact the Fund. Major changes resulting from legislative or regulatory actions could materially affect the profitability of the Fund or the value of investments made by the Fund or force the Fund to revise its investment strategy or divest certain of its investments. Any of these developments could expose the Fund to additional costs, taxes, liabilities, enforcement actions and reputational risk.

In addition, Rule 18f-4 under the 1940 Act provides for the regulation of a registered investment company’s use of derivatives and certain related investments. Rule 18f-4 imposes limits on the amount of derivatives a fund can enter into, treats derivatives as senior securities so that a failure to comply with the limits would result in a statutory violation, and requires the Fund to establish and maintain a comprehensive derivatives risk management program and appoint a derivatives risk manager. The Fund has adopted procedures for investing in derivatives and other transactions in compliance with Rule 18f-4.

- **Hedging Transactions Risk:** The Adviser and Trading Advisers from time to time employ various hedging techniques. The success of the Fund’s hedging strategy will be subject to the Adviser’s and Trading Advisers’ ability to correctly assess the degree of correlation between the performance of the instruments used in the hedging strategy and the performance of the investments in the portfolio being hedged. Since the characteristics of many securities change as markets change or time passes, the success of the Fund’s hedging strategy will also be subject to the Adviser’s and Trading Advisers’ ability to continually recalculate, readjust, and execute hedges in an efficient and timely manner. For a variety of reasons, the Adviser and Trading Advisers may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Such imperfect correlation may prevent the Fund from achieving the intended hedge or expose the Fund to risk of loss. In addition, it is not possible to hedge fully or perfectly against any risk, and hedging entails its own cost.

- **High Portfolio Turnover Risk:** The risk that when investing on a shorter-term basis, the Fund may as a result trade more frequently and incur higher levels of brokerage fees and commissions, and cause higher levels of current tax liability to shareholders in the Fund.

- **Interest Rate Risk:** Interest rate risk is the risk that prices of fixed income securities generally increase when interest rates decline and decrease when interest rates increase. The Fund may lose money if short term or long term interest rates rise sharply or otherwise change in a manner not anticipated by the Adviser and Trading Advisers. Changing interest rates may have unpredictable effects on the markets and the

Fund's investments and may also affect the liquidity of fixed income securities and instruments held by the Fund. Declines in interest rate levels could cause the Fund's earnings to fall below the Fund's expense ratio, resulting in a negative yield, and a decline in the Fund's share price. A general rise in interest rates may cause investors to move out of fixed income securities on a large scale, which could adversely affect the price and liquidity of fixed income securities and could also result in increased redemptions for the Fund. Fluctuations in interest rates may also affect the liquidity of fixed income securities and instruments held by the Fund. Certain countries and regulatory bodies may use negative interest rates as a monetary policy tool to encourage economic growth during periods of deflation. In a negative interest rate environment, debt instruments may trade at negative yields, which means the purchaser of the instrument may receive at maturity less than the total amount invested. Interest rates in the United States and many other countries have risen in recent periods and may continue to remain elevated for the foreseeable future. In the case of the United States, longer-term inflationary pressure may result from the U.S. government's fiscal policies and the Fund may experience higher interest rates over its investment horizon.

- **Leveraging Risk:** Investments in derivative instruments may give rise to a form of leverage. Trading Advisers may engage in speculative transactions which involve substantial risk and leverage, such as making short sales. The use of leverage by the Adviser and Trading Advisers may increase the volatility of the Fund. These leveraged instruments may result in losses to the Fund or may adversely affect the Fund's NAV or total return, because instruments that contain leverage are more sensitive to changes in interest rates. The Fund may also have to sell assets at inopportune times to satisfy its obligations in connection with such transactions.

- **Management Risk:** The Fund is subject to the risk of poor investment selection. In other words, the individual investments of the Fund may not perform as well as expected, and/or the Fund's portfolio management practices may not work to achieve their desired result.

- **Manager Risk:** If the Adviser and Trading Advisers make poor investment decisions, it will negatively affect the Fund's investment performance.

- **Market Risk:** The NAV of the Fund will change with changes in the market value of its portfolio positions. The value of investments held by the Fund may increase or decrease in response to economic, political, financial, public health crises (such as epidemics or pandemics) or other disruptive events (whether real, expected or perceived) in the U.S. and global markets. Investors may lose money.

- **Multi-Manager Dependence Risk:** The success of the Fund's investment strategy depends both on the Adviser's ability to select Trading Advisers and to allocate assets to those Trading Advisers and on each Trading Adviser's ability to execute the relevant strategy and select investments for the Fund and the Subsidiaries. The Trading Advisers' investment styles may not always be complementary, which could adversely affect the performance of the Fund.

- **New Adviser Risk:** The Trading Advisers may be newly registered or not registered with the SEC and/or have not previously managed a mutual fund. Accordingly, investors in the Fund bear the risk that a Trading Adviser's inexperience may limit its effectiveness.

- **Non-Diversification Risk:** The Fund is non-diversified. Compared to other funds, the Fund may invest more of its assets in a smaller number of companies. Gains or losses on a single stock may have greater impact on the Fund.

- **Options Risk:** Purchasing and writing put and call options are highly specialized activities and entail greater than ordinary investment risks. The Fund may not fully benefit from or may lose money on an option if changes in its value do not correspond as anticipated to changes in the value of the underlying securities.

- **Quantitative Trading Strategies Risk:** The Adviser and Trading Advisers may use quantitative methods to select investments. Securities or other investments selected using quantitative methods may perform differently from the market as a whole or from their expected performance for many reasons, including factors used in building the quantitative analytical framework, the weights placed on each factor, and changing sources of market returns, among others. Any errors or imperfections in quantitative analyses or models, or in the data on which they are based, could adversely affect the ability of the Adviser or a Trading Adviser to use such analyses or models effectively, which in turn could adversely affect the Fund's performance. There can be no assurance that these methodologies will help the Fund to achieve its investment objective.

• **Short Sales Risk:** Short sales of securities may result in gains if a security's price declines, but may result in losses if a security's price rises. In a rising market, short positions may be more likely to result in losses because securities sold short may be more likely to increase in value. Short selling also involves the risks of: increased leverage, and its accompanying potential for losses; the potential inability to reacquire a security in a timely manner, or at an acceptable price; the possibility of the lender terminating the loan at any time, forcing the Fund to close the transaction under unfavorable circumstances; and the additional costs that may be incurred. The Fund may engage in short sales that are either "uncovered" or "against the box." A short sale is "against the box" if at all times during which the short position is open, the Fund owns at least an equal amount of the securities or securities convertible into, or exchangeable without further consideration for, securities of the same issue as the securities that are sold short. Short sales "against the box" may protect the Fund against the risk of losses in the value of a portfolio security because any decline in value of the security should be wholly or partially offset by a corresponding gain in the short position. Any potential gains in the security, however, would be wholly or partially offset by a corresponding loss in the short position. Short sales that are not "against the box" involve a form of investment leverage, and the amount of the Fund's loss on a short sale is potentially unlimited.

• **Subsidiary Risk:** By investing in the Subsidiaries, the Fund is indirectly exposed to the risks associated with each Subsidiary's investments. The derivatives and other investments held by the Subsidiaries are generally similar to those that are permitted to be held by the Fund and are subject to the same risks that apply to similar investments if held directly by the Fund. The Subsidiaries are not registered under the 1940 Act, and, unless otherwise noted in this Prospectus, are not subject to all the investor protections of the 1940 Act. Changes in the laws or acts of the United States, Delaware and/or the Cayman Islands could result in the inability of the Fund and/or the Subsidiaries to continue to operate as they currently do and could adversely affect the Fund.

• **Tax Risk:** In order to qualify as a RIC, the Fund must meet certain requirements regarding the source of its income, the diversification of its assets and the distribution of its income. Under the test regarding the source of a RIC's income, at least 90% of the gross income of the RIC each year must be qualifying income, which consists of dividends, interest, gains on investment assets and other categories of investment income. Treasury Regulations provide that income from a foreign subsidiary that is a controlled foreign corporation is qualifying income for purposes of the Fund remaining qualified as a RIC for U.S. federal income tax purposes. Notwithstanding the treatment of controlled foreign corporations in the regulations, the Internal Revenue Service ("IRS") may take the position that income earned by the Fund through the Cayman Subsidiary may not be qualifying income because of its investment in commodities. Additionally, the IRS may take the position that certain commodity-linked structured notes may not be qualifying income. A recharacterization of income from the Cayman Subsidiary or commodity-linked structured notes could cause the Fund to fail to qualify as a RIC. If the Fund were to fail to qualify as a RIC and become subject to federal income tax, shareholders of the Fund would be subject to diminished returns. Changes in the laws or acts of the United States, Delaware and/or the Cayman Islands could result in the inability of the Fund and/or its Subsidiaries to operate as described in this Prospectus and the SAI and could adversely affect the Fund. For example, the Cayman Islands does not currently impose any income, corporate or capital gains tax or withholding tax on the Cayman Subsidiary or the SPC. If Cayman Islands act changes such that the Cayman Subsidiary and/or the SPC must pay Cayman Islands taxes, Fund shareholders would likely suffer decreased investment returns.

PERFORMANCE INFORMATION

The following performance information provides some indication of the risks of investing in the Fund. The bar chart shows the performance of the Fund's Class I Shares from year to year. The bar chart assumes reinvestment of all dividends and distributions. Performance information represents only past performance, before and after taxes, and does not necessarily indicate future results. Updated performance information is available online at www.abbeycapital.com or by calling 1-844-261-6484 (toll free).

Abbey Capital Futures Strategy Fund – Class I Shares
Total Returns for Calendar Years Ended December 31

During the period shown in the chart, the highest quarterly return was 9.10% (for the quarter ended March 31, 2022) and the lowest quarterly return was -5.87% (for the quarter ended December 31, 2022).

The year-to-date total return of the Fund's Class I Shares as of September 30, 2024 was 1.53%.

AVERAGE ANNUAL TOTAL RETURNS

The following table, which includes all applicable sales loads, compares the average annual total returns of the Class I Shares, Class A Shares and Class C Shares for the one-year, five-year, and since inception periods to a broad-based market index for the same periods. For Class A Shares, the table reflects the impact of the maximum sales charge of 5.75%. For this reason, returns for Class A Shares will be lower than those of Class I and Class C Shares. Average annual returns for Class T Shares are not included because they had not commenced operations prior to the date of this Prospectus. The returns for Class T Shares would be substantially similar to returns for Class I Shares because the shares are invested in the same portfolio of securities, and would differ only to the extent that the classes have different expenses.

	AVERAGE ANNUAL TOTAL RETURNS FOR THE PERIODS ENDED DECEMBER 31, 2023		
	1 YEAR	5 YEARS	SINCE INCEPTION JULY 1, 2014
Class I Shares			
– Return Before Taxes	-3.27%	6.59%	4.60%
– Return After Taxes on Distributions ⁽¹⁾	-4.06%	4.27%	3.28%
– Return After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾	-1.94%	4.20%	3.08%
Class A Shares			
– Return Before Taxes	-9.12%	5.08%	3.69% ⁽²⁾
Class C Shares			
– Return Before Taxes	-5.16%	5.54%	3.57% ⁽²⁾
S&P 500[®] Total Return Index (reflects no deduction for fees, expenses and taxes)	26.29%	15.69%	11.81%

(1) After-tax returns are calculated using the historical highest individual Federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. In certain cases, the figure representing "Return after Taxes on Distributions and Sale of Fund Shares" may be higher than the other return figures for the same period, since a higher after-tax

return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts. After-tax returns are shown for Class I Shares only. After-tax returns for Class A Shares, Class C Shares and Class T Shares will vary.

- (2) Class I Shares commenced operations on July 1, 2014, Class A Shares commenced operations on August 29, 2014, and Class C Shares commenced operations on October 6, 2015. Performance shown prior to inception of the Class A Shares and Class C Shares is based on the performance of Class I Shares, adjusted for the higher expenses applicable to Class A Shares and Class C Shares, respectively.

MANAGEMENT OF THE FUND

PURCHASE AND SALE OF INFORMATION

The minimum initial investment for Class A Shares, Class C Shares and Class T Shares is \$2,500, and the minimum initial investment for Class I Shares is \$1,000,000. There is a minimum amount of \$100 for subsequent investment in Class A Shares, Class C Shares and Class T Shares, and \$1,000 in Class I Shares. Class T Shares are not currently available for sale. Certain features of the Shares, such as the initial and subsequent investment minimums and certain trading restrictions, may be modified or waived by Service Organizations, as further detailed in the section entitled “Purchase of Fund Shares – Purchases Through Intermediaries.”

You can purchase and redeem Shares of the Fund only on days the New York Stock Exchange (“NYSE”) is open. Shares of the Fund may be available through certain brokerage firms, financial institutions and other industry professionals that have entered into a distribution agreement with the Fund’s distributor (collectively, “Service Organizations”). Class T Shares, once available for sale, will be available only to investors who are investing through a Service Organization. Not all Service Organizations will make Class T Shares available to their clients. You may redeem Class T Shares on any business day by contacting your Service Organization. Consult Appendix A and a representative of your Service Organization about the availability of Class T Shares. Class I Shares, Class A Shares and Class C Shares of the Fund may also be purchased and redeemed directly through the Company by the means described below.

Call the Transfer Agent at 1-844-261-6484.

TAXES

The Fund intends to make distributions that generally may be taxed at ordinary income or capital gains rates.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund may pay the intermediary for the sale of Shares and other related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
