

## Q1 2026 Summary

The Fund posted its third consecutive positive quarter in Q1 as the backdrop for managed futures strategies remained supportive, despite a challenging March.

### Drivers of quarterly performance included:

- ▶ Very strong gains in energy markets along with an extension of uptrends in precious metals and emerging market currencies.
- ▶ More challenging trading conditions in energy, fixed income and agricultural commodities.
- ▶ Positive contribution from the Fund’s Diversified Trendfollowing trading style, with each of the non-Trendfollowing trading styles also positive.

## Performance as at 31 March 2026

	Inception Date	Cumulative Return As at 31 March 2026		Annualized Return As at 31 March 2026			
		QTD	YTD	1yr	5yr	10yr	ITD
Class I (ABYIX)	01 July 2014	4.53%	4.53%	8.28%	3.73%	2.87%	4.33%
Class A (ABYAX) (pro forma 1 Jul 2014 - 29 Aug 2014)*	29 August 2014	4.46%	4.46%	8.17%	3.47%	2.61%	4.07%
Class A (with max. Load, ABYAX) (pro forma 1 Jul 2014 - 29 Aug 2014)*	29 August 2014	-1.55%	-1.55%	1.90%	2.26%	2.00%	3.55%
Class C (ABYCX) (pro forma 1 Jul 2014 - 6 Oct 2015)*	06 October 2015	4.30%	4.30%	7.24%	2.71%	1.84%	3.30%

\*Source: Abbey Capital based on administrator data. Class A Shares returns prior to 29 August 2014 are pro forma (i.e. returns of Class I Shares adjusted for fees and expenses of Class A Shares). Returns for Class A Shares with Load reflect a deduction for the maximum front-end sales charge of 5.75%. Class C Shares returns prior to 06 October 2015 are pro forma (i.e. returns of Class I Shares, adjusted for Class C Shares expenses). **The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current returns may be lower or higher than the past performance data quoted. Visit [www.abbeycapital.com](http://www.abbeycapital.com) for returns updated daily. Call (US Toll Free) 1-844-261-6484 or (international callers) +1-414-203-9540 for returns current to the most recent month-end.** Returns would have been lower without fee waivers in effect. Annual Fund Operating Expenses after fee waiver are as of the most recent prospectus and are applicable to investors. The Fund’s net expenses are 1.79% for Class I Shares, 2.04% for Class A Shares and 2.79% for Class C Shares, net of the Fee Waiver (described below). The gross expenses are 1.85% for Class I Shares, 2.10% for Class A Shares and 2.85% for Class C Shares. Abbey Capital has contractually agreed to waive its advisory fee and/or reimburse expenses to limit Total Annual Fund Operating Expenses (excluding Excluded Items below) to 1.79%, 2.04% and 2.79% for Class I Shares, Class A Shares and Class C Shares, respectively (the “Fee Waiver”). This contractual limitation is in effect until December 31, 2026. The following are not included in the Fee Waiver: acquired fund fees and expenses, brokerage commissions, extraordinary items, interest or taxes (“Excluded Items”).

Abbey Capital Future Strategy Fund (Share Class I) received a 3-star rating for the 3-year, 3-star rating for the 5-year, and 3-star rating for the 10-year period, ending March 31, 2025 out of 21, 20 and 18 US Systematic Trend funds, respectively; based on risk adjusted returns. Past performance is no guarantee of future results. Morningstar Rating is for Class I Shares only; other classes may have different performance characteristics.

## Performance Analysis

- ▶ The escalating conflict in the Middle East marked a turning point for trends across various markets. 2026 had begun with a continuation of the uptrends seen in precious metals last year, along with broadly positive moves in equity markets, most notably outside the US. Risk-off sentiment and inflationary concerns then took hold from late-February.
- ▶ Within energy markets, a negative backdrop for trading early in the year gave way to improved conditions from the end of February. Crude oil and distillates trended sharply higher during March as the closure of the Strait of Hormuz led to significant supply concerns. The Fund realised strong gains from long positions.
- ▶ Gains in precious metals stemmed from longs in gold and silver, the prices of which rallied to record highs before correcting in March alongside increased inflation fears.
- ▶ Gains from long exposures across a basket of emerging market currencies against the US Dollar were also concentrated in January and February, before the US Dollar rose in March.
- ▶ Negatively for Fund performance, losses were reported in fixed income. Long positions held in early March detracted when global yields rose sharply on inflationary fears.
- ▶ Performance in equities had been strongly positive in January and February, when long positions in several non-US indices reported gains. However, the conflict in the Middle East saw sharp corrections in equity markets and Q1 performance in the sector was ultimately negative following losses in March.

## Positioning

- ▶ In terms of Fund positioning, the long exposure to equities was reduced. In contrast, positioning in fixed income transitioned between long and short throughout Q1, with a short held at quarter-end.
- ▶ Long positions in metals peaked in January, while the Fund moved from short to long in both energy and agricultural commodities.
- ▶ In currencies, the Fund finished the quarter with a long position in the US Dollar and British Pound, with short exposures held in the Euro and Japanese Yen.

**► Please read the Prospectus carefully before investing. Investors should carefully consider the Fund's investment objectives, risks, charges and expenses before investing in the Fund. This and other information is in the Prospectus. A copy of the Prospectus and summary prospectus, and other information about the Fund, may be obtained by contacting [businessdevelopment@abbeycapital.com](mailto:businessdevelopment@abbeycapital.com) or by calling (646) 453 7850. CTAs referenced in this report are referenced as "Trading Advisers" in the Fund's Prospectus and SAI.**

#### **RISK CONSIDERATIONS:**

► An investment in the Abbey Capital Futures Strategy Fund is speculative and involves substantial risk and conflicts of interest. It is possible that an investor may lose some or all of their investment.

► All investments in securities involve risk of the loss of capital. An investment in the Fund includes the risks inherent in an investment in securities, as well as specific risks associated with this open-ended investment product. Among the risks associated with investing in this Fund are Commodity Sector Risk, Counter-Party Risk, Credit Risk, Currency Risk, CTA and Management Risks, Advisory Risk, Subsidiary Risks, Tax Risks, Emerging Markets Risk, Leveraging Risks, Foreign Investment Risks, Fixed Income Securities Risks, Short Sale Risk and Portfolio Turnover Risks.

► The Fund may invest in or utilize derivative investments, futures contracts, and hedging strategies. A portfolio of hedge funds may increase the potential for losses or gains. One or more underlying CTAs, from time to time, may invest a substantial portion of the assets managed in a specific industry sector. As a result, the underlying CTA's investment portfolio (as well as the Fund's) may be subject to greater risk and volatility than if investments had been made in the securities of a broader range of issuers. Trading in futures is not suitable for all investors given its speculative nature and the high level of risk involved.

► There can be no assurance that the Fund's or an underlying CTA's strategy (hedging or otherwise) will be successful or that it will employ such strategies with respect to all or any portion of its portfolio. The value of the Fund's portfolio investments should be expected to fluctuate.

Investing in managed futures is not suitable for all investors given its speculative nature and the high level of risk involved. The Fund is appropriate only for investors who can bear the risks associated with the product. Investors may lose some or all of their investment.

► This brief statement cannot disclose all of the risks and other factors necessary to evaluate a participation in the Fund.

Investors are urged to take appropriate investment advice and to carefully consider their investment objectives, personal situation, and factors such as net worth, income, age, risk tolerance and liquidity needs before investing in the Fund. Before investing, investors should carefully consider the Fund's investment objectives, risks, conflicts, tax considerations, charges and expenses.

► **Abbey Capital Limited** ("Abbey Capital") is a private company limited by shares incorporated in Ireland (registration number 327102). Abbey Capital is authorised and regulated by the Central Bank of Ireland as an Alternative Investment Fund Manager under Regulation 9 of the European Union (Alternative Investment Fund Managers) Regulations 2013 ("AIFMD"). Abbey Capital is registered as a Commodity Pool Operator and Commodity Trading Advisor with the U.S. Commodity Futures Trading Commission ("CFTC") and is a member of the U.S. National Futures Association. Abbey Capital is also registered as an Investment Adviser with the U.S. Securities Exchange Commission ("SEC"). Abbey Capital (US) LLC is a wholly owned subsidiary of Abbey Capital. None of the regulators listed herein endorse, indemnify or guarantee the member's business practices, selling methods, the class or type of securities offered, or any specific security.

#### **► VaR Definition:**

Value-at-Risk (VaR) expresses market risk as a percentage of a portfolio's value. The VaR figures quoted are as of 31 March 2026, based on a historic VaR calculation with a 5-year lookback period (1300 days). The historical approach to evaluating a portfolio's VaR involves applying the current positions to the historical portfolio prices of the corresponding instruments, and then calculating how the current positioning would have performed historically. For any chosen threshold value, the hypothetical returns then provide an estimate of the current VaR figure.

#### **► %VaR:**

%VaR is the contract VaR as a percentage of the sum of the individual contract VaRs within the Fund.

#### **► Basis Point ("BPS") Definition:**

A basis point is one hundredth of one percent and refers to a common unit of measure for interest rates and other percentages in finance.

#### **► Correlation Definition:**

Correlation is a statistical measure which quantifies the extent to which two assets, or securities, move in relation to each other. The correlation coefficient between two assets can vary from between -1 and +1, with a positive correlation indicating a tendency to rise and fall together, and a negative correlation indicating a tendency to move in opposite directions.

#### **► Currency Key:**

USD	United States Dollar	CHF	Swiss Franc
EUR	Euro	CAD	Canadian Dollar
JPY	Japanese Yen	AUD	Australian Dollar
NOK	Norwegian Krone	GBP	British Pound
BRL	Brazilian Real	NZD	New Zealand Dollar
SGD	Singapore Dollar	RUB	Russian Ruble
PLN	Polish Zloty	TRY	Turkish Lira

#### **► Description of trading styles:**

**Diversified Trendfollowing:** A systematic style that CTAs adopt to take advantage of trends in markets, with positions taken for duration of four weeks and longer.

**Global Macro:** A global macro approach is based on trading macroeconomic themes over multiple time frames. A Macro CTA will trade looking to profit from global economic trends which include interest rates, economic policies, and currency fluctuations.

**Value:** A systematic trading of interest rate yield curve differentials and changes in term structure over medium term to long term. A Value CTA trades based on a view that contracts are not priced correctly in the current market due to expected future trends and potential.

**Short-term Systematic:** Aims to capture trends and countertrends with durations from intraday to 10 days. A CTA will trade in and out of contracts using closely controlled methods which are designed to take advantage of pricing or arbitrage opportunities.

► **Morningstar Rating:** The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. The Abbey Capital Futures Strategy Fund (Share Class I) was rated 3 stars over the 3-year period and 3 stars over the 5-year period, and 3 stars over the 10-year period ending 31 March 2025 among 21, 20 and 18 US Systematic Trend funds, respectively.

As of April 30, 2022 the Fund’s Morningstar Category changed from the Morningstar Managed Futures Trend Category to the Morningstar US Systematic Trend Category.

► **Explanation of indices:**

**FTSE 100 Index:** The FTSE 100 is a market-capitalisation weighted index of UK-listed blue-chip companies. The index is designed to measure the performance of the 100 largest companies traded on the London Stock Exchange that pass screening for size and liquidity.

**Hang Seng Index:** The Hang Seng Index is a free-float capitalization-weighted index of a selection of companies from the Stock Exchange of Hong Kong. The components of the index are divided into four subindices: Commerce and Industry, Finance, Utilities, and Properties.

**NASDAQ 100 Index:** The Nasdaq-100 Index includes 100 of the largest domestic and international non-financial companies listed on The Nasdaq Stock Market based on market capitalization. The Index reflects companies across major industry groups including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology.

**S&P/TSX 60 Index (TSE):** The S&P/TSX 60 Index is designed to measure the large-cap segment of the Canadian equity market and is structured to reflect the sector weights of the S&P/TSX Composite. The Toronto Stock Exchange (TSX) serves as the distributor of both real-time and historical data for this index.

**Nikkei 225 Index:** The Nikkei-225 Stock Average is a price-weighted average of 225 top-rated Japanese companies listed in the Prime Market of the Tokyo Stock Exchange.

**TOPIX Index:** The TOPIX Index is a free-float adjusted market capitalisation index that aims to capture an extensive portion of the Japanese stock market.

**DAX 40 Index:** The DAX 40 Index is a total return index of 40 selected German blue-chip stocks traded on the Frankfurt Stock Exchange. DAX tracks the performance of the 40 largest companies listed on the Frankfurt Stock Exchange that fulfil certain minimum quality and profitability requirements. Component selection is based on free float market capitalization.

The indices referred to herein are not based on the entire population of managed futures, equities or bonds and are not indicative of the performance of any particular CTA or fund. Furthermore, these indices may not be directly comparable. As a result there are inherent limitations with using these indices for representative purposes and the above is shown for illustrative purposes only. No fund managed by Abbey Capital is benchmarked against any index, including the indices referenced. For an explanation of all indices referenced please go to the appendix.
