

Abbey Capital

30 April 2026

Overview

The Abbey Capital Multi Asset Fund (the "Fund") is an absolute return fund that targets approximately 100% exposure of its net assets to the Managed Futures strategy and approximately 50% exposure to its Long U.S. Equity strategy. The Fund's remaining net assets will be allocated to its Fixed Income strategy through allocation to US T-Bills.

Features

- Combining managed futures and equities in one portfolio may help investors capture returns in each asset class.
- Managed Futures Strategy executed across bond, equity, commodity and foreign exchange markets.
- CTAs are selected and monitored by Abbey Capital, an allocator with a 25-year record of successful multi-manager investing.
- Segregated accounts structure to legally segregate the Fund's assets and liabilities allocated to each CTA.

*Source: Abbey Capital based on administrator data. The fund commenced operations as a series of The RBB Fund, Inc. on 11 April 2018, when all of the assets of Abbey Global LP transferred to Class I Shares of the Fund.*The inception date of the Class C Shares was 8 November 2021. Returns for Class C Shares prior to 8 November 2021 are pro forma (i.e. returns of Class I Shares from 11 April 2018 are adjusted for Class C Shares expenses). Performance results with sales charges reflect the deduction of the applicable contingent deferred sales charge (CDSC). Class C shares are subject to a CDSC of 1.00% if you redeem your shares within twelve (12) months of purchase, based on the lesser of the shares' cost at purchase or current net asset value at time of redemption. Performance presented at NAV does not include the CDSC and would be lower if a charge was reflected. **The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Performance would have been lower without fee waivers in effect. Visit www.abbeycapital.com for returns updated daily. Important Information & Risk Factors

Please read the Prospectus carefully before investing. Investors should carefully consider the Fund's investment objectives, risks, charges and expenses before investing in the Fund. This and other information is in the Prospectus. A copy of the Prospectus and summary prospectus, and other information about the Fund, may be obtained by contacting businessdevelopment@abbeycapital.com or by calling (646) 453 7850. CTAs referenced in this report are referenced as "Trading Advisers" in the Fund's Prospectus and SAL.

RISK CONSIDERATIONS:

All mutual fund investing involves risk including the possible loss of principal value. Investing in a managed futures fund entails special risks and may not be suitable for all investors given its speculative nature and the high level of risk involved. The Fund is appropriate only for investors who can understand and bear the risks associated with the product. **You may lose part or all of your investment in the Fund.**

The Managed Futures strategy will be achieved by the Fund investing in directly or indirectly wholly-owned and controlled subsidiaries of the Fund. The Fund may invest a portion of its assets in ACMAF Onshore Series LLC and up to 25% of its total assets in ACMAF Master Offshore Limited which invests substantially all its assets in ACMAF Offshore SPC. Individual managers are appointed to (i) separate series of ACMAF Onshore Series LLC and (ii) separate segregated portfolios of ACMAF Offshore SPC and are permitted to trade certain financial, managed futures and foreign exchange contracts. All commodities futures and commodities-related investments will be made in the segregated portfolios of ACMAF Offshore SPC.

The Long U.S. Equity strategy will be achieved by allocating 50% of the Fund's total assets in a portfolio of one or more U.S. equity index futures and/or one or more exchange-traded funds ("ETFs").

Futures and forward contracts may involve substantial risk, such as losses caused by unanticipated market movements, which are potentially unlimited; possible lack of a liquid secondary market; the inability to close a contract when desired; and the possibility of counterparty default.

Short sales theoretically involve unlimited loss potential since the market price of securities or contracts sold short may continuously increase. The use of certain derivatives may also have a leveraging effect which may increase the volatility of the Fund and may increase the risk of loss.

Exposure to commodities markets and commodity-linked derivatives may subject the Fund to greater volatility affected by industry related factors, value, supply and demand, governmental policies, weather, economic and political factors.

Investments in foreign and emerging markets are subject to risks from currency fluctuation, political instability, social and economic risks. In particular, emerging and frontier markets may be more volatile and less liquid than more developed markets and therefore may involve greater risks.

The Fixed Income strategy invests the Fund's assets primarily in investment grade fixed income securities (of all durations and maturities) in order to generate interest income and capital appreciation. Fixed income securities that the Fund may invest are subject to credit risk, prepayment risk and interest rate risk so that as interest rates rise the value of bond prices will decline. These risks are usually greater for longer-term debt securities.

The Fund is non-diversified which means it may be invested in a limited number of issuers and susceptible to any economic, political and regulatory events than a more diversified fund.

This brief statement cannot disclose all of the risks and other factors necessary to evaluate a participation in the Fund.

Investors are urged to take appropriate investment advice and to carefully consider their investment objectives, personal situation, and factors such as net worth, income, age, risk tolerance and liquidity needs before investing in the Fund. Before investing, investors should carefully consider the Fund's investment objectives, risks, conflicts, tax considerations, charges and expenses.
