

STATEMENT OF ADDITIONAL INFORMATION

ABBHEY CAPITAL MULTI ASSET FUND

a series of **THE RBB FUND, INC.**

**CLASS I SHARES (TICKER: MAFIX)
CLASS A SHARES (TICKER: MAFAX)
CLASS C SHARES (TICKER: MAFCX)**

December 31, 2021

Investment Adviser:

ABBHEY CAPITAL LIMITED

This Statement of Additional Information (“SAI”) provides supplementary information pertaining to shares of three share classes, Class I Shares, Class A Shares and Class C Shares (collectively, the “Shares”), representing interests in the Abbey Capital Multi Asset Fund (the “Fund”) of The RBB Fund, Inc. (the “Company”). This SAI is not a prospectus and should be read only in conjunction with the Fund’s Prospectus dated December 31, 2021 (the “Prospectus”) and the Fund’s Annual Report dated August 31, 2021 (the “Annual Report”). Copies of the Prospectus and Annual and Semi-Annual Reports may be obtained free of charge by calling toll-free 1-844-261-6484. The financial statements and notes contained in the [Annual Report](#) are incorporated by reference into this SAI. No other part of the Annual Report is incorporated by reference herein.

APPENDIX A	A-1

GENERAL INFORMATION

The Company is an open-end management investment company currently consisting of 41 separate portfolios. The Company is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), and was organized as a Maryland corporation on February 29, 1988. This SAI pertains to the Abbey Capital Multi Asset Fund, a non-diversified portfolio. Abbey Capital Limited ("Abbey Capital" or the "Adviser"), serves as the investment adviser to the Fund.

INVESTMENT OBJECTIVE

The following supplements the information contained in the Prospectus concerning the investment objective and policies of the Fund.

The Fund seeks long-term capital appreciation. Current income is a secondary objective. There can be no guarantee that the Fund will achieve its investment objectives. The Fund may not necessarily invest in all of the instruments or use all of the investment techniques permitted by the Fund's Prospectus and this SAI, or invest in such instruments or engage in such techniques to the full extent permitted by the Fund's investment policies and limitations.

PRINCIPAL INVESTMENT POLICIES AND RISKS

Asset-Backed Securities. The Fund may invest in asset-backed securities, which represent participations in, or are secured by and payable from, pools of assets such as motor vehicle installment sale contracts, installment loan contracts, leases of various types of real and personal property, receivables from revolving credit (credit card) agreements and other categories of receivables. Asset-backed securities may also be collateralized by a portfolio of U.S. government securities but are not direct obligations of the U.S. government, its agencies or instrumentalities. Such asset pools are securitized through the use of privately-formed trusts or special purpose corporations. Payments or distributions of principal and interest on asset-backed securities may be guaranteed up to certain amounts and for a certain time period by a letter of credit or a pool insurance policy issued by a financial institution unaffiliated with the trust or corporation, or other credit enhancements may be present, although privately issued obligations collateralized by a portfolio of privately issued asset-backed securities do not involve any government-related guarantee or insurance. In addition to the risks that are presented by mortgage-backed securities, asset-backed securities generally do not have the benefit of a security interest in collateral that is comparable to mortgage assets. See "Mortgage-Backed Securities" below for additional information.

Asset-backed securities acquired by the Fund may also include collateralized debt obligations ("CDOs"). CDOs include collateralized bond obligations ("CBOs") and collateralized loan obligations ("CLOs") and other similarly structured securities.

A CBO is a trust or other special purpose entity ("SPE") that is typically backed by a diversified pool of fixed-income securities (which may include high risk, below investment grade securities). A CLO is a trust or other SPE that is typically collateralized by a pool of loans, which may include, among others, domestic and non-U.S. senior secured loans, senior unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. Although certain CDOs may receive credit enhancement in the form of a senior-subordinate structure, over-collateralization or bond insurance, such enhancement may not always be present and may fail to protect the Fund against the risk of loss on default of the collateral. Certain CDOs may use derivatives contracts to create "synthetic" exposure to assets rather than holding such assets directly, which entails the risks of derivative instruments described elsewhere in this SAI. CDOs may charge management fees and administrative expenses, which are in addition to those of the Fund.

For both CBOs and CLOs, the cashflows from the SPE are split into two or more portions, called tranches, varying in risk and yield. The riskiest portion is the "equity" tranche, which bears the first loss from defaults from the bonds or loans in the SPE and serves to protect the other, more senior tranches from default (though such protection is not complete). Since it is partially protected from defaults, a senior tranche from a CBO or CLO typically has higher ratings and lower yields than its underlying securities, and may be rated investment grade. Despite the protection from the equity tranche, CBO or CLO tranches can experience substantial losses due to actual defaults, increased sensitivity to defaults due to collateral default and disappearance of protecting tranches, market anticipation of defaults, as well as investor aversion to CBO or CLO securities as a class. Interest on certain tranches of a CDO may be paid in kind (paid in the form of obligations of the same type rather than cash), which involves continued exposure to default risk with respect to such payments.

The risks of an investment in a CDO depend largely on the type of the collateral securities and the class of the CDO in which the Fund invests. Normally, CBOs, CLOs and other CDOs are privately offered and sold, and thus are not registered under the securities laws. As a result, investments in CDOs may be characterized by the Fund as illiquid investments. However, an active dealer market may exist for CDOs, allowing a CDO to qualify for Rule 144A transactions. In addition to the normal risks associated with fixed-income securities and asset-backed securities generally discussed elsewhere in this SAI, CDOs carry additional risks including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the Fund may invest in tranches of CDOs that are subordinate to other tranches; (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results; and (v) the CDO's manager may perform poorly or default.

Commodity-Linked Investments. The Fund may attempt to provide exposure to the returns of real assets that trade in the commodity markets without direct investment in physical commodities. Real assets include oil, gas, industrial and precious metals, livestock, and agricultural or meat products, or other items that have tangible properties. Commodity-linked derivative instruments include commodity index-linked securities and other derivative instruments that provide exposure to the investment returns of the commodities markets. Commodity-linked investments may be more volatile and less liquid than the underlying instruments and their value may be affected by the performance of commodities and changes in interest rates as well as weather, tax, and other regulatory or political developments, overall market movements and other factors affecting the value of particular industries or commodities, such as disease (including pandemics), embargoes and other trade barriers, and acts of war or terrorism.

The Fund may invest in commodity-linked derivative instruments such as commodity-linked structured notes. The Fund may invest in commodity-linked notes that pay a return linked to the performance of a commodities index or basket of futures contracts with respect to all of the commodities in an index. In some cases, the return will be based on some multiple of the performance of the index, and this embedded leverage will magnify the positive and negative return the Fund earns from these notes as compared to the index. The principal and/or interest payments of commodity-linked derivatives are tied to the value of a real asset or commodity index. Structured notes may be structured by the issuer and the purchaser of the note. The notes are derivative debt instruments with principal payments generally linked to the value of commodities, commodity futures contracts or the performance of commodity indices and interest and coupon payments pegged to a market-based interest rate, such as LIBOR or a bank's prime rate. The value of these notes will rise or fall in response to changes in the underlying commodity or related index or investment. These notes expose the Fund economically to movements in commodity prices.

Corporate Obligations. The Fund may invest in debt obligations, such as bonds and debentures, issued by corporations and other business organizations without limit on credit quality or maturity of debt securities. See [Appendix A](#) to this SAI for a description of corporate debt ratings. An issuer of debt obligations may default on its obligation to pay interest and repay principal. Also, changes in the financial strength of an issuer or changes in the credit rating of a security may affect its value.

Credit Default Swaps, Interest Rate Swaps, Mortgage Swaps, Currency Swaps, Total Return Swaps, Options on Swaps and Interest Rate Caps, Floors and Collars. The Fund may enter into credit default, interest rate and total return swaps. The Fund may also enter into interest rate caps, floors and collars. In addition, the Fund may enter into mortgage swaps and currency swaps.

The Fund may enter into swap transactions for hedging purposes or to seek to increase total return. As examples, the Fund may enter into swap transactions for the purpose of attempting to obtain or preserve a particular return or spread at a lower cost than obtaining a return or spread through purchases and/or sales of instruments in other markets, to protect against currency fluctuations, as a duration management technique, to protect against any increase in the price of securities the Fund anticipates purchasing at a later date, or to gain exposure to certain markets in an economical way.

Swap agreements are two party contracts entered into primarily by institutional investors. In a standard “swap” transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments, which may be adjusted for an interest factor. The gross returns to be exchanged or “swapped” between the parties are generally calculated with respect to a “notional amount,” i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate, in a particular foreign currency or security, or in a “basket” of securities representing a particular index. As examples, credit default swaps involve the receipt of floating or fixed rate payments in exchange for assuming potential credit losses of an underlying security. Credit default swaps give one party to a transaction the right to dispose of or acquire an asset (or group of assets), or the right to receive from or make a payment to the other party, upon the occurrence of specified credit events. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest, such as an exchange of fixed-rate payments for floating rate payments. Mortgage swaps are similar to interest rate swaps in that they represent commitments to pay and receive interest. The notional principal amount, however, is tied to a reference pool or pools of mortgages. Currency swaps involve the exchange of the parties’ respective rights to make or receive payments in specified currencies. Total return swaps are contracts that obligate a party to pay or receive interest in exchange for payment by the other party of the total return generated by a security, a basket of securities, an index, or an index component.

The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index exceeds a predetermined interest rate, to receive payment of interest on a notional principal amount from the party selling such interest rate cap. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling the interest rate floor. An interest rate collar is the combination of a cap and a floor that preserves a certain return within a predetermined range of interest rates.

A great deal of flexibility is possible in the way swap transactions are structured. However, generally the Fund will enter into credit default, interest rate, total return and mortgage swaps on a net basis, which means that the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. Credit default, interest rate, total return and mortgage swaps do not normally involve the delivery of securities, other underlying assets or principal. Accordingly, the risk of loss with respect to credit default, interest rate, total return and mortgage swaps is normally limited to the net amount of payments that the Fund is contractually obligated to make. If the other party to a credit default, interest rate, total return or mortgage swap defaults, the Fund’s risk of loss consists of the net amount of payments that the Fund is contractually entitled to receive, if any. In contrast, currency swaps may involve the delivery of the entire principal amount of one designated currency in exchange for the other designated currency. Therefore, the entire principal value of a currency swap is subject to the risk that the other party to the swap will default on its contractual delivery obligations.

A credit default swap may have as reference obligations one or more securities that may, or may not, be currently held by the Fund. The protection “buyer” in a credit default swap is generally obligated to pay the protection “seller” an upfront or a periodic stream of payments over the term of the swap provided that no credit event, such as a default, on a reference obligation has occurred. If a credit event occurs, the seller generally must pay the buyer the “par value” (full notional value) of the swap in exchange for an equal face amount of deliverable obligations of the reference entity described in the swap, or the seller may be required to deliver the related net cash amount, if the swap is cash settled. The Fund may be either the buyer or seller in the transaction. If the Fund is a buyer and no credit event occurs, the Fund may recover nothing if the swap is held through its termination date. However, if a credit event occurs, the buyer generally may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity whose value may have significantly decreased. As a seller, the Fund generally receives an upfront payment or a rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Fund would effectively add leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap. If a credit event occurs, the value of any deliverable obligation received by the Fund as seller, coupled with the upfront or periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to the Fund.

To the extent that the Fund’s exposure in a transaction involving a swap or an interest rate floor, cap or collar is covered by the segregation of cash or liquid assets, or is covered by other means in accordance with U.S. Securities and Exchange Commission (the “SEC”) guidance, the Fund and the Adviser believe that the transactions do not constitute senior securities under the Act and, accordingly, will not treat them as being subject to the Fund’s borrowing restrictions. In addition, in October 2020, the SEC adopted new regulations governing the use of derivatives by registered investment companies. The Fund will be required to implement and comply with new Rule 18f-4 by the third quarter of 2022. Once implemented, Rule 18f-4 will impose limits on the amount of derivatives a fund can enter into, eliminate the asset segregation framework currently used by funds to comply with Section 18 of the 1940 Act, treat derivatives as senior securities so that a failure to comply with the limits would result in a statutory violation and require funds whose use of derivatives is more than a limited specified exposure to establish and maintain a comprehensive derivatives risk management program and appoint a derivatives risk manager. Accordingly, investors should be aware that the SEC may offer additional guidance in the future that may impact the manner in which the Fund operates.

The Fund will not enter into any credit default, interest rate, total return or mortgage swap transactions unless the unsecured commercial paper, senior debt or claims-paying ability of the other party thereto is rated investment grade by S&P Global Ratings (“S&P”) or Moody’s Investors Service, Inc. (“Moody’s”), or, if unrated by such rating organization, determined to be of comparable quality by the Adviser or applicable Trading Adviser. If there is a default by the other party to such a transaction, the Fund will have contractual remedies pursuant to the agreements related to the transaction.

The use of credit default, interest rate, mortgage, total return and currency swaps, as well as interest rate caps, floors and collars, is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. The use of a swap requires an understanding not only of the referenced asset, reference rate, or index but also of the swap itself, without the benefit of observing the performance of the swap under all possible market conditions. If the Adviser or applicable Trading Adviser is incorrect in its forecasts of market values, credit quality, interest rates and currency exchange rates, the investment performance of the Fund would be less favorable than it would have been if these investment instruments were not used.

Cyber Security Risk. The Fund and its service providers may be prone to operational and information security risks resulting from breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption, or lose operational capacity. Breaches in cyber security include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber-attacks. Cyber security breaches affecting the Fund or the Adviser, custodian, transfer agent, intermediaries and other third-party service providers may adversely impact the Fund. For instance, cyber security breaches may interfere with the processing of shareholder transactions, impact the Fund’s ability to calculate its net asset value (“NAV”), cause the release of private shareholder information or confidential business information, impede trading, subject the Fund to regulatory fines or financial losses and/or cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes. Similar types of cyber security risks are also present for issuers of securities in which the Fund may invest, which could result in material adverse consequences for such issuers and may cause the Fund’s investment in such companies to lose value. While the Fund and its service providers have established information technology and data security programs and have in place business continuity plans and other systems designed to prevent losses and mitigate cyber security risk, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified or that cyber-attacks may be highly sophisticated. Furthermore, the Fund has limited ability to prevent or mitigate cyber security incidents affecting third-party service providers, and such third-party service providers may have limited indemnification obligations to the Fund or the Adviser, and the Fund cannot control the cyber security plans and systems put in place by their service providers or any other third parties whose operations may affect the Fund or its shareholders. The Fund and its shareholders could be negatively impacted as a result.

Equity Markets. Funds may invest in equity markets. Equity markets can be highly volatile, so that investing in the Fund involves substantial risk. As a result, investing in the Fund involves the risk of loss of capital.

Equity Securities. Equity securities represent ownership interests in a company and consist of common stocks, preferred stocks, warrants to acquire common stock, and securities convertible into common stock. Investments in equity securities in general are subject to market risks that may cause their prices to fluctuate over time. Fluctuations in the value of equity securities in which the Fund invests will cause the NAV of the Fund to fluctuate. The Fund purchases equity securities traded in the U.S. on registered exchanges or the over-the-counter market. Equity securities are described in more detail below:

- **Common Stock.** Common stock represents an equity or ownership interest in an issuer. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.
- **Preferred Stock.** Preferred stock represents an equity or ownership interest in an issuer that pays dividends at a specified rate and that has precedence over common stock in the payment of dividends. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds take precedence over the claims of those who own preferred and common stock.
- **Warrants.** Warrants are instruments that entitle the holder to buy an equity security at a specific price for a specific period of time. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments.
- **Convertible Securities.** Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged (by the holder or by the issuer) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio. A convertible security may also be called for redemption or conversion by the issuer after a particular date and under certain circumstances (including a specified price) established upon issue. If a convertible security held by the Fund is called for redemption or conversion, the Fund could be required to tender it for redemption, convert it into the underlying common stock, or sell it to a third party.

Convertible securities generally have less potential for gain or loss than common stocks. Convertible securities generally provide yields higher than the underlying common stocks, but generally lower than comparable non-convertible securities. Because of this higher yield, convertible securities generally sell at a price above their “conversion value,” which is the current market value of the stock to be received upon conversion. The difference between this conversion value and the price of convertible securities will vary over time depending on changes in the value of the underlying common stocks and interest rates. When the underlying common stocks decline in value, convertible securities will tend not to decline to the same extent because of the interest or dividend payments and the repayment of principal at maturity for certain types of convertible securities. However, securities that are convertible other than at the option of the holder generally do not limit the potential for loss to the same extent as securities convertible at the option of the holder. When the underlying common stocks rise in value, the value of convertible securities may also be expected to increase. At the same time, however, the difference between the market value of convertible securities and their conversion value will narrow, which means that the value of convertible securities will generally not increase to the same extent as the value of the underlying common stocks. Because convertible securities may also be interest-rate sensitive, their value may increase as interest rates fall and decrease as interest rates rise. Convertible securities are also subject to credit risk, and are often lower-quality securities.

- **Small and Medium Capitalization Issuers.** Investing in equity securities of small and medium capitalization companies often involves greater risk than is customarily associated with investments in larger capitalization companies. This increased risk may be due to the greater business risks of smaller size, limited markets and financial resources, narrow product lines and frequent lack of depth of management. The securities of smaller companies are often traded in the over-the-counter market and even if listed on a national securities exchange may not be traded in volumes typical for that exchange. Consequently, the securities of smaller companies are less likely to be liquid, may have limited market stability, and may be subject to more abrupt or erratic market movements than securities of larger, more established growth companies or the market averages in general.

Foreign Securities. The Fund may invest in securities of foreign issuers that are denominated or traded in foreign currencies. The Fund may also invest in securities of foreign issuers that are traded or denominated in U.S. dollars (including equity securities of foreign issuers trading in U.S. markets) through American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”), European Depositary Receipts (“EDRs”) or International Depositary Receipts (“IDRs”). ADRs are securities, typically issued by a U.S. financial institution (a “depository”), that evidence ownership interests in a security or pool of securities issued by a foreign issuer and deposited with the depository. ADRs may be listed on a national securities exchange or may trade in the over-the-counter market. ADR prices are denominated in U.S. dollars; the underlying security may be denominated in a foreign currency. GDRs, EDRs and IDRs are securities that represent ownership interests in a security or pool of securities issued by a non-U.S. or U.S. corporation. Depository receipts may be available through “sponsored” or “unsponsored” facilities. A sponsored facility is established jointly by the issuer of the security underlying the receipt and the depository, whereas an unsponsored facility is established by the depository without participation by the issuer of the underlying security. Holders of unsponsored depository receipts generally bear all of the costs of the unsponsored facility. The depository of an unsponsored facility is frequently under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through, to the holders of the receipts, voting rights with respect to the deposited securities. The depository of unsponsored depository receipts may provide less information to receipt holders. Investments in depository receipts do not eliminate the risks in investing in foreign issuers. The underlying security may be subject to foreign government taxes, which would reduce the yield on such securities.

Investments in foreign securities involve higher costs than investments in U.S. securities, including higher transaction costs as well as the imposition of additional taxes by foreign governments. In addition, foreign investments may include additional risks associated with more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; and less economic, political and social stability in the countries in which the Fund invests. Volume and liquidity in most foreign bond markets are less than in the United States and, at times, volatility or price can be greater than in the United States. Future political and economic information, the possible imposition of withholding taxes on interest income, the possible seizure or nationalization of foreign holdings, the possible establishment of exchange controls, or the adoption of other governmental restrictions, might adversely affect the payment of principal and interest on foreign obligations. Inability to dispose of Fund securities due to settlement problems could result either in losses to the Fund due to subsequent declines in value of the securities, or, if the Fund has entered into a contract to sell the securities, could result in possible liability to the purchaser. Individual foreign economies may differ favorably or unfavorably from the U.S. economy in such respects as growth or gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position.

Fixed commissions on foreign securities exchanges are generally higher than negotiated commissions on U.S. exchanges, although the Fund endeavors to achieve the most favorable net results on their portfolio transactions. There is generally less government supervision and regulation of securities exchanges, brokers, dealers and listed companies than in the United States.

Settlement mechanics (e.g., mail service between the United States and foreign countries) may be slower or less reliable than within the United States, thus increasing the risk of delayed settlements of portfolio transactions or loss of certificates for portfolio securities. Foreign markets also have different clearance and settlement procedures, and in certain markets there have been times when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct such transactions. Such delays in settlement could result in temporary periods when a portion of the assets of the Fund is uninvested and no return is earned thereon. The inability of the Fund to make intended security purchases due to settlement problems could cause the Fund to miss attractive investment opportunities.

Although the Fund may invest in securities denominated in foreign currencies, the Fund values its securities and other assets in U.S. dollars. As a result, the NAV of the Fund's shares may fluctuate with U.S. dollar exchange rates as well as the price changes of the Fund's securities in the various local markets and currencies. Thus, an increase in the value of the U.S. dollar compared to the currencies in which the Fund makes its investments could reduce the effect of increases and magnify the effect of decreases in the price of the Fund's securities in their local markets. Conversely, a decrease in the value of the U.S. dollar may have the opposite effect of magnifying the effect of increases and reducing the effect of decreases in the prices of the Fund's securities in its foreign markets. In addition to favorable and unfavorable currency exchange rate developments, the Fund is subject to the possible imposition of exchange control regulations or freezes on convertibility of currency. The Fund may invest in obligations of foreign branches of U.S. banks (Eurodollars) and U.S. branches of foreign banks (Yankee dollars) as well as foreign branches of foreign banks. These investments involve risks that are different from investments in securities of U.S. banks, including potential unfavorable political and economic developments, different tax provisions, seizure of foreign deposits, currency controls, interest limitations or other governmental restrictions which might affect payment of principal or interest. The Fund may also invest in Yankee bonds, which are issued by foreign governments and their agencies and foreign corporations but pay interest in U.S. dollars and are typically issued in the United States.

European countries can be significantly affected by the tight fiscal and monetary controls that the European Economic and Monetary Union ("EMU") imposes for membership. Europe's economies are diverse, its governments are decentralized, and its cultures vary widely. Several European Union ("EU") countries have faced budget issues, some of which may have negative long-term effects for the economies of those countries and other EU countries. There is continued concern about national-level support for the euro and the accompanying coordination of fiscal and wage policy among EMU member countries. Member countries are required to maintain tight control over inflation, public debt, and budget deficit to qualify for membership in the EMU. These requirements can severely limit the ability of EMU member countries to implement monetary policy to address regional economic conditions.

In June 2016, the United Kingdom ("UK") approved a referendum to leave the EU. The withdrawal, known colloquially as "Brexit", was agreed to and ratified by the UK Parliament, and the UK left the EU on January 31, 2020. It began an 11-month transition period in which to negotiate a new trading relationship for goods and services that ended on December 31, 2020. The UK and EU reached an agreement, effective January 1, 2021, on the terms of their future trading relationship, which principally relates to the trading of goods. Further discussions are to be held between the UK and the EU in relation to matters not covered by the trade agreement, such as financial services. Brexit may have significant political and financial consequences for the Eurozone markets, including greater volatility in the global stock markets and illiquidity, fluctuations in currency and exchange rates, and an increased likelihood of a recession in the UK. At this time, the impact of Brexit cannot be predicted. However, market disruption in the EU and globally may have a negative effect on the value of the Fund's investments. Additionally, the risks related to Brexit could be more pronounced if one or more additional EU member states seek to leave the EU.

Forward Foreign Currency Transactions. The Fund may enter into forward foreign currency exchange contracts in order to protect against uncertainty in the level of future foreign currency exchange rates or to seek to increase total return. The Fund will conduct its foreign currency exchange transactions either on a spot (*i.e.*, cash) basis at the spot rate prevailing in the foreign currency exchange market, or through entering into forward contracts to purchase or sell foreign currencies. A forward foreign currency exchange contract involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days (usually less than one year) from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are traded in the interbank market conducted directly between traders (usually large commercial banks) and their customers. A forward contract generally has no deposit requirement, and no commissions are charged at any stage for trades. Although foreign exchange dealers do not charge a fee for conversion, they do realize a profit based on the difference (the spread) between the price at which they are buying and selling various currencies.

The Fund may engage in cross-hedging by using forward contracts in one currency to hedge against fluctuations in the value in securities denominated or quoted in a different currency or to seek to increase total return. Cross-hedging may also include entering into a forward transaction involving two foreign currencies, using one foreign currency as a proxy for the U.S. dollar to hedge against variations in the other foreign currency.

At the consummation of the forward contract, the Fund may terminate its contractual obligation by purchasing an offsetting contract obligating it to purchase at the same maturity date, the same amount of such foreign currency. If the Fund engages in an offsetting transaction, the Fund will realize a gain or a loss to the extent that there has been a change in forward contract prices. Closing purchase transactions with respect to forward contracts are usually effected with the currency trader who is a party to the original forward contract.

The Fund's transactions in forward contracts will be limited to those described above. Of course, the Fund is not required to enter into such transactions with regard to its foreign currency quoted or denominated securities, and the Fund will not do so unless deemed appropriate by the Adviser or Trading Adviser, as applicable.

When the Fund enters into forward contracts the Fund is required to "cover" its position in order to limit leveraging and related risks. To cover its position, the Fund may segregate (and mark-to-market on a daily basis) cash or liquid securities that, when added to any amounts deposited with a futures commission merchant as margin, are equal to the market value of the forward contract or otherwise "cover" its position in a manner consistent with the 1940 Act or the rules and SEC interpretations thereunder. The segregated account functions as a practical limit on the amount of leverage which the Fund may undertake and on the potential increase in the speculative character of the Fund's outstanding portfolio securities. Additionally, such segregated accounts will generally assure the availability of adequate funds to meet the obligations of the Fund arising from such investment activities.

The Fund or the Subsidiaries (as defined below) may enter into agreements with a futures commission merchant (“FCM”) which require the FCM to accept physical settlement for certain financial instruments. If this occurs, the Fund would treat the financial instrument as being cash-settled for purposes of determining the Fund’s coverage requirements.

If the Fund uses forward contracts as a method of protecting the value of the Fund’s portfolio securities against a decline in the value of a currency, this does not eliminate fluctuations in the underlying prices of the securities. It simply establishes a rate of exchange which can be achieved at some future point in time. The precise projection of short-term currency market movements is not possible, and short-term hedging provides a means of fixing the U.S. dollar value of only a portion of the Fund’s foreign assets. It also reduces any potential gain which may have otherwise occurred had the currency value increased above the settlement price of the contract.

While the Fund may enter into forward contracts to seek to reduce currency exchange rate risks or to seek to increase total return, transactions in such contracts involve certain other risks. Thus, while the Fund may benefit from such transactions, unanticipated changes in currency prices may result in a poorer overall performance for the Fund than if it had not engaged in any such transactions. Moreover, there may be imperfect correlation between the Fund’s portfolio holdings or securities quoted or denominated in a particular currency and forward contracts entered into by the Fund. Such imperfect correlation may cause the Fund to sustain losses, which will prevent the Fund from achieving a complete hedge, or expose the Fund to the risk of foreign exchange loss.

Forward contracts are subject to the risks that the counterparty to such contract will default on its obligations. Since a forward foreign currency exchange contract is not guaranteed by an exchange or clearing house, a default on the contract would deprive the Fund of unrealized profits, transaction costs or the benefits of a currency hedge or force the Fund to cover its purchase or sale commitments, if any, at the current market price.

The Fund’s foreign currency transactions (including related options, futures and forward contracts) may be limited by the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”), for qualification as a regulated investment company.

Futures And Options On Futures. Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a specific security at a specified future time and at a specified price. An option on a futures contract gives the purchaser the right, in exchange for a premium, to assume a position in a futures contract at a specified exercise price during the term of the option. The Fund may use futures contracts and related options for: bona fide hedging; attempting to offset changes in the value of securities held or expected to be acquired or be disposed of; attempting to minimize fluctuations in foreign currencies; attempting to gain exposure to a particular market, index or instrument; or other risk management purposes.

The Fund and the Subsidiaries, through which it invests, are subject to regulation by the CFTC as commodity pools and the Adviser is subject to regulation by the CFTC as a commodity pool operator (“CPO”) with respect to the Fund under the Commodity Exchange Act (“CEA”). The Adviser does not currently rely on an exclusion from the definition of CPO in CFTC Rule 4.5 with respect to the Fund.

Transactions in futures and options by the Fund are subject to limitations established by futures and option exchanges governing the maximum number of futures and options that may be written or held by a single investor or group of investors acting in concert, regardless of whether the futures or options were written or purchased on the same or different exchanges or are held in one or more accounts or through one or more different exchanges or through one or more brokers. Thus the number of futures or options which the Fund may write or hold may be affected by futures or options written or held by other entities, including other investment companies advised by the Adviser or a Trading Adviser. An exchange may order the liquidation of positions found to be in violation of those limits and may impose certain other sanctions.

An index futures contract is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to a specified currency amount times the difference between the index value at the close of trading of the contract and the price at which the futures contract is originally struck. No physical delivery of the securities comprising the index is made; generally contracts are closed out prior to the expiration date of the contract.

When the Fund purchases or sells a futures contract, or sells an option thereon, the Fund is required to “cover” its position in order to limit leveraging and related risks. To cover its position, the Fund may segregate (and mark-to-market on a daily basis) cash or liquid securities that, when added to any amounts deposited with a futures commission merchant as margin, are equal to the market value of the futures contract or otherwise “cover” its position in a manner consistent with the 1940 Act or the rules and SEC interpretations thereunder. The segregated account functions as a practical limit on the amount of leverage which the Fund may undertake and on the potential increase in the speculative character of the Fund’s outstanding portfolio securities. Additionally, such segregated accounts will generally assure the availability of adequate funds to meet the obligations of the Fund arising from such investment activities.

The Fund or the Subsidiaries may enter into agreements with a futures commission merchant (“FCM”) which require the FCM to accept physical settlement for certain financial instruments. If this occurs, the Fund would treat the financial instrument as being cash-settled for purposes of determining the Fund’s coverage requirements.

The Fund may also cover its long position in a futures contract by purchasing a put option on the same futures contract with a strike price (i.e., an exercise price) as high or higher than the price of the futures contract. In the alternative, if the strike price of the put is less than the price of the futures contract, the Fund will segregate cash or liquid securities equal in value to the difference between the strike price of the put and the price of the futures contract. The Fund may also cover its long position in a futures contract by taking a short position in the instruments underlying the futures contract, or by taking positions in instruments with prices which are expected to move relatively consistently with the futures contract. The Fund may cover its short position in a futures contract by taking a long position in the instruments underlying the futures contracts, or by taking positions in instruments with prices which are expected to move relatively consistently with the futures contract.

The Fund may cover its sale of a call option on a futures contract by taking a long position in the underlying futures contract at a price less than or equal to the strike price of the call option. In the alternative, if the long position in the underlying futures contract is established at a price greater than the strike price of the written (sold) call, the Fund will maintain in a segregated account cash or liquid securities equal in value to the difference between the strike price of the call and the price of the futures contract. The Fund may also cover its sale of a call option by taking positions in instruments with prices which are expected to move relatively consistently with the call option. The Fund may cover its sale of a put option on a futures contract by taking a short position in the underlying futures contract at a price greater than or equal to the strike price of the put option, or, if the short position in the underlying futures contract is established at a price less than the strike price of the written put, the Fund will maintain in a segregated account cash or liquid securities equal in value to the difference between the strike price of the put and the price of the futures contract. The Fund may also cover its sale of a put option by taking positions in instruments with prices which are expected to move relatively consistently with the put option.

There are significant risks associated with the Fund's use of futures contracts and related options, including the following: (1) the success of a hedging strategy may depend on the Adviser's or Trading Adviser's ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) there may be an imperfect or no correlation between the changes in market value of the securities held by the Fund and the prices of futures and options on futures; (3) there may not be a liquid secondary market for a futures contract or option; (4) trading restrictions or limitations may be imposed by an exchange; and (5) government regulations may restrict trading in futures contracts and options on futures. In addition, some strategies reduce the Fund's exposure to price fluctuations, while others tend to increase its market exposure.

Investing in Emerging Countries, including Asia and Eastern Europe. The Fund may invest in securities of issuers located in emerging countries. The securities markets of emerging countries are less liquid and subject to greater price volatility, and have a smaller market capitalization, than the U.S. securities markets. In certain countries, there may be fewer publicly traded securities and the market may be dominated by a few issues or sectors. Issuers and securities markets in such countries are not subject to as extensive and frequent accounting, financial and other reporting requirements or as comprehensive government regulations as are issuers and securities markets in the U.S. In particular, the assets and profits appearing on the financial statements of emerging country issuers may not reflect their financial position or results of operations in the same manner as financial statements for U.S. issuers. Substantially less information may be publicly available about emerging country issuers than is available about issuers in the United States.

Emerging country securities markets are typically marked by a high concentration of market capitalization and trading volume in a small number of issuers representing a limited number of industries, as well as a high concentration of ownership of such securities by a limited number of investors. The markets for securities in certain emerging countries are in the earliest stages of their development. Even the markets for relatively widely traded securities in emerging countries may not be able to absorb, without price disruptions, a significant increase in trading volume or trades of a size customarily undertaken by institutional investors in the securities markets of developed countries. The limited size of many of these securities markets can cause prices to be erratic for reasons apart from factors that affect the soundness and competitiveness of the securities issuers. For example, prices may be unduly influenced by traders who control large positions in these markets. Additionally, market making and arbitrage activities are generally less extensive in such markets, which may contribute to increased volatility and reduced liquidity of such markets. The limited liquidity of emerging country securities may also affect the Fund's ability to accurately value its portfolio securities or to acquire or dispose of securities at the price and time it wishes to do so or in order to meet redemption requests.

With respect to investments in certain emerging market countries, antiquated legal systems may have an adverse impact on the Fund. For example, while the potential liability of a shareholder in a U.S. corporation with respect to acts of the corporation is generally limited to the amount of the shareholder's investment, the notion of limited liability is less clear in certain emerging market countries. Similarly, the rights of investors in emerging market companies may be more limited than those of shareholders in U.S. corporations, the legal remedies for investors in emerging markets may be more limited than the remedies available in the U.S. and the ability of U.S. authorities (e.g., SEC and the U.S. Department of Justice) to bring actions against bad actors may be limited.

Transaction costs, including brokerage commissions or dealer mark-ups, in emerging countries may be higher than in the United States and other developed securities markets. In addition, existing laws and regulations are often inconsistently applied. As legal systems in emerging countries develop, foreign investors may be adversely affected by new or amended laws and regulations. In circumstances where adequate laws exist, it may not be possible to obtain swift and equitable enforcement of the law.

Foreign investment in the securities markets of certain emerging countries is restricted or controlled to varying degrees. These restrictions may limit the Fund's investment in certain emerging countries and may increase the expenses of the Fund. Certain emerging countries require governmental approval prior to investments by foreign persons or limit investment by foreign persons to only a specified percentage of an issuer's outstanding securities or a specific class of securities which may have less advantageous terms (including price) than securities of the company available for purchase by nationals. In addition, the repatriation of both investment income and capital from emerging countries may be subject to restrictions which require governmental consents or prohibit repatriation entirely for a period of time. Even where there is no outright restriction on repatriation of capital, the mechanics of repatriation may affect certain aspects of the operation of the Fund. The Fund may be required to establish special custodial or other arrangements before investing in certain emerging countries.

Emerging countries may be subject to a substantially greater degree of economic, political and social instability and disruption than is the case in the United States, Japan and most Western European countries. This instability may result from, among other things, the following: (i) authoritarian governments or military involvement in political and economic decision making, including changes or attempted changes in governments through extra-constitutional means; (ii) popular unrest associated with demands for improved political, economic or social conditions; (iii) internal insurgencies; (iv) hostile relations with neighboring countries; (v) ethnic, religious and racial disaffection or conflict; and (vi) the absence of developed legal structures governing foreign private investments and private property. Such economic, political and social instability could disrupt the principal financial markets in which the Fund may invest and adversely affect the value of the Fund's assets. The Fund's investments can also be adversely affected by any increase in taxes or by political, economic or diplomatic developments.

The Fund may seek investment opportunities within former "east bloc" countries in Eastern Europe. Most Eastern European countries had a centrally planned, socialist economy for a substantial period of time. The governments of many Eastern European countries have more recently been implementing reforms directed at political and economic liberalization, including efforts to decentralize the economic decision-making process and move towards a market economy. However, business entities in many Eastern European countries do not have an extended history of operating in a market-oriented economy, and the ultimate impact of Eastern European countries' attempts to move toward more market-oriented economies is currently unclear. In addition, any change in the leadership or policies of Eastern European countries may halt the expansion of or reverse the liberalization of foreign investment policies now occurring and adversely affect existing investment opportunities. As a result of recent events involving Ukraine and the Russian Federation, the United States and the European Union have imposed sanctions on certain Russian individuals and Russian corporations. Additional broader sanctions may be imposed in the future. These sanctions, or even the threat of further sanctions, may result in the decline of the value and liquidity of Russian securities, a weakening of the ruble or other adverse consequences to the Russian economy. These sanctions could also result in the immediate freeze of Russian securities, impairing the ability of the Fund to buy, sell, receive or deliver those securities. Sanctions could also result in Russia taking counter measures or retaliatory actions which may further impair the value and liquidity of Russian and/or Ukrainian securities.

The economies of emerging countries may differ unfavorably from the U.S. economy in such respects as growth of gross domestic product, rate of inflation, capital reinvestment, resources, self-sufficiency and balance of payments. Many emerging countries have experienced in the past, and continue to experience, high rates of inflation. In certain countries inflation has at times accelerated rapidly to hyperinflationary levels, creating a negative interest rate environment and sharply eroding the value of outstanding financial assets in those countries. Other emerging countries, on the other hand, have recently experienced deflationary pressures and are in economic recessions. The economies of many emerging countries are heavily dependent upon international trade and are accordingly affected by protective trade barriers and the economic conditions of their trading partners. In addition, the economies of some emerging countries are vulnerable to weakness in world prices for their commodity exports. The Fund's income and, in some cases, capital gains from foreign stocks and securities will be subject to applicable taxation in certain of the countries in which it invests, and treaties between the U.S. and such countries may not be available in some cases to reduce the otherwise applicable tax rates. Foreign markets also have different clearance and settlement procedures, and in certain markets there have been times when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct such transactions. Such delays in settlement could result in temporary periods when a portion of the assets of the Fund remain uninvested and no return is earned on such assets. The inability of the Fund to make intended security purchases or sales due to settlement problems could result either in losses to the Fund due to subsequent declines in value of the portfolio securities or, if the Fund has entered into a contract to sell the securities, could result in possible liability to the purchaser.

LIBOR Risk. Many financial instruments may be tied to the London Interbank Offered Rate, or “LIBOR,” to determine payment obligations, financing terms, hedging strategies, or investment value. LIBOR is the offered rate for short-term Eurodollar deposits between major international banks. On July 27, 2017, the head of the UK Financial Conduct Authority (“FCA”) announced a desire to phase out the use of LIBOR by the end of 2021. The FCA and ICE Benchmark Administrator have since announced that most LIBOR settings will no longer be published after December 31, 2021 and a majority of U.S. dollar LIBOR settings will cease publication after June 30, 2023. It is possible that a subset of LIBOR settings will be published after these dates on a “synthetic” basis, but any such publications would be considered non-representative of the underlying market. The U.S. Federal Reserve, based on the recommendations of the New York Federal Reserve’s Alternative Reference Rate Committee (comprised of major derivative market participants and their regulators), has begun publishing SOFR that is intended to replace U.S. dollar LIBOR. Proposals for alternative reference rates for other currencies have also been announced or have already begun publication. Markets are slowly developing in response to these new reference rates. Uncertainty related to the liquidity impact of the change in rates, and how to appropriately adjust these rates at the time of transition, poses risks for the Fund. The effect of any changes to, or discontinuation of, LIBOR on the Fund will depend on, among other things, (1) existing fallback or termination provisions in individual contracts and (2) whether, how, and when industry participants develop and adopt new reference rates and fallbacks for both legacy and new instruments and contracts. The expected discontinuation of LIBOR could have a significant impact on the financial markets in general and may also present heightened risk to market participants, including public companies, investment advisers, investment companies, and broker-dealers. The risks associated with this discontinuation and transition will be exacerbated if the work necessary to effect an orderly transition to an alternative reference rate is not completed in a timely manner. For example, current information technology systems may be unable to accommodate new instruments and rates with features that differ from LIBOR. Accordingly, it is difficult to predict the full impact of the transition away from LIBOR on the Fund until new reference rates and fallbacks for both legacy and new instruments and contracts are commercially accepted and market practices become settled.

Multi-Manager Structure. The Fund, ACMAF Master Offshore Limited, a wholly-owned and controlled subsidiary of the Fund organized under the acts of the Cayman Islands (the “Cayman Subsidiary”), ACMAF Offshore SPC, an indirect wholly-owned and controlled segregated portfolio company incorporated under the acts of the Cayman Islands (the “SPC”) and ACMAF Onshore Series LLC, a wholly-owned and controlled Delaware series limited liability company (the “Onshore Subsidiary” and, together with the Cayman Subsidiary and the SPC, the “Subsidiaries”), are managed by the Adviser and one or more asset managers who are unaffiliated with the Adviser (each a “Trading Adviser” and together, the “Trading Advisers”). Subject to review by the Fund’s Board of Directors (the “Board”), the Adviser is responsible for selecting the Fund’s investment strategies and for allocating and reallocating assets among the Trading Advisers consistent with the Fund’s investment objective and strategies. The Adviser may allocate assets of the SPC and the Onshore Subsidiary to multiple managed futures portfolios (the “Segregated Portfolios”). The Adviser is also responsible for recommending to the Board whether an agreement with a Trading Adviser should be approved, renewed, modified or terminated and for monitoring and evaluating the Trading Advisers. The Adviser is also responsible for implementing procedures to ensure that each Trading Adviser complies with the Fund’s investment objective, strategies and restrictions.

Options. The Fund may purchase and write put and call options on indices and enter into related closing transactions. A put option on a security gives the purchaser of the option the right to sell, and the writer of the option the obligation to buy, the underlying security at any time during the option period. A call option on a security gives the purchaser of the option the right to buy, and the writer of the option the obligation to sell, the underlying security at any time during the option period. The premium paid to the writer is the consideration for undertaking the obligations under the option contract.

The Fund may purchase and write put and call options on foreign currencies (traded on U.S. and foreign exchanges or over-the-counter markets) to manage its exposure to exchange rates or to seek and increase in total return. Call options on foreign currency written by the Fund will be “covered” as set out below.

Put and call options on indices are similar to options on securities except that options on an index give the holder the right to receive, upon exercise of the option, an amount of cash if the closing level of the underlying index is greater than (or less than, in the case of puts) the exercise price of the option. This amount of cash is equal to the difference between the closing price of the index and the exercise price of the option, expressed in dollars multiplied by a specified number. Thus, unlike options on individual securities, all settlements are in cash, and gain or loss depends on price movements in the particular market represented by the index generally, rather than the price movements in individual securities.

All options written on indices or securities must be covered. When the Fund writes an option on a security, an index or a foreign currency, the Fund is required to “cover” its position in order to limit leveraging and related risks. To cover its position, the Fund may segregate (and mark-to-market on a daily basis) cash or liquid securities that, when added to any amounts deposited with a futures commission merchant as margin, are equal to the market value of the option or otherwise “cover” its position in a manner consistent with the 1940 Act or the rules and SEC interpretations thereunder. The segregated account functions as a practical limit on the amount of leverage which the Fund may undertake and on the potential increase in the speculative character of the Fund’s outstanding portfolio securities. Additionally, such segregated accounts will generally assure the availability of adequate funds to meet the obligations of the Fund arising from such investment activities.

The Fund or the Subsidiaries may enter into agreements with a futures commission merchant (“FCM”) which require the FCM to accept physical settlement for certain financial instruments. If this occurs, the Fund would treat the financial instrument as being cash-settled for purposes of determining the Fund’s coverage requirements.

The Fund may trade put and call options on securities, securities indices and currencies, as the Adviser or applicable Trading Adviser determines is appropriate in seeking the Fund’s investment objective, and except as restricted by the Fund’s investment limitations. See “Investment Limitations.”

The initial purchase (sale) of an option contract is an “opening transaction.” In order to close out an option position, the Fund may enter into a “closing transaction,” which is simply the sale (purchase) of an option contract on the same security with the same exercise price and expiration date as the option contract originally opened. If the Fund is unable to effect a closing purchase transaction with respect to an option it has written, it will not be able to sell the underlying security until the option expires or the Fund delivers the security upon exercise.

The Fund may purchase put and call options on securities to protect against a decline in the market value of the securities in its portfolio, to anticipate an increase in the market value of securities that the Fund may seek to purchase in the future or to seek to increase total return. The Fund purchasing put and call options pays a premium therefore. If price movements in the underlying securities are such that exercise of the options would not be profitable for the Fund, loss of the premium paid may be offset by an increase in the value of the Fund’s securities or by a decrease in the cost of acquisition of securities by the Fund.

The Fund may write covered call options on securities as a means of increasing the yield on its assets and as a means of providing limited protection against decreases in its market value. When the Fund writes an option, if the underlying securities do not increase or decrease to a price level that would make the exercise of the option profitable to the holder thereof, the option generally will expire without being exercised and the Fund will realize as profit the premium received for such option. When a call option of which the Fund is the writer is exercised, the Fund will be required to sell the underlying securities to the option holder at the strike price, and will not participate in any increase in the price of such securities above the strike price. When a put option of which the Fund is the writer is exercised, the Fund will be required to purchase the underlying securities at a price in excess of the market value of such securities.

The Fund may purchase and write options on an exchange or over-the-counter. Over-the-counter options (“OTC options”) differ from exchange-traded options in several respects. They are transacted directly with dealers and not with a clearing corporation, and therefore entail the risk of non-performance by the dealer. OTC options are available for a greater variety of securities and for a wider range of expiration dates and exercise prices than are available for exchange-traded options. Because OTC options are not traded on an exchange, pricing is done normally by reference to information from a market maker. It is the SEC’s position that OTC options are generally illiquid.

The market value of an option generally reflects the market price of an underlying security. Other principal factors affecting market value include supply and demand, interest rates, the pricing volatility of the underlying security and the time remaining until the expiration date.

Risks associated with options transactions include: (1) the success of a hedging strategy may depend on an ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) there may be an imperfect correlation between the movement in prices of options and the securities underlying them; (3) there may not be a liquid secondary market for options; and (4) while the Fund will receive a premium when it writes covered call options, it may not participate fully in a rise in the market value of the underlying security.

Pandemic Risk. Disease outbreaks that affect local economies or the global economy may materially and adversely impact the Fund and/or the Adviser’s business. For example, uncertainties regarding the novel Coronavirus (“COVID-19”) outbreak have resulted in serious economic disruptions across the globe. These types of outbreaks can be expected to cause severe decreases in core business activities such as manufacturing, purchasing, tourism, business conferences and workplace participation, among others. These disruptions lead to instability in the market place, including stock market losses and overall volatility, as has occurred in connection with COVID-19. In the face of such instability, governments may take extreme and unpredictable measures to combat the spread of disease and mitigate the resulting market disruptions and losses. The Adviser has in place business continuity plans reasonably designed to ensure that it maintains normal business operations, and it periodically tests those plans. However, in the event of a pandemic or an outbreak, there can be no assurance that the Adviser or the Fund’s service providers will be able to maintain normal business operations for an extended period of time or will not lose the services of key personnel on a temporary or long-term basis due to illness or other reasons. Although vaccines for COVID-19 are becoming more widely available, the full impacts of a pandemic or disease outbreaks are unknown and the pace of recovery may vary from market to market, resulting in a high degree of uncertainty for potentially extended periods of time.

Portfolio Turnover Rate. Portfolio turnover rate is defined under SEC rules as the greater of the value of the securities purchased or securities sold, excluding all securities whose maturities at the time of acquisition were one-year or less, divided by the average monthly value of such securities owned during the year. Based on this definition, instruments with remaining maturities of less than one-year are excluded from the calculation of the portfolio turnover rate. Instruments excluded from the calculation of portfolio turnover generally would include the futures contracts in which the Fund may invest since such contracts generally have remaining maturities of less than one-year. The Fund may at times hold investments in other short-term instruments, such as repurchase agreements, which are excluded for purposes of computing portfolio turnover.

Restricted and Illiquid Investments. Pursuant to Rule 22e-4 under the 1940 Act, the Fund may invest up to 15% of its net assets in illiquid investments. An illiquid investment as defined in Rule 22e-4 is an investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions within 7 calendar days or less without the sale or disposition significantly changing the market value of the investment. Illiquid investments include: repurchase agreements and time deposits with a notice or demand period of more than seven days; interest rate; currency and mortgage swaps; interest rate caps; floors and collars; municipal leases; certain restricted securities, such as those purchased in a private placement of securities, unless it is determined, based upon a review of the trading markets for a specific restricted security, that such restricted security is liquid; and certain over-the-counter options. Securities that have legal or contractual restrictions on resale but have a readily available market are not considered illiquid for purposes of this limitation.

Mutual funds do not typically hold a significant amount of restricted or other illiquid investments because of the potential for delays on resale and uncertainty in valuation. Limitations on resale may have an adverse effect on the marketability of portfolio securities and a mutual fund might be unable to dispose of restricted or other illiquid investments promptly or at reasonable prices and might thereby experience difficulty in satisfying redemptions within seven days. A mutual fund might also have to register such restricted securities in order to dispose of them resulting in additional expense and delay. Adverse market conditions could impede such a public offering of securities. To the extent an investment held by the Fund is deemed to be an illiquid investment or a less liquid investment, the Fund will be exposed to greater liquidity risk.

The Fund may purchase securities which are not registered under the Securities Act but which may be sold to “qualified institutional buyers” in accordance with Rule 144A under the Securities Act (“Restricted Securities”). These securities will not be considered illiquid so long as it is determined by the Adviser or applicable Trading Adviser that an adequate trading market exists for the securities. This investment practice could have the effect of increasing the level of illiquidity in an underlying investment company during any period that qualified institutional buyers become uninterested in purchasing restricted securities.

The Adviser or applicable Trading Adviser will monitor the liquidity of Restricted Securities held by the portion of the assets of the Fund it manages. In reaching liquidity decisions, the Adviser or Trading Adviser may consider, among others, the following factors: (1) the unregistered nature of the security; (2) the frequency of trades and quotes for the security; (3) the number of dealers wishing to purchase or sell the security and the number of other potential purchasers; (4) dealer undertakings to make a market in the security; and (5) the nature of the security and the nature of the marketplace trades (e.g., the time needed to dispose of the security, the method of soliciting offers and the mechanics of the transfer).

The purchase price and subsequent valuation of Restricted Securities normally reflect a discount from the price at which such securities trade when they are not restricted, since the restriction makes them less liquid. The amount of the discount from the prevailing market price is expected to vary depending upon the type of security, the character of the issuer, the party who will bear the expenses of registering the Restricted Securities and prevailing supply and demand conditions.

As consistent with the Fund’s investment objectives, the Fund may also invest in Section 4(2) commercial paper. Section 4(2) commercial paper is issued in reliance on an exemption from registration under Section 4(2) of the Act and is generally sold to institutional investors who purchase for investment. Any resale of such commercial paper must be in an exempt transaction, usually to an institutional investor through the issuer or investment dealers who make a market in such commercial paper. The Fund believes that Section 4(2) commercial paper is liquid to the extent it meets the criteria established by the Board. The Fund intends to treat such commercial paper as liquid and not subject to the investment limitations applicable to illiquid investments or restricted securities.

The Company has implemented a liquidity risk management program and related procedures to identify illiquid investments pursuant to Rule 22e-4. If the limitation on illiquid investments is exceeded, other than by a change in market values, the condition will be reported to the Board and, when required by the Liquidity Rule, to the SEC.

Rights Offerings and Purchase Warrants. Rights offerings and purchase warrants are privileges issued by a corporation which enable the owner to subscribe to and purchase a specified number of shares of the corporation at a specified price during a specified period of time. Subscription rights normally have a short lifespan to expiration. The purchase of rights or warrants involves the risk that the Fund could lose the purchase value of a right or warrant if the right to subscribe to additional shares is not executed prior to the right's or warrant's expiration. Also, the purchase of rights and/or warrants involves the risk that the effective price paid for the right and/or warrant added to the subscription price of the related security may exceed the value of the subscribed security's market price such as when there is no movement in the level of the underlying security.

Risk Considerations of Medium Grade Securities. Obligations in the lowest investment grade (*i.e.*, BBB or Baa), referred to as "medium grade" obligations, have speculative characteristics, and changes in economic conditions and other factors are more likely to lead to weakened capacity to make interest payments and repay principal on these obligations than is the case for higher rated securities. In the event that a security purchased by the Fund is subsequently downgraded below investment grade, the Adviser and Trading Advisers will consider such event in its determination of whether the Fund should continue to hold the security.

Short Sales. As consistent with the Fund's investment objectives, the Fund may engage in short sales that are either "uncovered" or "against the box." A short sale is "against the box" if at all times during which the short position is open, the Fund owns at least an equal amount of the securities or securities convertible into, or exchangeable without further consideration for, securities of the same issue as the securities that are sold short. A short sale against the box is generally a taxable transaction to the Fund with respect to the securities that are sold short.

Uncovered short sales are transactions under which the Fund sells a security it does not own. To complete such a transaction, the Fund must borrow the security to make delivery to the buyer. The Fund then is obligated to replace the security borrowed by purchasing the security at the market price at the time of the replacement. The price at such time may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to pay the lender amounts equal to any dividends or interest that accrue during the period of the loan. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The proceeds of the short sale will be retained by the broker, to the extent necessary to meet margin requirements, until the short position is closed out.

Until the Fund closes its short position or replaces the borrowed security, the Fund will: (a) maintain a segregated account containing cash or liquid securities at such a level that (i) the amount deposited in the account plus the amount deposited with the broker as collateral will equal the current value of the security sold short; and (ii) the amount deposited in the segregated account plus the amount deposited with the broker as collateral will not be less than the market value of the security at the time the security was sold short; or (b) otherwise cover the Fund's short position.

Special Note Regarding Market Events. Periods of unusually high financial market volatility and restrictive credit conditions, at times limited to a particular sector or geographic area, have occurred in the past and may be expected to recur in the future. Some countries, including the United States, have adopted or have signaled protectionist trade measures, relaxation of the financial industry regulations that followed the financial crisis, and/or reductions to corporate taxes. The scope of these policy changes is still developing, but the equity and debt markets may react strongly to expectations of change, which could increase volatility, particularly if a resulting policy runs counter to the market's expectations. The outcome of such changes cannot be foreseen at the present time. In addition, geopolitical and other risks, including environmental and public health risks, may add to instability in the world economy and markets generally. As a result of increasingly interconnected global economies and financial markets, the value and liquidity of the Fund's investments may be negatively affected by events impacting a country or region, regardless of whether the Fund invests in issuers located in or with significant exposure to such country or region. Recent events are impacting the securities markets. An outbreak of respiratory disease caused by a novel coronavirus was first detected in December 2019 and has spread internationally. Governmental authorities and regulators throughout the world, such as the U.S. Federal Reserve, have in the past responded to major economic disruptions with changes to fiscal and monetary policy, including but not limited to, direct capital infusions, new monetary programs, and dramatically lower interest rates. Certain of those policy changes are being implemented or considered in response to the coronavirus outbreak. Such policy changes may adversely affect the value, volatility and liquidity of dividend and interest paying securities. In certain cases, an exchange or market may close or issue trading halts on either specific securities or even the entire market, which may result in the Fund being, among other things, unable to buy or sell certain securities or financial instruments or to accurately price its investments. Although multiple asset classes may be affected by a market disruption, the duration and effects may not be the same for all types of assets. To the extent the Fund may overweight its investments in certain countries, companies, industries or market sectors, such position will increase the Fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors. These conditions could result in the Fund's inability to achieve its investment objectives, cause the postponement of reconstitution or rebalance dates for benchmark indices, adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, negatively impact the Fund's performance, and cause losses on your investment in the Fund.

Structured Securities. The Fund may invest in structured securities to the extent consistent with its investment objective. The value of the principal of and/or interest on structured securities is determined by reference to changes in the value of specific currencies, commodities, securities, indices or other financial indicators (the "Reference") or the relative change in two or more References. The interest rate or the principal amount payable upon maturity or redemption may be increased or decreased depending upon changes in the applicable Reference. Examples of structured securities include, but are not limited to, notes where the principal repayment at maturity is determined by the value of the relative change in two or more specified securities or securities indices.

The terms of some structured securities may provide that in certain circumstances no principal is due at maturity and, therefore, the Fund could suffer a total loss of its investment. Structured securities may be positively or negatively indexed, so that appreciation of the Reference may produce an increase or decrease in the interest rate or value of the security at maturity. In addition, changes in the interest rate or the value of the security at maturity may be a multiple of the changes in the value of the Reference. Consequently, structured securities may entail a greater degree of market risk than other types of securities. Structured securities may also be more volatile, less liquid and more difficult to accurately price than less complex securities due to their derivative nature.

Subsidiary Risk. The Fund makes investments through the wholly-owned and controlled Subsidiaries of the Fund: ACMAF Offshore SPC (via the Cayman Subsidiary) and ACMAF Onshore Series LLC Investment in the SPC (via the Cayman Subsidiary) provides the Fund with exposure to the commodity markets within the limitations of Subchapter M of Subtitle A, Chapter 1 of the Internal Revenue Code. The SPC is organized under the acts of the Cayman Islands and the Onshore Subsidiary is a Delaware series limited liability company. The Fund is the direct or indirect sole shareholder of each Subsidiary, and it is not currently expected that shares of the Subsidiaries will be sold or offered to other investors.

The SPC and the Onshore Subsidiary will invest primarily in derivative instruments, such as, commodity futures contracts, non-commodity futures contracts, such as equity index, government bond, fixed income and foreign exchange futures contracts, forward foreign currency exchange contracts, commodity and non-commodity swap agreements. The SPC and the Onshore Subsidiary may also invest in fixed income securities and money market instruments, cash and cash equivalents with two years or less term to maturity, and other investments intended to serve as margin or collateral for the Subsidiary's derivative positions. **All commodities futures and commodities-related investments will be made in the Segregated Portfolios of the SPC.** The Fund's investment in each Subsidiary may vary depending on the types of instruments selected by the Adviser or Trading Advisers to gain exposure to the commodities markets. To the extent that the Fund invests in the Subsidiaries, the Fund may be subject to the risks associated with the abovementioned derivative instruments and other securities, which are discussed elsewhere in the Prospectus and this SAI.

The Fund intends to treat physically settled futures contracts in the same manner as cash settled futures contracts through the use of a swap and/or letter agreement with each Subsidiary's futures commission merchant for the purposes of complying with Section 18 of 1940 Act. The SEC has not declared whether or not the use of such a letter agreement is sufficient for the purpose of compliance with Section 18 of the 1940 Act. There is a risk, therefore, that the SEC may deem the use of the letter agreement as insufficient and that the Fund may not be permitted to continue to gain exposure to these contracts through the use of the letter agreement.

The Fund intends to treat physically settled fx forward transactions in the same manner as cash settled fx forward transactions through the use of a letter agreement (the "Letter") with each Subsidiary's FX Prime Broker ("FXPB") for the purposes of complying with Section 18 of 1940 Act. The Letter provides that the Subsidiary will ensure the liquidation of any deliverable transactions by entering into offsetting FX spot, forward or swap transactions or by rolling forward the net currency positions under such transactions. Failing that, where the transaction is not liquidated prior to the settlement date of such transaction, the FXPB will liquidate the position prior to the settlement date at the applicable prevailing market rate. Therefore, the Letter provides that the Fund and/or the Subsidiary will never be left with an obligation to purchase or deliver the currency underlying the forward transaction.

While the Subsidiaries may be considered similar to an investment company, they are not registered under the 1940 Act and, unless otherwise noted in the Prospectus and this SAI, are not subject to all of the investor protections of the 1940 Act and other U.S. regulations. Changes in the laws or acts of the United States, Delaware and/or the Cayman Islands could result in the inability of the Fund and/or the Subsidiaries to operate as described in the Prospectus and this SAI and could negatively affect the Fund and its shareholders.

Tax Risk. The Fund intends to continue to qualify annually to be treated as a regulated investment company under the Code. To qualify as a regulated investment company under the Code, the Fund must invest in assets which produce the types of income specified in the Code and the Treasury regulations ("Qualifying Income"). Whether the income from certain derivatives, swaps, commodity-linked derivatives and other commodity-related securities, including income from the Fund's investment in its subsidiary, is Qualifying Income is unclear. The Internal Revenue Service ("IRS") has issued a ruling that income realized from certain types of commodity-linked derivatives would not be Qualifying Income. The Fund's investment in the SPC (via the Cayman Subsidiary) is expected to provide the Fund with exposure to the commodities markets within the limitations of the Code for qualification as a regulated investment company, but there is a risk that certain commodity-linked structured notes will not be considered Qualifying Income. If the Fund's income from these types of securities is determined to not be Qualifying Income, it may cause the Fund to fail to qualify as a regulated investment company under the Code. Moreover, an investment in a subsidiary generally may not exceed 25% of the value of the gross assets of the Fund at the end of each quarter of the Fund's taxable year. If the SPC does exceed 25% of the value of the gross assets of the Fund, in any quarter, the Fund may fail to qualify as a regulated investment company under the Code. See "Taxes" below for additional information related to these restrictions.

U.S. Government Securities. The Fund may invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. U.S. Treasury bills have initial maturities of one-year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as Fannie Mae, Freddie Mac, Ginnie Mae, the Small Business Administration, the Federal Farm Credit Administration, the Federal Home Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), the Federal Land Banks, the Federal Intermediate Credit Banks, the Tennessee Valley Authority, the Export-Import Bank of the United States, the Commodity Credit Corporation, the Federal Financing Bank, the Student Loan Marketing Association, the National Credit Union Administration and the Federal Agricultural Mortgage Corporation (Farmer Mac).

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency, while other obligations issued by or guaranteed by federal agencies, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Treasury, while the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. U.S. Treasury notes and bonds typically pay coupon interest semi-annually and repay the principal at maturity.

See "Mortgage-Backed Securities" below for additional information about the September 7, 2008 federal takeover of Fannie Mae and Freddie Mac.

- **U.S. Treasury Obligations.** U.S. Treasury obligations consist of bills, notes and bonds issued by the U.S. Treasury and separately traded interest and principal component parts of such obligations that are transferable through the federal book-entry system known as Separately Traded Registered Interest and Principal Securities ("STRIPS") and Treasury Receipts ("TRs").
- **Receipts.** Interests in separately traded interest and principal component parts of U.S. government obligations that are issued by banks or brokerage firms and are created by depositing U.S. government obligations into a special account at a custodian bank. The custodian holds the interest and principal payments for the benefit of the registered owners of the certificates or receipts. The custodian arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. TRs and STRIPS are interests in accounts sponsored by the U.S. Treasury. Receipts are sold as zero coupon securities.
- **U.S. Government Zero Coupon Securities.** STRIPS and receipts are sold as zero coupon securities, that is, fixed income securities that have been stripped of their unmatured interest coupons. Zero coupon securities are sold at a (usually substantial) discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. The amount of this discount is accreted over the life of the security, and the accretion constitutes the income earned on the security for both accounting and tax purposes. Because of these features, the market prices of zero coupon securities are generally more volatile than the market prices of securities that have similar maturity but that pay interest periodically. Zero coupon securities are likely to respond to a greater degree to interest rate changes than are non-zero coupon securities with similar maturity and credit qualities.
- **U.S. Government Agencies.** Some obligations issued or guaranteed by agencies of the U.S. government are supported by the full faith and credit of the U.S. Treasury, others are supported by the right of the issuer to borrow from the Treasury, while still others are supported only by the credit of the instrumentality. Guarantees of principal by agencies or instrumentalities of the U.S. government may be a guarantee of payment at the maturity of the obligation so that in the event of a default prior to maturity there might not be a market and thus no means of realizing on the obligation prior to maturity. Guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities nor to the value of the Fund's shares.

NON-PRINCIPAL INVESTMENT POLICIES AND RISKS

Exchange-Traded Funds ("ETFs"). The Fund may invest in open-end investment companies whose shares are listed for trading on a national securities exchange or the Nasdaq Market System. ETF shares typically trade like shares of common stock and provide investment results that generally correspond to the price and yield performance of the component stocks of a widely recognized index such as the S&P 500® Index. There can be no assurance, however, that this can be accomplished as it may not be possible for an ETF to replicate the composition and relative weightings of the securities of its corresponding index. Additionally, some ETFs are actively-managed by an investment adviser and/or sub-advisers and do not seek to provide investment results that correspond to an index.

ETFs are subject to risks of an investment in a broadly based portfolio of common stocks, including the risk that the general level of stock prices may decline, thereby adversely affecting the value of such investment. Actively-managed ETFs are subject to risk of poor investment, and the individual investments of an actively-managed ETF may not perform as well as its investment adviser and/or sub-advisers expect, and/or the actively-managed ETFs portfolio management practices do not work to achieve their desired result. Individual shares of an ETF are generally not redeemable at their NAV, but trade on an exchange during the day at prices that are normally close to, but not the same as, their NAV. There is no assurance that an active trading market will be maintained for the shares of an ETF or that market prices of the shares of an ETF will be close to their NAV. The existence of extreme market volatility or potential lack of an active trading market for an ETF's shares could result in such shares trading at a significant premium or discount to their NAV. In addition, the purchase of shares of ETFs may result in duplication of expenses, including advisory fees, in addition to a mutual fund's own expenses.

Investments in securities of ETFs beyond the limitations set forth in Section 12(d)(1)(A) of the 1940 Act are subject to certain terms and conditions set forth in an exemptive order issued by the SEC to the exchange-traded fund. Section 12(d)(1)(A) states that a mutual fund may not acquire shares of other investment companies, such as ETFs, in excess of: 3% of the total outstanding voting stock of the investment company; 5% of its total assets invested in the investment company; or more than 10% of the fund's total assets were to be invested in the aggregate in all investment companies. See "Investment Company Shares" below for additional information.

The Fund may acquire investment company shares received or acquired as dividends, through offers of exchange or as a result of reorganization, consolidation or merger. The purchase of shares of other investment companies may result in duplication of expenses such that investors indirectly bear a proportionate share of the expenses of such mutual funds including operating costs and investment advisory and administrative fees.

Investment Company Shares. The Fund may invest in shares of other investment companies to the extent permitted by applicable law and subject to certain restrictions. These investment companies typically incur fees that are separate from those fees incurred directly by the Fund. The Fund's purchase of such investment company securities results in the layering of expenses, such that shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying the Fund's expenses. Unless an exception is available, Section 12(d)(1)(A) of the 1940 Act prohibits a fund from (i) acquiring more than 3% of the voting shares of any one investment company, (ii) investing more than 5% of its total assets in any one investment company, and (iii) investing more than 10% of its total assets in all investment companies combined, including its ETF investments.

For hedging or other purposes, the Fund may invest in investment companies that seek to track the composition and/or performance of specific indexes or portions of specific indexes. Certain of these investment companies, known as exchange-traded funds, are traded on a securities exchange. The market prices of index-based investments will fluctuate in accordance with changes in the underlying portfolio securities of the investment company and also due to supply and demand of the investment company's shares on the exchange upon which the shares are traded. Index-based investments may not replicate or otherwise match the composition or performance of their specified index due to transaction costs, among other things.

Pursuant to orders issued by the SEC to each of certain ETFs and procedures approved by the Board, the Fund may invest in the ETFs in excess of the limits described above, provided that the Fund has described the ETF investments in its prospectus and otherwise complies with the conditions of the SEC, as it may be amended, and any other applicable investment limitations. Neither the ETFs nor their investment advisers make any representations regarding the advisability of investing in the ETFs.

The SEC recently adopted revisions to the rules permitting funds to invest in other investment companies to streamline and enhance the regulatory framework applicable to fund of funds arrangements. While new Rule 12d1-4 will permit more types of fund of fund arrangements without reliance on an exemptive order or no-action letters, it imposes new conditions, including limits on control and voting of acquired funds' shares, evaluations and findings by investment advisers, fund investment agreements, and limits on most three-tier fund structures. Rule 12d1-4 went into effect on January 19, 2021. The rescission of the applicable exemptive orders and the withdrawal of the applicable no-action letters is effective on January 19, 2022.

Large Shareholder Purchase and Redemption Risk. The Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions may cause the Fund to sell its securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. Similarly, large share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash and is required to maintain a larger cash position than it ordinarily would. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio. However, this risk may be limited to the extent that the Adviser and the Fund have entered into a fee waiver and/or expense reimbursement arrangement.

Mortgage-Backed Securities. The Fund may invest in mortgage pass-through certificates and multiple-class pass-through securities, such as real estate mortgage investment conduits ("REMIC"), pass-through certificates and collateralized mortgage obligations ("CMOs").

Guaranteed mortgage pass-through securities represent participation interests in pools of residential mortgage loans and are issued by U.S. governmental or private lenders and guaranteed by the U.S. government or one of its agencies or instrumentalities, including but not limited to the Government National Mortgage Association ("Ginnie Mae"), the Federal National Mortgage Association ("Fannie Mae"), and the Federal Home Loan Mortgage Corporation ("Freddie Mac"). Ginnie Mae certificates are guaranteed by the full faith and credit of the U.S. government for timely payment of principal and interest on the certificates. Fannie Mae and Freddie Mac certificates are not backed by the full faith and credit of the U.S. government. Fannie Mae certificates are guaranteed by Fannie Mae, a federally chartered and privately owned corporation, for full and timely payment of principal and interest on the certificates. Fannie Mae is authorized to borrow from the U.S. Treasury to meet its obligations. Freddie Mac certificates are guaranteed by Freddie Mac, a corporate instrumentality of the U.S. government, for timely payment of interest and the ultimate collection of all principal of the related mortgage loans.

Fannie Mae and Freddie Mac have been operating under conservatorship, with the Federal Housing Finance Administration ("FHFA") acting as their conservator, since September 2008. The entities are dependent upon the continue support of the U.S. Department of the Treasury and FHFA in order to continue their business operations. These factors, among others, could affect the future status and role of Fannie Mae and Freddie Mac and the values of their securities and the securities which they guarantee.

There is risk that the U.S. government will not provide financial support to its agencies, authorities, instrumentalities or sponsored enterprises. The Fund may purchase U.S. government securities that are not backed by the full faith and credit of the United States, such as those issued by Fannie Mae and Freddie Mac. The maximum potential liability of the issuers of some U.S. government securities held by the Fund may greatly exceed their current resources, including their legal right to support from the U.S. Treasury. It is possible that these issuers will not have the funds to meet their payment obligations in the future.

CMOs and REMIC pass-through or participation certificates may be issued by, among others, U.S. government agencies and instrumentalities as well as private lenders. CMOs and REMIC certificates are issued in multiple classes and the principal of and interest on the mortgage assets may be allocated among the several classes of CMOs or REMIC certificates in various ways. Each class of CMOs or REMIC certificates, often referred to as a “tranche,” is issued at a specific adjustable or fixed interest rate and must be fully retired no later than its final distribution date. Generally, interest is paid or accrues on all classes of CMOs or REMIC certificates on a monthly basis.

Typically, CMOs are collateralized by Ginnie Mae, Fannie Mae or Freddie Mac certificates but also may be collateralized by other mortgage assets such as whole loans or private mortgage pass-through securities. Debt service on CMOs is provided from payments of principal and interest on collateral of mortgaged assets and any reinvestment income thereon.

A REMIC is a CMO that qualifies for special tax treatment under the Code and invests in certain mortgages primarily secured by interests in real property and other permitted investments. Investors may purchase “regular” and “residual” interest shares of beneficial interest in REMIC trusts, although the Fund does not intend to invest in residual interests.

The Fund may invest in mortgage-backed securities issued by trusts or other entities formed or sponsored by private originators of and institutional investors in mortgage loans and other non-governmental entities (or representing custodial arrangements administered by such institutions). These private originators and institutions include savings and loan associations, mortgage bankers, commercial banks, insurance companies, investment banks and special purpose subsidiaries of the foregoing.

Privately issued mortgage-backed securities are generally backed by pools of conventional (*i.e.*, non-government guaranteed or insured) mortgage loans. Since such mortgage-backed securities normally are not guaranteed by an entity having the credit standing of Ginnie Mae, Fannie Mae or Freddie Mac, in order to receive a high quality rating from the rating organizations (*e.g.*, S&P’s or Moody’s), they often are structured with one or more types of “credit enhancement.” Such credit enhancement falls into two categories: (1) liquidity protection and (2) protection against losses resulting after default by a borrower and liquidation of the collateral (*e.g.*, sale of a house after foreclosure). Liquidity protection refers to the payment of cash advances to holders of mortgage-backed securities when a borrower on an underlying mortgage fails to make its monthly payment on time. Protection against losses resulting after default and liquidation is designed to cover losses resulting when, for example, the proceeds of a foreclosure sale are insufficient to cover the outstanding amount on the mortgage. Such protection may be provided through guarantees, insurance policies or letters of credit, through various means of structuring the securities or through a combination of such approaches.

Examples of credit enhancement arising out of the structure of the transaction include “senior-subordinated securities” (multiple class securities with one or more classes entitled to receive payment before other classes, with the result that defaults on the underlying mortgages are borne first by the holders of the subordinated class), creation of “spread accounts” or “reserve funds” (where cash or investments are held in reserve against future losses) and “over-collateralization” (where the scheduled payments on the underlying mortgages in a pool exceed the amount required to be paid on the mortgage-backed securities). The degree of credit enhancement for a particular issue of mortgage-backed securities is based on the level of credit risk associated with the particular mortgages in the related pool. Losses on a pool in excess of anticipated levels could nevertheless result in losses to security holders since credit enhancement rarely covers every dollar owed on a pool.

Investing in mortgage-backed securities (such as those described above) involves certain risks, including the failure of a counter-party to meet its commitments, adverse interest rate changes and the effects of prepayments on mortgage cash flows. Further, the yield characteristics of mortgage-backed securities differ from those of traditional fixed income securities. The major differences typically include more frequent interest and principal payments (usually monthly), the adjustability of interest rates, and the possibility that prepayments of principal may be made substantially earlier than their final distribution dates.

Prepayment rates are influenced by changes in current interest rates and a variety of economic, geographic, social and other factors and cannot be predicted with certainty. Both adjustable rate mortgage loans and fixed rate mortgage loans may be subject to a greater rate of principal prepayments in a declining interest rate environment and to a lesser rate of principal prepayments in an increasing interest rate environment. Under certain interest rate and prepayment rate scenarios, the Fund may fail to recoup fully its investment in mortgage-backed securities notwithstanding any direct or indirect governmental or agency guarantee. When the Fund reinvests amounts representing payments and unscheduled prepayments of principal, it may receive a rate of interest that is lower than the rate on existing adjustable rate mortgage pass-through securities. Thus, mortgage-backed securities, and adjustable rate mortgage pass-through securities in particular, may be less effective than other types of U.S. government securities as a means of “locking in” interest rates.

Conversely, in a rising interest rate environment, a declining prepayment rate will extend the average life of many mortgage-backed securities. This possibility is often referred to as extension risk. Extending the average life of a mortgage-backed security increases the risk of depreciation due to future increases in market interest rates. The market for certain types of mortgage-backed securities (*i.e.*, certain CMOs) may not be liquid under all interest rate scenarios, which may prevent the Fund from selling such securities held in its portfolio at times or prices that it desires.

Different types of derivative debt securities are subject to different combinations of prepayment, extension and/or interest rate risk. Conventional mortgage pass-through securities and sequential pay CMOs are subject to all of these risks, but are typically not leveraged. Thus, the magnitude of exposure may be less than for more leveraged mortgage-backed securities.

Planned amortization class (“PAC”) and target amortization class (“TAC”) CMO bonds involve less exposure to prepayment, extension and interest rate risk than other mortgage-backed securities, provided that prepayment rates remain within expected prepayment ranges or “collars.” To the extent that prepayment rates remain within these prepayment ranges, the residual or support tranches of PAC and TAC CMOs assume the extra prepayment extension and interest rate risk associated with the underlying mortgage assets.

The Fund may invest in floating rate securities based on the Cost of Funds Index (“COFI floaters”), other “lagging rate” floating rate securities, floating rate securities that are subject to a maximum interest rate (“capped floaters”), and mortgage-backed securities purchased at a discount. The primary risks associated with these derivative debt securities are the potential extension of average life and/or depreciation due to rising interest rates.

Recently, rating agencies have placed on credit watch or downgraded the ratings previously assigned to a large number of mortgage-related securities (which may include certain of the mortgage-related securities in which the Fund may have invested or may in the future be invested), and may continue to do so in the future. In the event that any mortgage-related security held by the Fund is placed on credit watch or downgraded, the value of such mortgage-related security may decline and the Fund may consequently experience losses in respect of such mortgage-related security.

Real Estate Investment Trust Securities. The Fund may invest in real estate investment trusts (“REITs”). REITs generally invest directly in real estate, in mortgages or in some combination of the two. Individual REITs may own a limited number of properties and may concentrate in a particular region or property type. A REIT is a corporation, or a business trust that would otherwise be taxed as a corporation, which meets the definitional requirements of the Code. The Code permits a qualifying REIT to deduct dividends paid, thereby effectively eliminating corporate level Federal income tax and making the REIT a pass-through vehicle for Federal income tax purposes. To meet the definitional requirements of the Code, a REIT must, among other things, invest substantially all of its assets in interests in real estate (including mortgages and other REITs) or cash and government securities, derive most of its income from rents from real property or interest on loans secured by mortgages on real property, and distribute to shareholders annually a substantial portion of its otherwise taxable income.

Generally, REITs can be classified as equity REITs, mortgage REITs and hybrid REITs. Equity REITs invest the majority of their assets directly in real property and derive their income primarily from rents and capital gains from appreciation realized through property sales. Mortgage REITs invest the majority of their assets in real estate mortgages and derive their income primarily from interest payments. Hybrid REITs combine the characteristics of both equity and mortgage REITs. The values of securities issued by REITs are affected by tax and regulatory requirements and by perceptions of management skill. They also are subject to heavy cash flow dependency, defaults by borrowers or tenants, self-liquidation and the possibility of failing to qualify for tax-free status under the Code or to maintain exemption from the 1940 Act. Unexpected high rates of default on the mortgages held by a mortgage pool may adversely affect the value of a mortgage-backed security and could result in losses to a mortgage REIT. The risk of such defaults is generally higher in the case of mortgage pools that include subprime mortgages. To the extent that a mortgage REIT’s portfolio is exposed to lower-rated, unsecured or subordinated instruments, the risk of loss may increase, which may have a negative impact on the Fund.

The REITs in which the Fund may invest may be affected by economic forces and other factors related to the real estate industry. REITs are sensitive to factors such as changes in real estate values, property taxes, interest rates, cash flow of underlying real estate assets, occupancy rates, government regulations affecting zoning, land use and rents, and management skill and creditworthiness of the issuer. Companies in the real estate industry may also be subject to liabilities under environmental and hazardous waste laws. REITs whose underlying assets include long-term health care properties; such as nursing, retirement and assisted living homes, may be impacted by federal regulations concerning the health care industry. The Fund will indirectly bear its proportionate share of expenses, including management fees, paid by each REIT in which it invests in addition to the expenses of the Fund. The Fund is also subject to the risk that the REITs in which it invests will fail to qualify for tax-free pass-through of income under the Code, and/or fail to qualify for an exemption from registration as an investment company under the 1940 Act. Mortgage REITs may be affected by the quality of the credit extended. A REIT’s return may be adversely affected when interest rates are high or rising.

Investing in REITs may involve risks similar to those associated with investing in small capitalization companies. REITs may have limited financial resources, may trade less frequently and in a limited volume and may be subject to more abrupt or erratic price movements than larger company securities. Historically, small capitalization stocks, such as REITs, have been more volatile in price than the larger capitalization stocks included in the S&P 500[®].

Risk Considerations of Lower Rated Securities. The Fund may invest in fixed income securities that are not investment grade but are rated as low as B by Moody’s or B by S&P (or their equivalents or, if unrated, determined by the Adviser or applicable Trading Adviser to be of comparable credit quality). In the case of a security that is rated differently by two or more rating services, the higher rating is used in connection with the foregoing limitation. In the event that the rating on a security held in the Fund’s portfolio is downgraded by a rating service, such action will be considered by the Adviser or applicable Trading Adviser in its evaluation of the overall investment merits of that security, but will not necessarily result in the sale of the security. The widespread expansion of government, consumer and corporate debt within the U.S. economy has made the corporate sector, especially cyclically sensitive industries, more vulnerable to economic downturns or increased interest rates. An economic downturn could severely disrupt the market for high yield fixed income securities and adversely affect the value of outstanding fixed income securities and the ability of the issuers to repay principal and interest.

The Fund may invest in high yield debt obligations, such as bonds and debentures, issued by corporations and other business organizations. The Fund may invest in high yield debt instruments when the Fund believes that such instruments offer a better risk/reward profile than comparable equity opportunities. High yield fixed income securities (commonly known as “junk bonds”) are considered speculative investments while generally providing greater income than investments in higher rated securities, involve greater risk of loss of principal and income (including the possibility of default or bankruptcy of the issuers of such securities) and may involve greater volatility of price (especially during periods of economic uncertainty or change) than securities in the higher rating categories. Since yields vary over time, no specific level of income can ever be assured.

The prices of high yield fixed income securities have been found to be less sensitive to interest rate changes than higher-rated investments but more sensitive to adverse economic changes or individual corporate developments. Also, during an economic downturn or substantial period of rising interest rates, highly leveraged issuers may experience financial stress, which would adversely affect their ability to service their principal and interest payment obligations, to meet projected business goals and to obtain additional financing. If the issuer of a fixed income security owned by the Fund defaulted, the Fund could incur additional expenses in attempting to obtain a recovery. In addition, periods of economic uncertainty and changes can be expected to result in increased volatility of market prices of high yield fixed income securities and the Fund’s NAV to the extent it holds such securities.

High yield fixed income securities also present risks based on payment expectations. For example, high yield fixed income securities may contain redemption or call provisions. If an issuer exercises these provisions in a declining interest rate market, the Fund may, to the extent it holds such fixed income securities, have to replace the securities with a lower yielding security, which may result in a decreased return for investors. Conversely, a high yield fixed income security’s value will decrease in a rising interest rate market, as will the value of the Fund’s assets, to the extent it holds such fixed income securities. In addition, to the extent that there is no established retail secondary market, there may be thin trading of high yield fixed income securities, and this may have an impact on the Adviser’s and Trading Advisers’ ability to accurately value such securities and the Fund’s assets and on the Fund’s ability to dispose of such securities. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may decrease the values and liquidity of high yield fixed income securities, especially in a thinly traded market.

New laws proposed or adopted from time to time may have an impact on the market for high yield securities.

Finally, there are risks involved in applying credit or dividend ratings as a method for evaluating high yield securities. For example, ratings evaluate the safety of principal and interest or dividend payments, not market value risk of high yield securities. Also, since rating agencies may fail to timely change the credit ratings to reflect subsequent events, the Fund will continuously monitor the issuers of high yield securities in its portfolio, if any, to determine if the issuers will have sufficient cash flow and profits to meet required principal and interest payments, and to assure the security’s liquidity so the Fund can meet redemption requests.

Securities Lending. The Fund may lend portfolio securities to brokers, dealers and other financial organizations that meet capital and other credit requirements or other criteria established by the Board. These loans, if and when made, may not exceed 33 1/3% of the total asset value of the Fund (including the loan collateral). The Fund will not lend portfolio securities to the Adviser or their affiliates unless permissible under the 1940 Act and the rules and promulgations thereunder. Loans of portfolio securities will be fully collateralized by cash, letters of credit or U.S. government securities, and the collateral will be maintained in an amount equal to at least 102% of the current market value of the loaned domestic securities (105% of loaned foreign securities) by marking to market daily. Any gain or loss in the market price of the securities loaned that might occur during the term of the loan would be for the account of the Fund.

The Fund may pay a part of the interest earned from the investment of collateral, or other fee, to an unaffiliated or, to the extent consistent with the 1940 Act or the rules and SEC interpretations thereunder, affiliated third party for acting as the Fund's securities lending agent.

By lending its securities, the Fund may increase its income by receiving payments from the borrower that reflect the amount of any interest or any dividends payable on the loaned securities as well as by either investing cash collateral received from the borrower in short-term instruments or obtaining a fee from the borrower when U.S. government securities or letters of credit are used as collateral. The Fund does not have the right to vote loaned securities. The Fund will attempt to call all loaned securities back to permit the exercise of voting rights on material matters, if time and jurisdictional restrictions permit. There is no guarantee that all loans can be recalled.

Securities of Unseasoned Issuers. The Fund may invest in securities of unseasoned issuers, including equity securities of unseasoned issuers which are not readily marketable, to the extent consistent with the Fund's primary investment strategies as set forth in the Prospectuses and with each Fund's policy on investments in illiquid investments.

Special Situation Companies. The Fund may invest in "Special Situations." The term "Special Situation" shall be deemed to refer to a security of a company in which an unusual and possibly non-repetitive development is taking place which, in the opinion of the investment adviser of the Fund, may cause the security to attain a higher market value independently, to a degree, of the trend in the securities market in general. The particular development (actual or prospective), which may qualify a security as a "Special Situation," may be one of many different types.

Such developments may include, among others, a technological improvement or important discovery or acquisition which, if the expectation for it materialized, would effect a substantial change in the company's business; a reorganization; a recapitalization or other development involving a security exchange or conversion; a merger, liquidation or distribution of cash, securities or other assets; a breakup or workout of a holding company; litigation which, if resolved favorably, would improve the value of the company's stock; a new or changed management; or material changes in management policies. A "Special Situation" may often involve a comparatively small company, which is not well known, and which has not been closely watched by investors generally, but it may also involve a large company. The fact, if it exists, that an increase in the company's earnings, dividends or business is expected, or that a given security is considered to be undervalued, would not in itself be sufficient to qualify as a "Special Situation." The Fund may invest in securities (even if not "Special Situations") which, in the opinion of the investment adviser of the Fund, are appropriate investments for the Fund, including securities which the investment adviser of the Fund believes are undervalued by the market. The Fund shall not be required to invest any minimum percentage of its aggregate portfolio in "Special Situations," nor shall it be required to invest any minimum percentage of its aggregate portfolio in securities other than "Special Situations."

Temporary Defensive Positions. In anticipation of or in response to adverse market, economic, political or other conditions, the Fund may take temporary defensive positions (up to 100% of its assets) in cash, cash equivalents and short-term U.S. government securities. If the Fund were to take a temporary defensive position, it may be to achieve its investment objective for a period of time.

INVESTMENT LIMITATIONS

The Fund has adopted the following fundamental investment limitations which may not be changed with respect to the Fund without the affirmative vote of the holders of a majority of the Fund's outstanding shares (as defined in Section 2(a) (42) of the 1940 Act). As used in this SAI and in the Prospectus, "shareholder approval" and a "majority of the outstanding shares" of the Fund means, with respect to the approval of an investment advisory agreement, a distribution plan or a change in a fundamental investment limitation, the lesser of (1) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of the outstanding shares of the Fund are present in person or by proxy, or (2) more than 50% of the outstanding shares of the Fund. Unless otherwise noted, the Fund's investment goals and strategies described in the Prospectus may be changed by the Board without the approval of the Fund's shareholders.

The Fund may not:

1. Borrow money or issue senior securities, except that the Fund may borrow from banks and enter into reverse repurchase agreements provided that there is at least 300% asset coverage for the borrowings of the Fund. The Fund may not mortgage, pledge or hypothecate any assets, except in connection with any such borrowing and then in amounts not in excess of one-third of the value of the Fund's total assets at the time of such borrowing. However, the amount shall not be in excess of lesser of the dollar amounts borrowed or 33 1/3% of the value of the Fund's total assets at the time of such borrowing, provided that: (a) short sales and related borrowings of securities are not subject to this restriction; and (b) for the purposes of this restriction, collateral arrangements with respect to options, short sales, futures contracts, options on futures contracts, collateral arrangements with respect to initial and variation margin and collateral arrangements with respect to derivatives instruments are not deemed to be a pledge or other encumbrance of assets. Securities held in escrow or separate accounts in connection with the Fund's investment practices are not considered to be borrowings or deemed to be pledged for purposes of this limitation;
2. Act as an underwriter of securities within the meaning of the 1933 Act, except insofar as it might be deemed to be an underwriter upon disposition of certain portfolio securities acquired within the limitation on purchases of restricted securities;
3. Purchase or sell real estate (including real estate limited partnership interests), provided that the Fund may invest: (a) in securities secured by real estate or interests therein or issued by companies that invest in real estate or interests therein; or (b) in real estate investment trusts;
4. Purchase or sell commodities, except as permitted by the 1940 Act, as amended, and as interpreted or modified by the regulatory authority having jurisdiction from time to time;
5. Make loans, except through loans of portfolio securities and repurchase agreements, provided that for purposes of this restriction the acquisition of bonds, debentures or other debt instruments or interests therein and investment in government obligations, loan participations and assignments, short-term commercial paper, certificates of deposit and bankers' acceptances shall not be deemed to be the making of a loan; or

- Invest 25% or more of its total assets, taken at market value at the time of each investment, in the securities of one or more issuers conducting their principal business activities in the same industry or group of industries, provided that (a) there is no limitation with respect to (i) instruments issued or guaranteed by the United States, any state, territory or possession of the United States, the District of Columbia or any of their authorities, agencies, instrumentalities or political subdivisions, and (ii) repurchase agreements secured by the instruments described in clause (i); (b) wholly-owned finance companies will be considered to be in the industries of their parents if their activities are primarily related to financing the activities of the parents; and (c) utilities will be divided according to their services, for example, gas, gas transmission, electric and gas, electric and telephone will each be considered a separate industry.

In addition to the fundamental investment limitations specified above, the Fund is subject to the following non-fundamental limitations, which may be changed without shareholder approval, in compliance with applicable law and regulatory policy. The Fund may not:

- Make investments for the purpose of exercising control or management, but investments by the Fund in wholly-owned investment entities created under the laws of certain countries will not be deemed the making of investments for the purpose of exercising control or management; or
- Purchase securities on margin, except that the Fund may use margin to the extent necessary to engage in short sales and may obtain such short-term credits as are necessary for the clearance of portfolio transactions; and provided that margin deposits in connection with options, futures contracts, options on futures contracts or other derivative instruments, including foreign exchange forward contracts, shall not constitute purchasing securities on margin.

The Fund may invest in securities issued by other investment companies within the limits prescribed by the 1940 Act. Pursuant to orders issued by the SEC to ETFs and procedures approved by the Board, the Fund may invest in ETFs in excess of the limits of the 1940 Act. As a shareholder of another investment company, the Fund would bear, along with other shareholders, its pro rata portion of the other investment company's expenses, including advisory fees. These expenses would be in addition to the advisory and other expenses that the Fund bears directly in connection with its own operations.

Securities held by the Fund generally may not be purchased from, sold or loaned to the Adviser, any Trading Adviser or their affiliates or any of their directors, officers or employees, acting as principal, unless pursuant to a rule or exemptive order under the 1940 Act. None of the Fund, the Adviser, or any Trading Adviser has obtained such an exemptive order as of the date of this SAI.

Under the 1940 Act, the Fund will be required to maintain asset coverage of at least 300% for borrowings from a bank. In the event that such asset coverage is below 300%, the Fund will be required to reduce the amount of its borrowings to obtain 300% asset coverage within three business days (not including Sundays and holidays).

The 1940 Act does not directly restrict an investment company's ability to invest in commodities, but does require that every investment company have a fundamental investment policy governing such investments. The Fund has adopted fundamental policies that would permit direct investment in commodities.

Any collateral arrangements with respect to, if applicable, the writing of options and futures contracts, options on futures contracts, short sales and other similar instruments, and collateral arrangements with respect to initial and variation margin are not deemed to be a pledge of assets. The Fund may pledge, mortgage or hypothecate assets to secure borrowings permitted by the Fund's fundamental limitation on borrowing.

Senior securities may include any obligation or instrument issued by a fund evidencing indebtedness. The 1940 Act generally prohibits funds from issuing senior securities, although it does not treat certain transactions as senior securities, such as certain borrowings, short sales, reverse repurchase agreements, firm commitment agreements and standby commitments, with appropriate earmarking or segregation of assets to cover such obligation.

If a percentage restriction under one of the Fund's investment policies or limitations or the use of assets is adhered to at the time a transaction is effected, later changes in percentages resulting from changing values will not be considered a violation (except with respect to any restrictions that may apply to borrowings or senior securities issued by the Fund).

DISCLOSURE OF PORTFOLIO HOLDINGS

The Company has adopted, on behalf of the Fund, a policy relating to the selective disclosure of the Fund's portfolio holdings by the Adviser, Board, officers, or third party service providers, in accordance with regulations that seek to ensure that disclosure of information about portfolio holdings is in the best interest of Fund shareholders. The policies relating to the disclosure of the Fund's portfolio holdings are designed to allow disclosure of portfolio holdings information where necessary to the Fund's operation without compromising the integrity or performance of the Fund. It is the policy of the Company that disclosure of the Fund's portfolio holdings to a select person or persons prior to the release of such holdings to the public ("selective disclosure") is prohibited, unless there are legitimate business purposes for selective disclosure.

The Company discloses portfolio holdings information as required in regulatory filings and shareholder reports, discloses portfolio holdings information as required by federal and state securities laws and may disclose portfolio holdings information in response to requests by governmental authorities. As required by the federal securities laws, including the 1940 Act, the Company will disclose the Fund's portfolio holdings in applicable regulatory filings, including shareholder reports, reports on Form N-CSR, Form N-CEN, and Form N-PORT or such other filings, reports or disclosure documents as the applicable regulatory authorities may require.

Generally, after the 30th business day of the month following each calendar quarter end, the Fund may provide, at the Adviser's discretion, its portfolio holdings to various rating and ranking organizations. In addition, generally after the 30th business day of the month following each calendar quarter end, the Fund may post to its website a list of the Fund's top ten holdings or full portfolio holdings at the discretion of the Adviser. The timing, frequency and type (i.e., ratings/rankings/holdings) of disclosure may change at the Adviser's discretion, as well as whether to post to the Fund's website.

The Company may distribute or authorize the distribution of information about the Fund's portfolio holdings that is not publicly available to its third-party service providers, which include U.S. Bank, N.A., the custodian; U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services ("Fund Services"), the administrator, accounting agent and transfer agent; Ernst & Young LLP, the Fund's independent registered public accounting firm; Faegre Drinker Biddle & Reath LLP, legal counsel; FilePoint, the financial printer; the Fund's proxy voting service(s); and the Company's liquidity classification agent. These service providers are required to keep such information confidential, and are prohibited from trading based on the information or otherwise using the information except as necessary in providing services to the Fund. Such holdings are released on conditions of confidentiality, which include appropriate trading prohibitions. "Conditions of confidentiality" include confidentiality terms included in written agreements, implied by the nature of the relationship (e.g. attorney-client relationship), or required by fiduciary or regulatory principles (e.g., custody services provided by financial institutions). Portfolio holdings may also be provided earlier to shareholders and their agents who receive redemptions in kind that reflect a pro rata allocation of all securities held in the Fund's portfolio.

Portfolio holdings may also be disclosed, upon authorization by a designated officer of the Adviser, to (i) certain independent reporting agencies recognized by the SEC as acceptable agencies for the reporting of industry statistical information and (ii) financial consultants to assist them in determining the suitability of the Fund as an investment for their clients, in each case in accordance with the anti-fraud provisions of the federal securities laws and the Company's and the Adviser's fiduciary duties to Fund shareholders. Disclosures to financial consultants are also subject to a confidentiality agreement and/or trading restrictions. The foregoing disclosures are made pursuant to the Company's policy on selective disclosure of portfolio holdings. The Board or a committee thereof may, in limited circumstances, permit other selective disclosure of portfolio holdings subject to a confidentiality agreement and/or trading restrictions.

The Adviser reserves the right to refuse to fulfill any request for portfolio holdings information from a shareholder or non-shareholder if it believes that providing such information will be contrary to the best interests of the Fund.

The Board provides ongoing oversight of the Company's policies and procedures and compliance with such policies and procedures. As part of this oversight function, the Board receives from the Company's Chief Compliance Officer ("CCO") as necessary, reports on compliance with these policies and procedures. In addition, the Board receives an annual assessment of the adequacy and effectiveness of the policies and procedures with respect to the Fund, and any changes thereto, and an annual review of the operation of the policies and procedures. Any violation of the policy set forth above as well as any corrective action undertaken to address such violation must be reported by the Adviser, director, officer or third party service provider to the Company's CCO, who will determine whether the violation should be reported immediately to the Board or at its next quarterly Board meeting.

PORTFOLIO TURNOVER

Portfolio turnover measures the percentage of the Fund's total portfolio market value that was purchased or sold during the period. The Fund's turnover rate provides an indication of how transaction costs (which are not included in the Fund's expenses) may affect the Fund's performance. Also, funds with a high turnover may be more likely to distribute capital gains that may be taxable to shareholders. The Fund's portfolio turnover rate is calculated by the value of the investment securities purchased or sold, excluding all instruments whose maturities at the time of acquisition were one year or less, divided by the average monthly value of such securities owned during the year. Based on this calculation, instruments, including options and futures contracts, with remaining maturities of less than one year are excluded from the portfolio turnover rate. If such instruments were included, the Fund's portfolio turnover rate would be higher.

The Fund's portfolio turnover rates for the two most recent fiscal years are stated below. Portfolio turnover rates could change significantly in response to turbulent market conditions.

Portfolio Turnover

Fiscal Year Ended August 31, 2021	Fiscal Year Ended August 31, 2020

MANAGEMENT OF THE COMPANY

The business and affairs of the Company are managed under the oversight of the Board, subject to the laws of the State of Maryland and the Company's Charter. The Directors are responsible for deciding matters of overall policy and overseeing the actions of the Company's service providers. The officers of the Company conduct and supervise the Company's daily business operations.

Directors who are not deemed to be "interested persons" of the Company (as defined in the 1940 Act) are referred to as "Independent Directors." Directors who are deemed to be "interested persons" of the Company are referred to as "Interested Directors." The Board is currently composed of seven Independent Directors and one Interested Director. The Board has selected Arnold M. Reichman, an Independent Director, to act as Chairman. Mr. Reichman's duties include presiding at meetings of the Board and interfacing with management to address significant issues that may arise between regularly scheduled Board and Committee meetings. In the performance of his duties, Mr. Reichman will consult with the other Independent Directors and the Company's officers and legal counsel, as appropriate. The Chairman may perform other functions as requested by the Board from time to time.

The Board meets as often as necessary to discharge its responsibilities. Currently, the Board conducts regular, in-person meetings at least four times a year, and holds special in-person or telephonic meetings as necessary to address specific issues that require attention prior to the next regularly scheduled meeting. The Board also relies on professionals, such as the Company's independent registered public accounting firms and legal counsel, to assist the Directors in performing their oversight responsibilities.

The Board has established seven standing committees — Audit, Contract, Executive, Nominating and Governance, Product Development, Regulatory Oversight, and Valuation Committees. The Board may establish other committees, or nominate one or more Directors to examine particular issues related to the Board's oversight responsibilities, from time to time. Each Committee meets periodically to perform its delegated oversight functions and reports its findings and recommendations to the Board. For more information on the Committees, see the section entitled "Standing Committees."

The Board has determined that the Company's leadership structure is appropriate because it allows the Board to effectively perform its oversight responsibilities.

Directors and Executive Officers

The Directors and executive officers of the Company, their ages, business addresses and principal occupations during the past five years are set forth below.

Name, Address, and Age	Position(s) Held with Company	Term of Office and Length of Time Served ¹	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Director*	Other Directorships Held by Director
INDEPENDENT DIRECTORS					
Julian A. Brodsky 615 East Michigan Street Milwaukee, WI 53202 Age: 88	Director	1988 to present	From 1969 to 2011, Director and Vice Chairman, Comcast Corporation (cable television and communications).	48	AMDOCS Limited (service provider to telecommunications companies).
Gregory P. Chandler 615 East Michigan Street Milwaukee, WI 53202 Age: 55	Director	2012 to present	Since 2020, Chief Financial Officer, Herspiegel Consulting LLC (life sciences consulting services); 2020, Chief Financial Officer, Avocado Systems Inc. (cyber security software provider); 2009-2020, Chief Financial Officer, Emtec, Inc. (information technology consulting/services).	48	FS Energy and Power Fund (business development company); Wilmington Funds (12 portfolios) (registered investment company).
Lisa A. Dolly 615 East Michigan Street, Milwaukee, WI, 53202 Age: 55	Director	October 2021 to present	From July 2019-December 2019, Chairman, Pershing LLC (broker dealer, clearing and custody firm); January 2016-June 2019, Chief Executive Officer, Pershing, LLC.	48	Allfunds Group PLC (United Kingdom wealthtech and fund distribution provider); Securities Industry and Financial Markets Association (trade association for broker dealers, investment banks and asset managers); Hightower Advisors (wealth management firm).

Jillian L. Bosmann One Logan Square Suite 2000 Philadelphia, PA 19103 Age: 42	Assistant Secretary	2017 to present	Since 2017, Partner, Faegre Drinker Biddle & Reath LLP (law firm).	N/A	N/A

* Each Director oversees 48 portfolios of the fund complex, consisting of the series in the Company and Penn Capital Funds Trust (7 portfolios).

1. Subject to the Company's Retirement Policy, each Director may continue to serve as a Director until the last day of the calendar year in which the applicable Director attains age 75 or until his or her successor is elected and qualified or his or her death, resignation or removal. The Board reserves the right to waive the requirements of the Policy with respect to an individual Director. The Board has approved waivers of the policy with respect to Messrs. Brodsky, Giordano, Sablowsky and Straniere. Each officer holds office at the pleasure of the Board until the next special meeting of the Company or until his or her successor is duly elected and qualified, or until he or she dies, resigns or is removed.
2. Mr. Sablowsky is considered an "interested person" of the Company as that term is defined in the 1940 Act and is referred to as an "Interested Director." Mr. Sablowsky is considered an "Interested Director" of the Company by virtue of his position as a senior officer of Oppenheimer & Co., Inc., a registered broker-dealer.

Director Experience, Qualifications, Attributes and/or Skills

The information above includes each Director's principal occupations during the last five years. Each Director possesses extensive additional experience, skills and attributes relevant to his qualifications to serve as a Director. The cumulative background of each Director led to the conclusion that each Director should serve as a Director of the Company. Mr. Brodsky has over 40 years of senior executive-level management experience in the cable television and communications industry. Mr. Chandler has demonstrated leadership and management abilities as evidenced by his senior executive level positions in the investment technology consulting/services and investment banking/brokerage industries, and also serves on various boards. Ms. Dolly has over three decades of experience in the financial services industry, and she has demonstrated her leadership and management abilities by serving in numerous senior executive-level positions. Mr. Giordano has years of experience as a consultant to financial services organizations and also serves on the boards of other registered investment companies. Mr. Reichman brings decades of investment management experience to the Board, in addition to senior executive-level management experience. Mr. Sablowsky has demonstrated leadership and management abilities as evidenced by his senior executive-level positions in the financial services industry. Mr. Shea has demonstrated leadership and management abilities as evidenced by his senior executive-level positions in the brokerage, clearing, and investment services industry, including service on the boards of industry regulatory organizations and a university. Mr. Straniere has been a practicing attorney for over 30 years and has served on the boards of an asset management company and another registered investment company.

Standing Committees

The responsibilities of each Committee of the Board and its members are described below.

Audit Committee. The Board has an Audit Committee comprised of three Independent Directors. The current members of the Audit Committee are Messrs. Brodsky, Chandler and Giordano. The Audit Committee, among other things, reviews results of the annual audit and approves the firm(s) to serve as independent auditors. The Audit Committee convened six times during the fiscal year ended August 31, 2021.

Contract Committee. The Board has a Contract Committee comprised of the Interested Director and four Independent Directors. The current members of the Contract Committee are Ms. Dolly and Messrs. Brodsky, Chandler, Sablowsky and Straniere. The Contract Committee reviews and makes recommendations to the Board regarding the approval and continuation of agreements and plans of the Company. The Contract Committee convened six times during the fiscal year ended August 31, 2021.

Executive Committee. The Board has an Executive Committee comprised of the Interested Director and three Independent Directors. The current members of the Executive Committee are Messrs. Chandler, Giordano, Reichman and Sablowsky. The Executive Committee may generally carry on and manage the business of the Company when the Board is not in session. The Executive Committee did not meet during the fiscal year ended August 31, 2021.

Nominating and Governance Committee. The Board has a Nominating and Governance Committee comprised of three Independent Directors. The current members of the Nominating and Governance Committee are Messrs. Brodsky, Giordano and Reichman. The Nominating and Governance Committee recommends to the Board all persons to be nominated as Directors of the Company. The Nominating and Governance Committee will consider nominees recommended by shareholders. Recommendations should be submitted to the Committee care of the Company's Secretary. The Nominating and Governance Committee convened four times during the fiscal year ended August 31, 2021.

Product Development Committee. The Board has a Product Development Committee comprised of the Interested Director and three Independent Directors. The current members of the Product Development Committee are Messrs. Chandler, Reichman, Sablowsky and Shea. The Product Development Committee oversees the process regarding the addition of new investment advisers and investment products to the Company. The Product Development Committee convened three times during the fiscal year ended August 31, 2021.

Regulatory Oversight Committee. The Board has a Regulatory Oversight Committee comprised of the Interested Director and four Independent Directors. The current members of the Regulatory Oversight Committee are Ms. Dolly and Messrs. Reichman, Sablowsky, Shea and Straniere. The Regulatory Oversight Committee monitors regulatory developments in the mutual fund industry and focuses on various regulatory aspects of the operation of the Company. The Regulatory Oversight Committee convened four times during the fiscal year ended August 31, 2021.

Valuation Committee. The Board has a Valuation Committee comprised of the Interested Director and two officers of the Company. The members of the Valuation Committee are Messrs. Faia, Sablowsky and Shaw. The Valuation Committee is responsible for reviewing fair value determinations. The Valuation Committee convened four times during the fiscal year ended August 31, 2021.

Risk Oversight

The Board performs its risk oversight function for the Company through a combination of (1) direct oversight by the Board as a whole and Board committees and (2) indirect oversight through the Company's investment advisers and other service providers, Company officers and the Company's CCO. The Company is subject to a number of risks, including but not limited to investment risk, compliance risk, operational risk, reputational risk, credit risk and counterparty risk. Day-to-day risk management with respect to the Company is the responsibility of the Company's investment advisers or other service providers (depending on the nature of the risk) that carry out the Company's investment management and business affairs. Each of the investment advisers and the other service providers have their own independent interest in risk management and their policies and methods of risk management will depend on their functions and business models and may differ from the Company's and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls.

The Board provides risk oversight by receiving and reviewing on a regular basis reports from the Company's investment advisers or other service providers, receiving and approving compliance policies and procedures, periodic meetings with the Company's portfolio managers to review investment policies, strategies and risks, and meeting regularly with the Company's CCO to discuss compliance reports, findings and issues. The Board also relies on the Company's investment advisers and other service providers, with respect to the day-to-day activities of the Company, to create and maintain procedures and controls to minimize risk and the likelihood of adverse effects on the Company's business and reputation.

Board oversight of risk management is also provided by various Board Committees. For example, the Audit Committee meets with the Company's independent registered public accounting firms to ensure that the Company's respective audit scopes include risk-based considerations as to the Company's financial position and operations.

The Board may, at any time and in its discretion, change the manner in which it conducts risk oversight. The Board's oversight role does not make the Board a guarantor of the Company's investments or activities.

Director Ownership of Shares of the Company

The following table sets forth the dollar range of equity securities beneficially owned by each Director in the Fund and in all of the portfolios of the Company (which for each Director comprise all registered investment companies within the Company's family of investment companies overseen by him or her), as of December 31, 2020:

Name of Director	Dollar Range of Equity Securities in the Fund	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Director within the Family of Investment Companies
INDEPENDENT DIRECTORS		
Julian A. Brodsky	None	Over \$100,000

¹ Ms. Dolly began serving as a Director effective October 1, 2021.

Directors' and Officers' Compensation

Effective January 1, 2022, the Company and Penn Capital Funds Trust, based on an allocation formula, pay each Director a retainer at the rate of \$125,000 annually, \$13,500 for each regular meeting of the Board, \$3,500 for each committee meeting attended in-person, and \$2,000 for each committee meeting attended telephonically or special meeting of the Board attended in-person or telephonically. The Chairman of the Audit Committee and Chairman of the Regulatory Oversight Committee each receives an additional fee of \$20,000 for his services. The Chairman of the Contract Committee and the Chairman of the Nominating and Governance Committee each receives an additional fee of \$10,000 per year for his services. The Vice Chairman of the Board receives an additional fee of \$35,000 per year for his services in this capacity and the Chairman of the Board receives an additional fee of \$75,000 per year for his services in this capacity.

From April 1, 2019 through December 31, 2021, the Company paid each Director a retainer at the rate of \$125,000 annually, \$10,000 for each regular meeting of the Board, \$3,500 for each committee meeting attended in-person, and \$2,000 for each committee meeting attended telephonically or special meeting of the Board attended in-person or telephonically. The Chairman of the Audit Committee and Chairman of the Regulatory Oversight Committee each received an additional fee of \$20,000 for his services. The Chairman of the Contract Committee and the Chairman of the Nominating and Governance Committee each received an additional fee of \$10,000 per year for his services. The Vice Chairman of the Board received an additional fee of \$35,000 per year for his services in this capacity and the Chairman of the Board received an additional fee of \$75,000 per year for his services in this capacity.

Directors are reimbursed for any reasonable out-of-pocket expenses incurred in attending meetings of the Board or any committee thereof. An employee of Vigilant Compliance, LLC serves as President and CCO of the Company. Vigilant Compliance, LLC is compensated for the services provided to the Company, and such compensation is determined by the Board. For the fiscal year ended August 31, 2021, Vigilant Compliance LLC received \$690,000 in the aggregate from all series of the Company for its services, and \$2,030 from the Fund. Employees of the Company serve as Treasurer, Secretary and Director of Marketing & Business Development, and are compensated for services provided. For the fiscal year ended August 31, 2021, each of the following members of the Board and the Treasurer, Secretary and Director of Marketing & Business Development received compensation from the Company in the following amounts:

Name of Director/Officer	Aggregate Compensation from the Fund	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Total Compensation From Fund Complex Paid to Directors or Officers
Independent Directors:			
Julian A. Brodsky, Director	\$607	N/A	\$198,000
J. Richard Carnall, Director ⁽¹⁾	\$581	N/A	\$190,000
Gregory P. Chandler, Director	\$688	N/A	\$224,500
Lisa A. Dolly, Director ⁽²⁾	\$0	N/A	\$0
Nicholas A. Giordano, Director	\$618	N/A	\$202,000
Arnold M. Reichman, Director and Chairman	\$844	N/A	\$275,500
Brian T. Shea, Director	\$583	N/A	\$191,875
Robert A. Straniere, Director	\$598	N/A	\$196,000
Interested Director:			
Robert Sablowsky, Director	\$788	N/A	\$258,000
Officers:			
James G. Shaw, Treasurer and Secretary	\$1,198	N/A	\$299,000
Craig Urciuoli, Director of Marketing & Business Development	\$989	N/A	\$247,200

(1) Mr. Carnall retired from his role as a Director effective October 1, 2021.

(2) Ms. Dolly was appointed as a Director effective October 1, 2021.

Each compensated Director is entitled to participate in the Company's deferred compensation plan (the "DC Plan"). Under the DC Plan, a compensated Director may elect to defer all or a portion of his or her compensation and have the deferred compensation treated as if it had been invested by the Company in shares of one or more of the portfolios of the Company. The amount paid to the Directors under the DC Plan will be determined based upon the performance of such investments.

As of December 31, 2020, the Independent Directors and their respective immediate family members (spouse or dependent children) did not own beneficially or of record any securities of the Company's investment advisers or distributor, or of any person directly or indirectly controlling, controlled by, or under common control with the investment advisers or distributor.

Director Emeritus Program

The Board has created a position of Director Emeritus, whereby an incumbent Director who has attained at least the age of 75 and completed a minimum of fifteen years of service as a Director, may, in the sole discretion of the Nominating and Governance Committee of the Company ("Committee"), be recommended to the full Board to serve as Director Emeritus.

A Director Emeritus that has been approved as such receives an annual fee in an amount equal to up to 50% of the annual base compensation paid to a Director. Compensation will be determined annually by the Committee and the Board with respect to each Director Emeritus. In addition, a Director Emeritus will be reimbursed for any expenses incurred in connection with their service, including expenses of travel and lodging incurred in attendance at Board meetings. A Director Emeritus will continue to receive relevant materials concerning the Fund, will be expected to attend at least one regularly scheduled quarterly meeting of the Board each year (which attendance may be via telephone), and will be available to consult with the Directors at reasonable times as requested. However, a Director Emeritus does not have any voting rights at Board meetings and is not subject to election by shareholders of the Fund.

A Director Emeritus will be permitted to serve in such capacity from year to year at the pleasure of the Committee and the Board for up to three years. Effective October 1, 2021, J. Richard Carnall serves as a Director Emeritus of the Company.

CODE OF ETHICS

The Company and the Adviser have each adopted a code of ethics under Rule 17j-1 of the 1940 Act that permits personnel subject to the codes to invest in securities, including securities that may be purchased or held by the Company, subject to certain restrictions.

PROXY VOTING

The Board has delegated the responsibility of voting proxies with respect to the portfolio securities purchased and/or held by the Fund to the Fund's Adviser, subject to the Board's continuing oversight. In exercising its voting obligations, the Adviser is guided by its general fiduciary duty to act prudently and in the interest of the Fund. The Adviser will consider factors affecting the value of the Fund's investments and the rights of shareholders in its determination on voting portfolio securities.

The Adviser will vote proxies in accordance with its proxy policies and procedures, which provide the Adviser's Chief Compliance Officer is responsible for seeing that proxies required to be voted are voted on behalf of the Fund and in the Fund's best interests. The Chief Compliance Officer may choose to appoint one or both of the Portfolio Managers to consider options and propose decisions.

The Company is required to disclose annually the Fund's complete proxy voting record on Form N-PX. The Fund's proxy voting record for the most recent 12-month period ended June 30th is available upon request by calling toll-free 1-844-261-6484 or by writing to the Fund at: Abbey Capital Multi Asset Fund, c/o U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, Wisconsin, 53201-0701. The Fund's Form N-PX is also available on the SEC's website at www.sec.gov.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

As of November 30, 2021 to the Company's knowledge, the following named persons at the addresses shown below were owners of record of approximately 5% or more of the total outstanding shares of the Fund as indicated below. See "Additional Information Concerning Company Shares" below. Any shareholder that owns 25% or more of the outstanding shares of a portfolio or class may be presumed to "control" (as that term is defined in the 1940 Act) the portfolio or class. Shareholders controlling a portfolio or class could have the ability to vote a majority of the shares of the portfolio or class on any matter requiring approval of the shareholders of the portfolio or class.

Name of Fund	Shareholder Name and Address	Percentage of Shares Owned as of November 30, 2021
Abbey Capital Multi Asset Fund — Class I	Abbey Capital Limited* 1-2 Cavendish Row Dublin 1, Ireland	43.10%
	National Financial Services, LLC For the Exclusive Benefit of Its Customers Attn: Mutual Funds 4th FL 499 Washington Boulevard Jersey City, NJ 07310-1995	20.32%

	Charles Schwab & Co, Inc. Special Custody A/C FBO Customers Attn: Mutual Funds 211 Main St. San Francisco, CA 94105-1905	11.31%
Abbey Capital Multi Asset Fund — Class I	Pershing LLC 1 Pershing Plz, FL 14 Jersey City, NJ 07399-0002	9.78%
	Abbey Capital Multi Asset Fund — Class C	Merrill Lynch Pierce Fenner & Smith For the Sole Benefit of Its Customers 4800 Deer Lake Dr., East Jacksonville, FL 32246-6484

* Beneficial Owner.

As of November 30, 2021, the Directors and Officers as a group owned less than 1% of the outstanding shares of the Fund.

INVESTMENT ADVISORY AND OTHER SERVICES

INVESTMENT ADVISER

Abbey Capital Limited ("Abbey Capital" or the "Adviser"), 1-2 Cavendish Row, Dublin 1, Ireland, is an Irish limited company founded in 2000. Cavendish Capital Limited owns 100% of Abbey Capital.

The Adviser also serves as the investment adviser to the Cayman Subsidiary, the SPC, and the Onshore Subsidiary pursuant to separate investment advisory agreements. The Cayman Subsidiary is a wholly-owned and controlled subsidiary of the Fund organized under the acts of the Cayman Islands as an exempted company. The SPC is a wholly-owned and controlled subsidiary of the Cayman Subsidiary and is an exempted company and a segregated portfolio company incorporated under the acts of the Cayman Islands. The Onshore Subsidiary is a wholly-owned and controlled subsidiary of the Fund organized as a Delaware series limited liability company. The Adviser does not receive additional compensation for its management of the Subsidiaries.

Advisory Agreement with the Company. The Adviser renders advisory services to the Fund pursuant to an Investment Advisory Agreement (“Advisory Agreement”).

Subject to the supervision of the Board, the Adviser will provide for the overall management of the Fund including (i) the provision of a continuous investment program for the Fund, including investment research and management with respect to all securities, investments, cash and cash equivalents, (ii) the determination from time to time of the securities and other investments to be purchased, retained, or sold by the Fund, and (iii) the placement from time to time of orders for all purchases and sales of securities and other investments made for the Fund. The Adviser will provide the services rendered by it in accordance with the Fund’s investment objective, restrictions and policies as stated in the Prospectus and in this SAL. The Adviser will not be liable for any error of judgment, mistake of law, or for any loss suffered by the Fund in connection with the performance of the Advisory Agreement, except a loss resulting from a breach of fiduciary duty with respect to the receipt of compensation for services or a loss resulting from willful misfeasance, bad faith or gross negligence on the part of the Adviser in the performance of its duties, or from reckless disregard of its obligations and duties under the Advisory Agreement.

For its services to the Fund, the Adviser is entitled to an advisory fee computed daily and payable monthly at the annual rate of 1.77% of the Fund’s average daily net assets. The Adviser compensates the Trading Advisers out of the advisory fee that it receives from the Fund. There are no performance fees charged by the Adviser or Trading Advisers either at the Fund or at the Fund’s wholly-owned Subsidiary. The Adviser has contractually agreed to waive its advisory fee and/or reimburse expenses through December 31, 2022 for Class I Shares, Class A Shares and Class C Shares in order to limit Total Annual Fund Operating Expenses (excluding acquired fund fees and expenses, brokerage commissions, extraordinary items, interest and taxes) to 1.79%, 2.04% and 2.79%, respectively, of the Fund’s average daily net assets.

For the fiscal year ends shown below, the Fund paid the Adviser the following advisory fees and the Adviser waived/reimbursed the following advisory fees as follows:

	Advisory Fees Paid (after waivers and reimbursements)	Waivers	Reimbursements
Fiscal year ended August 31, 2021	\$771,061	\$254,268	\$0
Fiscal year ended August 31, 2020	\$332,712	\$195,654	\$0
Fiscal year ended August 31, 2019	\$283,515	\$106,779	\$0

The Adviser will pay all expenses incurred by it in connection with its activities under the Advisory Agreement. The Fund bears all of its own expenses not specifically assumed by the Adviser. General expenses of the Company not readily identifiable as belonging to a portfolio of the Company are allocated among all investment portfolios by or under the direction of the Board in such manner as it deems to be fair and equitable. Expenses borne by the Fund include, but are not limited to the following (or the Fund’s share of the following): (a) the cost (including brokerage commissions) of securities and other investments, including futures contracts, forward contracts, swaps, and options, purchased or sold by the Fund and any losses incurred in connection therewith; (b) fees payable to and expenses incurred on behalf of the Fund by the Adviser; (c) filing fees and expenses relating to the registration and qualification of the Company and the Fund’s shares under federal and/or state securities laws and maintaining such registrations and qualifications; (d) fees and salaries payable to the Company’s Directors and officers; (e) taxes (including any income or franchise taxes) and governmental fees; (f) costs of any liability and other insurance or fidelity bonds; (g) any costs, expenses or losses arising out of a liability of or claim for damages or other relief asserted against the Company or the Fund for violation of any law; (h) legal, accounting and auditing expenses, including legal fees of special counsel for the independent Directors; (i) charges of custodians and other agents; (j) expenses of setting in type and printing prospectuses, statements of additional information and supplements thereto for existing shareholders, reports, statements, and confirmations to shareholders and proxy materials that are not attributable to a class; (k) costs of mailing prospectuses, statements of additional information and supplements thereto to existing shareholders, as well as reports to shareholders and proxy materials that are not attributable to a class; (l) any extraordinary expenses; (m) fees, voluntary assessments and other expenses incurred in connection with membership in investment company organizations; (n) costs of mailing and tabulating proxies and costs of shareholders’ and Directors’ meetings; (o) costs of independent pricing services to value the Fund’s securities; and (p) the costs of investment company literature and other publications provided by the Company to its Directors and officers. Distribution expenses, transfer agency expenses, expenses of preparation, printing and mailing prospectuses, statements of additional information, proxy statements and reports to shareholders, and organizational expenses and registration fees, identified as belonging to a particular class of the Company, are allocated to such class.

If at any time the Fund's total annual fund operating expenses (not including acquired fund fees and expenses, brokerage commissions, extraordinary items, interest or taxes) for a year are less than the relevant share class's Expense Cap, the Adviser may recoup any waived or reimbursed amounts from the Fund within three years from the date on which such waiver or reimbursements was made, provided such reimbursement does not cause the Fund to exceed expense limitations that were in effect at the time of the waiver or reimbursement.

As of August 31, 2021, the Fund had amounts available for recoups as follows:

EXPIRATION			
<u>August 31, 2022</u>	<u>August 31, 2023</u>	<u>August 31, 2024</u>	<u>Total</u>
\$106,779	\$195,654	\$254,268	\$556,701

The Advisory Agreement provides that the Adviser shall at all times have all rights in and to the Fund’s name and all investment models used by or on behalf of the Fund. The Adviser may use the Fund’s name or any portion thereof in connection with any other mutual fund or business activity without the consent of any shareholder, and the Company has agreed to execute and deliver any and all documents required to indicate its consent to such use.

INVESTMENT TRADING ADVISERS

The Adviser may allocate assets of the SPC and the Onshore Subsidiary to multiple Segregated Portfolios. Each Trading Adviser shall, subject to the supervision and oversight of the Adviser, manage the investment and reinvestment of such portion of the assets of the Segregated Portfolios, as the Adviser may from time to time allocate to such Trading Adviser for management. The Adviser pays the Trading Advisers out of its advisory fees.

The Fund and the Adviser have received an exemptive order from the SEC that permits the Adviser, without shareholder approval and subject to certain conditions, to terminate existing Trading Advisers or hire new Trading Advisers for the Fund, to materially amend the terms of particular agreements with Trading Advisers or to continue the employment of existing Trading Advisers after events that would otherwise cause an automatic termination of a trading advisory agreement. This arrangement has been approved by the Board and the Fund's initial shareholder. Consequently, under the exemptive order, the Adviser has the right to hire, terminate and replace Trading Advisers when the Board and the Adviser feel that a change would benefit the Fund. The exemptive order enables the Fund to operate with greater efficiency and without incurring the expense and delays associated with obtaining shareholder approval of trading advisory agreements.

The Adviser does not determine what investments will be purchased or sold for the Fund with respect to the portions of the Fund managed by the Trading Advisers. Because each Trading Adviser manages its portion of the Fund independently from the others, the same security may be held in two or more different portions of the Fund or may be acquired for one portion at a time when a Trading Adviser of another portion deems it appropriate to dispose of the security from that other portion. Similarly, under some market conditions, one or more of the Trading Advisers may believe that temporary, defensive investments in short-term instruments or cash are appropriate when another Trading Adviser or Trading Advisers believe continued exposure to the broader securities market is appropriate. Because each Trading Adviser directs the trading for its portion of the Fund and does not aggregate its transactions with those of the other Trading Advisers, the Fund may incur higher brokerage costs than would be the case if a single adviser or Trading Adviser were managing the Fund.

The current Trading Advisers to the Fund are set forth below.

Trading Advisers	
Aspect Capital Limited ("Aspect") 10 Portman Square London W1H 6AZ United Kingdom	Aspect is a majority employee owned investment manager which is primarily controlled by founders Anthony Todd and Martin Lueck. Aspect seeks to capture medium-term trend opportunities across a broad spectrum of diversified market sectors, applying a systematic and research driven approach
Crabel Capital Management, LLC ("Crabel") 10250 Constellation Boulevard, Suite 2650 Los Angeles, CA 90067	Crabel is a global alternative investment firm specializing in systematic, automated trading of worldwide futures and currencies. The Crabel Advanced Trend Program is a portfolio of systematic trading strategies designed to efficiently capture long-term trend following returns across a diverse set of global futures and foreign exchange instruments.
Eclipse Capital Management, Inc. ("Eclipse") 7700 Bonhomme Ave, Suite 500 St. Louis, MO 63105	Eclipse is controlled by its founder, Thomas W. Moller. Eclipse focuses on a systematic approach designed to profit primarily from intermediate- and long-term price trends in multiple market sectors.
Revolution Capital Management, LLC ("RCM") 1900 Wazee Street Denver, CO 80202	Michael Mundt and T. Robert Olson are managing members of RCM. RCM focuses on short-term, systematic and quantitative trading, applying rigorous statistical analysis to all aspects of research, development, and operations.
Tudor Investment Corporation ("Tudor") 200 Elm Street Stamford, CT 06902	Tudor is a Connecticut-based investment manager. Tudor is privately owned by certain current and former senior officers. The firm runs multiple strategies including but not limited to discretionary global macro, event driven and quantitative investment and trading strategies. The Tudor Emerald Momentum program trades a systematic trend following strategy across a broad range of global futures markets.
Welton Investment Partners LLC ("Welton") Eastwood Building San Carlos between 5th and 6th P.O. Box 6147 Carmel, CA 93921	Welton is a majority employee owned investment manager, which is primarily controlled by the founder Dr. Patrick Welton. Welton seeks to harness recurrent market opportunities by utilizing systematic, research driven, medium and long-term trend-following models across a broad range of diversified global futures markets.

Trading Advisory Agreements with the Adviser. Each of the Trading Advisory Agreements provides that the Trading Adviser will manage the investment and reinvestment of such portion of the assets of the Fund or the Segregated Portfolios, as the Adviser may from time to time allocate to such Trading Adviser in accordance with the Fund's objective, policies and restrictions and any investment guidelines established by the Adviser. Each Trading Adviser will, subject to the supervision and control of the Adviser, determine in its discretion which issuers and securities will be purchased, held, sold or exchanged by the Fund and/or the Segregated Portfolios, and will place orders with and give instruction to brokers and dealers to cause the execution of such transactions. The Trading Advisers are required to furnish at their own expense all investment facilities necessary to perform its obligations under the Trading Advisory Agreements.

Generally, each Trading Advisory Agreement may be terminated without penalty by vote of the Board or by vote of a majority of the outstanding voting securities of the Fund, upon 60 days' written notice, or by the Adviser immediately upon notice to the Trading Adviser, and each such agreement terminates automatically in the event of an assignment (as defined in the 1940 Act). Each Trading Advisory Agreement also may be terminated by a Trading Adviser upon 30 days' written notice and automatically terminates upon termination of the Advisory Agreement.

THE PORTFOLIO MANAGERS

This section includes information about the Fund's portfolio managers, including information about other accounts they manage, the dollar range of Shares they own and how they are compensated.

Abbey Capital

Other Accounts. In addition to the Fund, the portfolio managers are responsible for the day-to-day management of certain other accounts, as listed below. The information below is provided as of August 31, 2021.

Name of Portfolio Manager or Team Member	Type of Accounts	Total # of Accounts Managed	Total Assets	# of Accounts Managed that Advisory Fee Based on Performance	Total Assets that Advisory Fee Based on Performance
1. Anthony Gannon	Other Registered Investment Companies:	1	\$1.2 billion	0	\$0
	Other Pooled Investment Vehicles:	12	\$3.0 billion	4	\$2.3 billion
	Other Accounts:	0	\$0	0	\$0
2. Mick Swift	Other Registered Investment Companies:	1	\$1.2 billion	0	\$0
	Other Pooled Investment Vehicles:	12	\$3.0 billion	4	\$2.3 billion
	Other Accounts:	0	\$0	0	\$0

Compensation. As of the date of this SAI, Abbey Capital compensates the Fund's portfolio managers for their management of the Fund. The portfolio managers' compensation consists of a cash base salary and a discretionary bonus that is based on the individual performance of the portfolio manager and overall profitability of Abbey Capital, which is, in part, dependent on the performance of the Fund, and therefore in part based on the value of the Fund's net assets and other client accounts they are managing.

Conflicts of Interests. The portfolio managers' management of other accounts may give rise to potential conflicts of interest in connection with their management of the Fund's investments, on the one hand, and the investments of the other accounts, on the other. The other accounts may have the same investment objective as the Fund. Therefore, a potential conflict of interest may arise as a result of the identical investment objectives, whereby a portfolio manager could favor one account over another. Another potential conflict could include the portfolio managers' knowledge about the size, timing and possible market impact of Fund trades, whereby a portfolio manager could use this information to the advantage of other accounts and to the disadvantage of the Fund. However, Abbey Capital has established policies and procedures to ensure that the purchase and sale of securities and other investments among all accounts it manages are fairly and equitably allocated.

As of August 31, 2021, the Fund's portfolio managers did not own any shares of the Fund.

ADMINISTRATION AND ACCOUNTING AGREEMENT

Fund Services, located at 615 East Michigan Street, Milwaukee, Wisconsin 53202, serves as fund administrator to the Fund pursuant to a fund administration servicing agreement and serves as fund accountant pursuant to a fund accounting servicing agreement (the "Administration Agreements"). Under the fund accounting servicing agreement, Fund Services has agreed to furnish to the Fund statistical and research data, clerical, accounting and bookkeeping services, and certain other services required by the Fund. Under the fund administration servicing agreement, Fund Services has agreed to provide fund administration services to the Company. These services include the preparation and coordination of the Company's annual post-effective amendment filing and supplements to the Fund's registration statement, the preparation and assembly of board meeting materials, and certain other services necessary to the Company's fund administration. In addition, Fund Services has agreed to prepare and file various reports with the appropriate regulatory agencies and prepare materials required by the SEC or any state securities commission having jurisdiction over the Fund.

The Administration Agreements provide that Fund Services shall be obligated to exercise reasonable care in the performance of its duties and that Fund Services shall not be liable for any error of judgment or mistake of law or any loss suffered by the Company in connection with its duties under the Administration Agreements, except a loss resulting from Fund Services' refusal or failure to comply with the terms of the applicable Administration Agreement or from its bad faith, negligence or willful misconduct in the performance of its duties thereunder.

Fund Services receives a fee under the Administration Agreements based on the average daily net assets of the Company.

The Fund paid Fund Services certain administration, accounting and regulatory administration fees and related out-of-pocket expenses as follows:

	Fees Paid	Waivers	Reimbursements
Fiscal year ended August 31, 2021	\$89,093	\$0	\$0
Fiscal year ended August 31, 2020	\$74,328	\$0	\$0
Fiscal year ended August 31, 2019	\$34,157	\$0	\$0

CUSTODIAN AGREEMENT

U.S. Bank, N.A., (the "Custodian") 1555 North RiverCenter Drive, Suite 302, Milwaukee, Wisconsin 53212, is custodian of the Fund's assets pursuant to a custodian agreement (the "Custodian Agreement"). Under the Custodian Agreement, the Custodian: (a) maintains a separate account or accounts in the name of the Fund; (b) holds and transfers portfolio investments on account of the Fund; (c) accepts receipts and makes disbursements of money on behalf of the Fund; (d) collects and receives all income and other payments and distributions on account of the Fund's portfolio investments; and (e) makes periodic reports to the Board concerning the Fund's operations. The Custodian is authorized to select one or more banks or trust companies to serve as sub-custodian on behalf of the Fund, provided that the Custodian remains responsible for the performance of all of its duties under the Custodian Agreement and holds the Fund harmless from the acts and omissions of any affiliate, sub-custodian or domestic sub-custodian. For its services to the Fund under the Custodian Agreement, the Custodian receives a fee based on the Fund's average gross assets calculated daily and payable monthly. Transaction charges and out-of-pocket expenses are also charged to the Fund. The Custodian and Fund Services are affiliates.

TRANSFER AGENCY AGREEMENT

Fund Services serves as the transfer agent and dividend disbursing agent for the Fund pursuant to a transfer agency and servicing agreement (the "Transfer Agency Agreement"), under which Fund Services: (a) issues and redeems shares of the Fund; (b) addresses and mails all communications by the Fund to record owners of the shares, including reports to shareholders, dividend and distribution notices and proxy materials for its meetings of shareholders; (c) maintains shareholder accounts and, if requested, sub-accounts; and (d) makes periodic reports to the Board concerning the operations of the Fund. Fund Services may, subject to the Board's approval, assign its duties as transfer and dividend disbursing agent to any affiliate. For its services to the Fund under the Transfer Agency Agreement, Fund Services receives an annual fee based on the number of accounts in the Fund and the Fund's average gross assets calculated daily and payable monthly. Transaction charges and out-of-pocket expenses are also charged to the Fund.

Fund Services also provides services relating to the implementation of the Company's Anti-Money Laundering Program. In addition, Fund Services provides services relating to the implementation of the Fund's Customer Identification Program, including verification of required customer information and the maintenance of records with respect to such verification.

DISTRIBUTION AGREEMENT AND PLAN OF DISTRIBUTION

Quasar Distributors LLC (the "Distributor"), whose principal business address is 111 East Kilbourn Avenue, Suite 2200, Milwaukee, Wisconsin 53202, serves as the underwriter to the Fund pursuant to the terms of a distribution agreement (the "Distribution Agreement"). The Distributor is a registered broker-dealer and is a member of the Financial Industry Regulatory Authority ("FINRA").

Under the Distribution Agreement with the Fund, the Distributor acts as the agent of the Company in connection with the continuous offering of shares of the Fund. The Distributor continually distributes shares of the Fund on a best efforts basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Company.

The Distributor may enter into agreements with selected broker-dealers, banks or other financial intermediaries for distribution of shares of the Fund. With respect to certain financial intermediaries and related fund "supermarket" platform arrangements, the Fund and/or the Adviser, rather than the Distributor, typically enter into such agreements. These financial intermediaries may charge a fee for their services and may receive shareholder service or other fees from parties other than the Distributor. These financial intermediaries may otherwise act as processing agents and are responsible for promptly transmitting purchase, redemption and other requests to the Fund.

Investors who purchase shares through financial intermediaries will be subject to the procedures of those intermediaries through which they purchase shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be provided to customers by the financial intermediary through which they purchase shares. Investors purchasing shares of the Fund through financial intermediaries should acquaint themselves with their financial intermediary's procedures and should read the Prospectus in conjunction with any materials and information provided by their financial intermediary. The financial intermediary, and not its customers, will be the shareholder of record, although customers may have the right to vote shares depending upon their arrangement with the financial intermediary. The Distributor does not receive compensation from the Fund for its distribution services except the distribution/service fees with respect to the shares of those classes for which a Rule 12b-1 distribution plan is effective. The Adviser pays the Distributor a fee for certain distribution-related services.

The Distribution Agreement has an initial term of up to two years and will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund's outstanding voting securities in accordance with the 1940 Act. The Distribution Agreement is terminable without penalty by the Company on behalf of the Fund on no less than 60 days' written notice when authorized either by a vote of a majority of the outstanding voting securities of the Fund or by vote of a majority of the members of the Board who are not "interested persons" (as defined in the 1940 Act) of the Company and have no direct or indirect financial interest in the operation of the Distribution Agreement, or by the Distributor, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Distribution Agreement provides that the Distributor shall not be liable for any loss suffered by the Company in connection with the performance of the Distributor's obligations and duties under the Distribution Agreement, except a loss resulting from the Distributor's willful misfeasance, bad faith or negligence in the performance of such duties and obligations, or by reason of its reckless disregard thereof.

Class I Shares. Pursuant to the Distribution Agreement, the Distributor acts as the agent of the Company in connection with the continuous offering of the Fund's shares. The Distributor continually distributes shares of the Fund on a best efforts basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Company. The Distributor does not receive compensation from the Company for the distribution of the Fund's Class I Shares; however, the Adviser pays an annual fee to the Distributor as compensation for underwriting services rendered to the Fund pursuant to the Distribution Agreement.

Class A Shares and Class C Shares. Pursuant to the Distribution Agreement and the related Plans of Distribution for Class A Shares and Class C shares (together, the "Plans"), which were adopted by the Company in the manner prescribed by Rule 12b-1 under the 1940 Act, the Distributor will act as the agent of the Company in connection with the continuous offering for the sale of the Fund's Class A Shares and Class C Shares. The Distributor continually distributes shares of the Fund on a best efforts basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Company. Payments to the Distributor under the Plans are to compensate it for distribution assistance and expenses assumed and activities intended to result in the sale of Class A Shares and Class C Shares, including advertising, printing and mailing of prospectuses to others than current shareholders, compensation of underwriters, compensation to broker-dealers, compensation to sales personnel, and interest, carrying or other financing charges. As compensation for its distribution services, the Distributor receives, pursuant to the terms of the Distribution Agreement, a distribution fee under the Plans, to be calculated daily and paid monthly by the Class A Shares and Class C Shares of the Fund at the annual rates set forth in the Prospectus.

Among other things, the Plans provide that: (1) the Distributor shall be required to submit quarterly reports to the Directors of the Company regarding all amounts expended under the Plans and the purposes for which such expenditures were made, including commissions, advertising, printing, interest, carrying charges and any allocated overhead expenses; (2) the Plans will continue in effect only so long as they are approved at least annually, and any material amendment thereto is approved, by the Company's Directors, including a majority of those Directors who are not "interested persons" (as defined in the 1940 Act) and who have no direct or indirect financial interest in the operation of the Plans or any agreements related to the Plans, acting in person at a meeting called for said purpose; (3) the aggregate amount to be spent by the Fund on the distribution of the Fund's Class A Shares and Class C Shares under the respective Plans shall not be materially increased without shareholder approval; and (4) while the Plans remain in effect, the selection and nomination of the Company's Directors who are not "interested persons" of the Company (as defined in the 1940 Act) shall be committed to the discretion of such Directors who are not "interested persons" of the Company.

Mr. Sablowsky, a Director of the Company, has an indirect interest in the operation of the Plans by virtue of his position with Oppenheimer Co., Inc., a broker-dealer.

No 12b-1 fee information is available since the Class A Shares and Class C Shares commenced operations on November 2, 2021.

PAYMENTS TO FINANCIAL INTERMEDIARIES

The Adviser and/or its affiliates, at their discretion, may make payments from their own resources and not from Fund assets to affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with the Fund, its service providers or their respective affiliates, as incentives to help market and promote the Fund and/or in recognition of their distribution, marketing, administrative services, and/or processing support.

These additional payments may be made to financial intermediaries that sell Fund shares or provide services to the Fund, the Distributor or shareholders of the Fund through the financial intermediary's retail distribution channel and/or fund supermarkets. Payments may also be made through the financial intermediary's retirement, qualified tuition, fee-based advisory, wrap fee bank trust, or insurance (e.g., individual or group annuity) programs. These payments may include, but are not limited to, placing the Fund in a financial intermediary's retail distribution channel or on a preferred or recommended fund list; providing business or shareholder financial planning assistance; educating financial intermediary personnel about the Fund; providing access to sales and management representatives of the financial intermediary; promoting sales of Fund shares; providing marketing and educational support; maintaining share balances and/or for sub-accounting, administrative or shareholder transaction processing services. A financial intermediary may perform the services itself or may arrange with a third party to perform the services.

The Adviser and/or its affiliates may also make payments from their own resources to financial intermediaries for costs associated with the purchase of products or services used in connection with sales and marketing, participation in and/or presentation at conferences or seminars, sales or training programs, client and investor entertainment and other sponsored events. The costs and expenses associated with these efforts may include travel, lodging, sponsorship at educational seminars and conferences, entertainment and meals to the extent permitted by law.

Revenue sharing payments may be negotiated based on a variety of factors, including the level of sales, the amount of Fund assets attributable to investments in the Fund by financial intermediaries' customers, a flat fee or other measures as determined from time to time by the Adviser and/or its affiliates. A significant purpose of these payments is to increase the sales of Fund shares, which in turn may benefit the Adviser through increased fees as Fund assets grow.

FUND TRANSACTIONS

Subject to policies established by the Board and applicable rules, the Adviser and Trading Advisers are responsible for the execution of portfolio transactions and the allocation of brokerage transactions for the Fund. In executing portfolio transactions, the Adviser and Trading Advisers seek to obtain the best price and most favorable execution for the Fund, taking into account such factors as the price (including the applicable brokerage commission or dealer spread), size of the order, difficulty of execution and operational facilities of the firm involved. While the Adviser and Trading Advisers generally seek reasonably competitive commission rates, payment of the lowest commission or spread is not necessarily consistent with obtaining the best price and execution in particular transactions.

Brokerage Transactions

Generally, equity securities, both listed and over-the-counter, are bought and sold through brokerage transactions for which commissions are payable. Purchases from underwriters will include the underwriting commission or concession, and purchases from dealers serving as market makers will include a dealer's mark-up or reflect a dealer's mark-down. Money market securities and other debt securities are usually bought and sold directly from the issuer or an underwriter or market maker for the securities. Generally, the Fund will not pay brokerage commissions for such purchases. When a debt security is bought from an underwriter, the purchase price will usually include an underwriting commission or concession. The purchase price for securities bought from dealers serving as market makers will similarly include the dealer's mark up or reflect a dealer's mark down. When the Fund executes transactions in the over-the-counter market, it will generally deal with primary market makers unless prices that are more favorable are otherwise obtainable.

In addition, the Adviser and Trading Advisers may place a combined order for two or more accounts they manage, including the Fund, engaged in the purchase or sale of the same security if, in its judgment, joint execution is in the best interest of each participant and will result in best price and execution. Transactions involving commingled orders are allocated in a manner deemed equitable to each account or fund. Although it is recognized that, in some cases, the joint execution of orders could adversely affect the price or volume of the security that a particular account or the Fund may obtain, it is the opinion of the Adviser, the Trading Advisers and the Board that the advantages of combined orders outweigh the possible disadvantages of separate transactions. Nonetheless, the Adviser and Trading Advisers believe that the ability of the Fund to participate in higher volume transactions will generally be beneficial to the Fund.

The Fund is required to identify any securities of the Company's regular broker-dealers (as defined in Rule 10b-1 under the 1940 Act) or their parents held by the Fund as of the end of the most recent fiscal year. As of August 31, 2021, there were no securities held by the Fund of its regular broker-dealers.

For the fiscal year ended August 31, 2021, the Fund paid commissions to brokers on account of research services as follows:

Fiscal year ended August 31, 2021	\$0
-----------------------------------	-----

For the fiscal periods shown below, the Fund paid the aggregated brokerage commissions as follows:

Fiscal year ended August 31, 2021	\$190,582
Fiscal year ended August 31, 2020	\$130,162
Fiscal year ended August 31, 2019	\$93,173

Brokerage Selection

The Company does not expect to use one particular broker or dealer, and when one or more brokers is believed capable of providing the best combination of price and execution, the Fund's Adviser and Trading Advisers may select a broker based upon brokerage or research services provided to the Adviser or applicable Trading Adviser. The Adviser and Trading Advisers may pay a higher commission than otherwise obtainable from other brokers in return for such services only if a good faith determination is made that the commission is reasonable in relation to the services provided.

Section 28(c) of the 1934 Act permits an investment adviser or sub-adviser, under certain circumstances, to cause a fund to pay a broker or dealer a commission for effecting a transaction in excess of the amount of commission another broker or dealer would have charged for effecting the transaction in recognition of the value of brokerage and research services provided by the broker or dealer. In addition to agency transactions, certain Trading Advisers may receive brokerage and research services in connection with certain riskless principal transactions, in accordance with applicable SEC guidance. Brokerage and research services include: (1) furnishing advice as to the value of securities, the advisability of investing in, purchasing or selling securities, and the availability of securities or purchasers or sellers of securities; (2) furnishing analyses and reports concerning issuers, industries, securities, economic factors and trends, portfolio strategy, and the performance of accounts; and (3) effecting securities transactions and performing functions incidental thereto (such as clearance, settlement, and custody). In the case of research services, the applicable Trading Advisers believe that access to independent investment research is beneficial to their investment decision-making processes and, therefore, to the Fund.

To the extent research services may be a factor in selecting brokers, such services may be in written form or through direct contact with individuals and may include information as to particular companies and securities as well as market, economic, or institutional areas and information which assists in the valuation and pricing of investments. Examples of research-oriented services for which the applicable Trading Advisers might utilize Fund commissions include research reports and other information on the economy, industries, sectors, groups of securities, individual companies, statistical information, political developments, technical market action, pricing and appraisal services, credit analysis, risk measurement analysis, performance and other analysis. The Trading Advisers may use research services furnished by brokers in servicing all client accounts and not all services may necessarily be used in connection with the account that paid commissions to the broker providing such services. Information so received by the Trading Advisers will be in addition to and not in lieu of the services required to be performed by the Trading Adviser under its Trading Advisory Agreement. Any advisory or other fees paid to the Trading Advisers are not reduced as a result of the receipt of research services.

In some cases a Trading Adviser may receive a service from a broker that has both a “research” and a “non-research” use. When this occurs, the applicable Trading Adviser makes a good faith allocation, under all the circumstances, between the research and non-research uses of the service. The percentage of the service that is used for research purposes may be paid for with client commissions, while the applicable Trading Adviser will use its own funds to pay for the percentage of the service that is used for non-research purposes. In making this good faith allocation, the Trading Adviser faces a potential conflict of interest, but each applicable Trading Adviser believes that its allocation procedures are reasonably designed to ensure that it appropriately allocates the anticipated use of such services to their research and non-research uses.

From time to time, the Fund may purchase new issues of securities for clients in a fixed price offering. In these situations, the seller may be a member of the selling group that will, in addition to selling securities, provide the Adviser and Trading Advisers with research services. The FINRA has adopted rules expressly permitting these types of arrangements under certain circumstances. Generally, the seller will provide research “credits” in these situations at a rate that is higher than that which is available for typical secondary market transactions. These arrangements may not fall within the safe harbor of Section 28(e).

PURCHASE, EXCHANGE AND REDEMPTION INFORMATION

Read the Fund’s Prospectus for information regarding the purchase, exchange and redemption of Fund shares, including, in the case of Class A Shares, any applicable sales charges, and in the case of Class C Shares, any applicable contingent deferred sales charges. The following information supplements information in the Fund’s Prospectus.

You may purchase shares through an account maintained by certain brokerage firms, financial institutions and other industry professionals that have entered into a distribution agreement with the Distributor (“Service Organizations”) and you may also purchase shares directly by mail or wire. The Company reserves the right, if conditions exist which make cash payments undesirable, to honor any request for redemption or repurchase of the Fund’s shares by making payment in whole or in part in securities chosen by the Company and valued in the same way as they would be valued for purposes of computing the Fund’s NAV. If payment is made in securities, a shareholder may incur transaction costs in converting these securities into cash. A shareholder will also bear any market risk or tax consequences as a result of a payment in securities. The Company has elected, however, to be governed by Rule 18f-1 under the 1940 Act so that the Fund is obligated to redeem its shares solely in cash up to the lesser of \$250,000 or 1% of its NAV during any 90-day period for any one shareholder of the Fund. A shareholder will bear the risk of a decline in market value and any tax consequences associated with a redemption in securities.

Under the 1940 Act, the Company may suspend the right to redemption or postpone the date of payment upon redemption for any period during which the NYSE is closed (other than customary weekend and holiday closings), or during which the SEC restricts trading on the NYSE or determines an emergency exists as a result of which disposal or valuation of portfolio securities is not reasonably practicable, or for such other periods as the SEC may permit. (The Company may also suspend or postpone the recordation of the transfer of its shares upon the occurrence of any of the foregoing conditions).

Shares of the Company are subject to redemption by the Company, at the redemption price of such shares as in effect from time to time, including, without limitation: (1) to reimburse the Fund for any loss sustained by reason of the failure of a shareholder to make full payment for shares purchased by the shareholder or to collect any charge relating to a transaction effected for the benefit of a shareholder as provided in the Prospectus from time to time; (2) if such redemption is, in the opinion of the Board, desirable in order to prevent the Company or the Fund from being deemed a “personal holding company” within the meaning of the Code; (3) or if the net income with respect to any particular class of common stock should be negative or it should otherwise be appropriate to carry out the Company’s responsibilities under the 1940 Act.

The Fund has the right to redeem your shares at current NAV at any time and without prior notice if, and to the extent that, such redemption is necessary to reimburse the Fund for any loss sustained by reason of your failure to make full payment for shares of the Fund you previously purchased or subscribed for.

Class A Shares of the Fund may be subject to sales charge waivers as described below.

Reducing or Eliminating the Front-End Sales Charge

Different Service Organizations may impose different sales charges and these variations are described in Appendix B of the Fund's Prospectus.

Class A Shares

The Fund’s Class A Shares are offered to the public at NAV plus a front-end sales charge. You can reduce or eliminate the front-end sales charge on Class A Shares of the Fund as follows:

Quantity Discounts. Purchases of at least \$25,000 can reduce the sales charges you pay, and purchases of at least \$1,000,000 can eliminate the sales charges you pay.

Rights of Accumulation. You may combine your new purchase of Class A Shares with Class A Shares and/or Class C Shares currently owned for the purpose of qualifying for the lower initial sales charge rates that apply to larger purchases. The applicable sales charge for the new purchase is based on the total of your current purchase and the current NAV of all other shares you own. You may combine your account, your spouse’s account, and the account(s) of your children under age 25.

This privilege is also extended to certain employee benefit plans and trust estates. The following purchases may be combined for purposes of determining the “Amount of Purchase:” (a) individual purchases, if made at the same time, by a single purchaser, the purchaser’s spouse and children under the age of 25 purchasing Class A Shares for their own accounts, including shares purchased by a qualified retirement plan(s) exclusively for the benefit of such individual(s) (such as an IRA, individual-type section 403(b) plan or single-participant Keogh-type plan) or by a “Company,” as defined in Section 2(a)(8) of the 1940 Act, solely controlled as defined in the 1940 Act, by such individual(s), or (b) individual purchases by trustees or other fiduciaries purchasing Class A Shares (i) for a single trust estate or a single fiduciary account, including an employee benefit plan, or (ii) concurrently by two or more employee benefit plans for a single employer or of employers affiliated with each other in accordance with Section 2(a)(3)(c) of the 1940 Act (excluding in either case an employee benefit plan described in (a) above), provided such trustees or other fiduciaries purchase shares in a single payment. Purchases made for nominee or street name accounts may not be combined with purchases made for such other accounts. You may also further discuss the combined purchase privilege with your investment broker, brokerage firm, financial institution, or other industry professional, including affiliates of the Adviser.

You will need to provide written instruction with respect to the other accounts whose purchases should be considered in Rights of Accumulation.

Letter of Intent. You can sign a Letter of Intent committing to purchase of a specific dollar amount of Class A Shares of the Fund within a 13-month period to combine such purchases in calculating the sales charge. A portion of your Fund shares will be held in escrow. If you complete your purchase commitments as stated in the Letter of Intent, your Fund shares held in escrow will be released to your account. If you do not purchase the full amount of Class A Shares indicated in the Letter of Intent, the appropriate amount of shares held in escrow will be redeemed by the Transfer Agent to pay the sales charge that was not applied to your purchase

Dealer Reallowances

Different Service Organizations may impose different sales charges and these variations are described in [Appendix B](#) of the Fund's Prospectus.

As shown in the table below, the Distributor, may provide dealer reallowances up to the full sales charge for purchases of the Fund’s Class A Shares in which a front-end sales charge is applicable. Any residual allowance is retained by the Distributor to be used solely for distribution related expenses and not retained as profit.

Amount of Purchase of Class A Shares	Sales Charge as % of Offering Price	Sales Charge as % of Net Amount Invested	Dealer Concession as a Percentage of Offering Price
Less than \$25,000	5.75%	6.10%	5.00%
At least \$25,000 but less than \$50,000	5.00%	5.26%	4.25%
At least \$50,000 but less than \$100,000	4.75%	4.99%	4.00%
At least \$100,000 but less than \$250,000	3.75%	3.83%	3.25%
At least \$250,000 but less than \$500,000	2.50%	2.56%	2.00%
At least \$500,000 but less than \$1,000,000	2.00%	2.04%	1.75%
\$1,000,000 or greater	None	None	* see below

* No sales charge is payable at the time of purchase on investments of \$1,000,000 or more; however, a 1% contingent deferred sales charge is imposed in the event of redemption within 12 months following any such purchase. The Fund’s distributor may pay a commission at the rate of 1% to certain brokerage firms, financial institutions and other industry professionals, including affiliates of the Adviser, who initiate and are responsible for purchases of \$1,000,000 or more.

Contingent Deferred Sales Charge on Certain Redemptions. Purchases of \$1,000,000 or more in Class A Shares are not subject to an initial sales charge; however, a contingent deferred sales charge is payable on these investments in the event of a share redemption within 12 months following the share purchase, at the rate of 1% of the lesser of the value of the shares redeemed (exclusive of reinvested dividends and capital gain distributions) or the total cost of such shares. In determining whether a contingent deferred sales charge is payable, and the amount of the charge, it is assumed that shares purchased with reinvested dividends and capital gain distributions and then other shares held the longest are the first redeemed. Contingent Deferred Sales Charges may be waived or reduced by certain Service Organizations as described in [Appendix B](#) of the Fund's Prospectus.

Class C Shares

Contingent Deferred Sales Charge on Certain Redemptions. No sales load is payable by a shareholder at the time of purchase, although the Distributor advances broker-dealers the first year distribution and services fee at a rate of 1.00% on investments in the Fund’s Class C Shares. This advancement is solely financed by the Adviser’s affiliated broker dealer and not by investors or the Fund. As a result, the Fund imposes a Contingent Deferred Sales Charge (“CDSC”) of 1.00% on redemptions of investments made within 12 months of purchase. The financing party receives the CDSC from the Distributor as reimbursement for the up-front sales commission that has been financed. The CDSC is assessed on an amount equal to the lesser of the initial value of the shares redeemed and the value of shares redeemed at the time of redemption. When Class C Shares are redeemed, the redemption order is processed so that the lowest deferred sales charge is charged, and Class C Shares that are not subject to the deferred sales charge are redeemed first. Any CDSC paid on the redemptions of Class C Shares expressed as a percentage of the applicable redemption amount may be higher or lower than the charge described due to rounding. No CDSC is imposed on increases in NAV above the initial purchase price or Fund shares acquired as reinvested Fund distributions.

The CDSC will be waived for Class C Shares in the following circumstances:

- Redemptions of shares purchased through certain employer-sponsored retirement plans and rollovers of current investments in the Fund through such plans;
- Exchanges pursuant to the exchange privilege, as described in the Fund’s Prospectus under “Shareholder Information — Exchange Privilege”;
- Redemptions made in connection with minimum required distributions from IRA or 403(b)(7) accounts due to the shareholder reaching the age of 72;
- Certain post-retirement withdrawals from an IRA or other retirement plan if you are over 59 ½ years old and you purchased your shares prior to October 2, 2006;
- Redemptions made with respect to certain retirement plans sponsored by the Fund;
- Redemptions resulting from shareholder death as long as the waiver request is made within one year of death or, if later, reasonably promptly following completion of probate (including in connection with the distribution of account assets to a beneficiary of the decedent);
- Withdrawals resulting from shareholder disability (as defined in the Internal Revenue Code) as long as the disability arose subsequent to the purchase of the shares;
- Involuntary redemptions made of shares in accounts with low balances;
- Redemptions related to the payment of custodial IRA fees, if any; and

- Redemptions when a shareholder can demonstrate hardship, in the absolute discretion of the Fund.

Contingent Deferred Sales Charges may be waived or reduced by certain Service Organizations as described in [Appendix B](#) of the Fund's Prospectus.

Other Purchase Information

If shares of the Fund are held in a "street name" account with an authorized dealer, all recordkeeping, transaction processing and payments of distributions relating to the beneficial owner's account will be performed by the authorized dealer, and not by the Fund and its Transfer Agent. Since the Fund will have no record of the beneficial owner's transactions, a beneficial owner should contact the authorized dealer to purchase, redeem or exchange shares, to make changes in or give instructions concerning the account or to obtain information about the account. The transfer of shares in a "street name" account to an account with another dealer or to an account directly with the Fund involves special procedures and will require the beneficial owner to obtain historical purchase information about the shares in the account from the authorized dealer.

Share Class Conversion

Some shareholders may hold shares of the Fund through fee-based programs, often referred to as "wrap accounts," that are managed by investment dealers, financial advisors or other investment professionals (each, a "wrap account intermediary"). A wrap account intermediary may impose eligibility requirements on a shareholder's participation in the fee-based program and ownership of shares through the program which are additional to the ownership requirements described in the Prospectus. Under the terms of its fee-based program, a wrap account intermediary may also be permitted to effect a conversion (sometimes referred to as an "in-kind exchange") of a shareholder's shares in the Fund, including those shares purchased by the shareholder during the shareholder's participation in the program, to a different class of shares of the Fund in situations when the shareholder no longer meets the wrap account intermediary's stated eligibility requirements for the ownership of the class of shares that the shareholder initially purchased. For example, the terms of its fee-based program may permit a wrap account intermediary to effect this type of conversion when a shareholder moves his position in a class of shares of the Fund out of the program that offered that class of shares and into a program or account through which the wrap account intermediary only offers a different class or classes of shares of the Fund. Under other circumstances, a financial intermediary may effect this type of conversion with respect to new clients who held one class of shares of the Fund before becoming a client of the intermediary, and who are eligible for a wrap account through which the intermediary offers a different class of shares of the Fund. Any such conversion by a wrap account intermediary will be made in accordance with the Prospectus of the Fund, and will be made without the imposition by the Fund of any sales load, fee or other charge. The class of shares that a shareholder owns after the conversion may bear higher fees and expenses than the class of shares that the shareholder initially purchased.

If you own shares of the Fund through a fee-based program, you should consult with your wrap account intermediary to determine whether there are any additional eligibility requirements that the wrap account intermediary imposes on your participation in their program and your ownership of the Fund's shares through the program, and whether the wrap account intermediary prescribes any circumstances which may result in the type of share class conversion described herein.

TELEPHONE TRANSACTION PROCEDURES

The Company's telephone transaction procedures include the following measures: (1) requiring the appropriate telephone transaction privilege forms; (2) requiring the caller to provide the names of the account owners, the account social security number and name of the Fund, all of which must match the Company's records; (3) requiring the Company's service representative to complete a telephone transaction form, listing all of the above caller identification information; (4) permitting exchanges (if applicable) only if the two account registrations are identical; (5) requiring that redemption proceeds be sent only by check to the account owners of record at the address of record, or by electronic funds transfer through the ACH network or wire only to the owners of record at the bank account of record; (6) sending a written confirmation for each telephone transaction to the owners of record at the address of record within five (5) business days of the call; and (7) maintaining tapes of telephone transactions for six months, if the Company elects to record shareholder telephone transactions. For accounts held of record by broker-dealers, financial institutions, securities dealers, financial planners and other industry professionals, additional documentation or information regarding the scope of a caller's authority is required. Finally, for telephone transactions in accounts held jointly, additional information regarding other account holders is required.

VALUATION OF SHARES

In accordance with procedures adopted by the Board, the NAV per share of the Fund is calculated by determining the value of the net assets attributed to the Fund and dividing by the number of outstanding shares of the Fund. All securities are valued on each Business Day as of the close of regular trading on the NYSE (normally, but not always, 4:00 p.m. Eastern Time) or such other time as the NYSE or National Association of Securities Dealers Automated Quotations System ("NASDAQ") market may officially close. The term "Business Day" means any day the NYSE is open for trading, which is Monday through Friday except for holidays. The NYSE is generally closed on the following holidays: New Year's Day (observed), Martin Luther King, Jr. Day, Washington's Birthday (observed), Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

The time at which transactions and shares are priced and the time by which orders must be received may be changed in case of an emergency or if regular trading on the NYSE is stopped at a time other than 4:00 p.m. Eastern Time. The Company reserves the right to reprocess purchase, redemption and exchange transactions that were initially processed at a NAV other than the Fund's official closing NAV (as the same may be subsequently adjusted), and to recover amounts from (or distribute amounts to) shareholders based on the official closing NAV. The Company reserves the right to advance the time by which purchase and redemption orders must be received for same business day credit as otherwise permitted by the SEC. In addition, the Fund may compute its NAV as of any time permitted pursuant to any exemption, order or statement of the SEC or its staff.

The securities of the Fund are valued under the direction of the Fund's administrator and under the general supervision of the Board. Prices are generally determined using readily available market prices. Subject to the approval of the Board, the Fund may employ outside organizations, which may use a matrix or formula method that takes into consideration market indices, matrices, yield curves and other specific adjustments in determining the approximate market value of portfolio investments. This may result in the investments being valued at a price that differs from the price that would have been determined had the matrix or formula method not been used. All cash, receivables, and current payables are carried on the Fund's books at their face value. Other assets, if any, are valued at fair value as determined in good faith by the Fund's Valuation Committee under the direction of the Board.

The procedures used by any pricing service and its valuation results are reviewed by the officers of the Company under the general supervision of the Board.

The Fund may hold portfolio securities that are listed on foreign exchanges. These securities may trade on weekends or other days when the Fund does not calculate NAV. As a result, the value of these investments may change on days when you cannot purchase or sell Fund shares.

TAXES

The following summarizes certain additional tax considerations generally affecting the Fund and its shareholders that are not described in the Prospectus. No attempt is made to present a detailed explanation of the tax treatment of the Fund or its shareholders, and the discussions here and in the Prospectus are not intended as a substitute for careful tax planning. Potential investors should consult their tax advisers with specific reference to their own tax situations.

The discussions of the federal tax consequences in the Prospectus and this SAI are based on the Code and the regulations issued under it, and court decisions and administrative interpretations, as in effect on the date of this SAI. Future legislative or administrative changes or court decisions may significantly alter the statements included herein, and any such changes or decisions may be retroactive.

General

The Fund intends to qualify and continue to qualify as a regulated investment company under Subchapter M of Subtitle A, Chapter 1, of the Code. As such, the Fund generally will be exempt from federal income tax on its net investment income and realized capital gains that it distributes to shareholders. To qualify for treatment as a regulated investment company, it must meet three important tests each year.

First, the Fund must derive with respect to each taxable year at least 90% of its gross income from dividends, interest, certain payments with respect to securities loans, gains from the sale or other disposition of stock or securities or foreign currencies, other income derived with respect to the Fund's business of investing in stock, securities or currencies, or net income derived from interests in qualified publicly traded partnerships.

Second, generally, at the close of each quarter of the Fund's taxable year, at least 50% of the value of the Fund's assets must consist of cash and cash items, U.S. government securities, securities of other regulated investment companies, and securities of other issuers as to which the Fund has not invested more than 5% of the value of its total assets in securities of the issuer and as to which the Fund does not hold more than 10% of the outstanding voting securities of the issuer, and no more than 25% of the value of the Fund's total assets may be invested in the securities of (1) any one issuer (other than U.S. government securities and securities of other regulated investment companies), (2) two or more issuers that the Fund controls and which are engaged in the same or similar trades or businesses or (3) one or more qualified publicly traded partnerships.

Third, the Fund must distribute an amount equal to at least the sum of 90% of its investment company taxable income (net investment income and the excess of net short-term capital gain over net long-term capital loss) before taking into account any deduction for dividends paid, and 90% of its tax-exempt income, if any, for the year.

The Fund intends to comply with these requirements. If the Fund were to fail to make sufficient distributions, it could be liable for corporate income tax and for excise tax in respect of the shortfall or, if the shortfall is large enough, the Fund could be disqualified as a regulated investment company. If for any taxable year the Fund were not to qualify as a regulated investment company, all its taxable income would be subject to tax at regular corporate rates without any deduction for distributions to shareholders. In that event, shareholders would recognize dividend income on distributions to the extent of the Fund's current and accumulated earnings and profits, and corporate shareholders could be eligible for the dividends-received deduction.

The Code imposes a nondeductible 4% excise tax on regulated investment companies that fail to distribute each year an amount equal to specified percentages of their ordinary taxable income and capital gain net income (excess of capital gains over capital losses). The Fund intends to make sufficient distributions or deemed distributions each year to avoid liability for this excise tax.

Because of the special rules applicable to regulated futures contracts under section 1256 of the Code, they are required to be "marked to market" as of the end of each taxable year, and the unrealized gain or loss on the contracts must be taken into account at that time. As a result, to the extent that there is net unrealized gain in the Fund's positions in futures contracts as of the end of any year, the Fund will generally be required to make a distribution of that amount to its shareholders. The Fund may need to liquidate positions or to borrow funds to finance such a distribution.

Taxation of Certain Investments

The tax principles applicable to transactions in financial instruments, such as futures contracts and options, that may be engaged in by the Fund, and investments in passive foreign investment companies ("PFICs"), are complex and, in some cases, uncertain. Such transactions and investments may cause the Fund to recognize taxable income prior to the receipt of cash, thereby requiring the Fund to liquidate other positions, or to borrow money, so as to make sufficient distributions to shareholders to avoid corporate-level tax. Moreover, some or all of the taxable income recognized may be ordinary income or short-term capital gain, so that the distributions may be taxable to shareholders as ordinary income.

In addition, in the case of any shares of a PFIC in which the Fund invests, the Fund may be liable for corporate-level tax on any ultimate gain or distributions on the shares if the Fund fails to make an election to recognize income annually during the period of its ownership of the shares.

Any annual net profit of the SPC will be recognized as ordinary income by the Fund, but any annual net loss of the SPC will not be recognized and will not carry forward.

State and Local Taxes

Although the Fund expects to qualify as a "regulated investment company" and to be relieved of all or substantially all federal income taxes, depending upon the extent of its activities in states and localities in which its offices are maintained, in which its agents or independent contractors are located or in which it is otherwise deemed to be conducting business, the Fund may be subject to the tax laws of such states or localities.

ADDITIONAL INFORMATION CONCERNING COMPANY SHARES

The Company has authorized capital of 100 billion shares of common stock at a par value of \$0.001 per share. Currently, 89.023 billion shares have been classified into 201 classes. However, the Company only has approximately 51 active share classes that have begun investment operations. Under the Company's charter, the Board has the power to classify and reclassify any unissued shares of common stock from time to time.

The Fund has registered three classes of shares: Class I Shares, Class A Shares and Class C Shares. Each share that represents an interest in the Fund has an equal proportionate interest in the assets belonging to such Fund with each other share that represents an interest in such Fund, even where a share has a different class designation than another share representing an interest in that Fund. Shares of the Company do not have preemptive or conversion rights. When issued for payment as described in the Prospectus, shares of the Company will be fully paid and non-assessable.

The Company does not currently intend to hold annual meetings of shareholders except as required by the 1940 Act or other applicable law. The Company's amended By-Laws provide that shareholders owning at least ten percent of the outstanding shares of all classes of common stock of the Company have the right to call for a meeting of shareholders to consider the removal of one or more directors. To the extent required by law, the Company will assist in shareholder communication in such matters.

Holders of shares of each class of the Company will vote in the aggregate and not by class on all matters, except where otherwise required by law. Further, shareholders of the Company will vote in the aggregate and not by portfolio except as otherwise required by law or when the Board determines that the matter to be voted upon affects only the interests of the shareholders of a particular portfolio or class of shares. Rule 18f-2 under the 1940 Act provides that any matter required to be submitted by the provisions of such Act or applicable state law, or otherwise, to the holders of the outstanding voting securities of an investment company such as the Company shall not be deemed to have been effectively acted upon unless approved by the holders of a majority of the outstanding voting securities of each portfolio affected by the matter. Rule 18f-2 further provides that a portfolio shall be deemed to be affected by a matter unless it is clear that the interests of each portfolio in the matter are identical or that the matter does not affect any interest of the portfolio. Under Rule 18f-2 the approval of an investment advisory agreement or distribution agreement or any change in a fundamental investment objective or fundamental investment policy would be effectively acted upon with respect to a portfolio only if approved by the holders of a majority of the outstanding voting securities of such portfolio. However, the Rule also provides that the ratification of the selection of independent public accountants and the election of directors are not subject to the separate voting requirements and may be effectively acted upon by shareholders of an investment company voting without regard to a portfolio. Shareholders of the Company are entitled to one vote for each full share held (irrespective of class or portfolio) and fractional votes for fractional shares held. Voting rights are not cumulative and, accordingly, the holders of more than 50% of the aggregate shares of common stock of the Company may elect all of the Directors.

Notwithstanding any provision of Maryland law requiring a greater vote of shares of the Company's common stock (or of any class voting as a class) in connection with any corporate action, unless otherwise provided by law (for example by Rule 18f-2 discussed above), or by the Company's Articles of Incorporation and By-Laws, the Company may take or authorize such action upon the favorable vote of the holders of more than 50% of all of the outstanding shares of Common Stock voting without regard to class (or portfolio).

MISCELLANEOUS

Anti-Money Laundering Program

The Fund has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). To ensure compliance with this law, the Fund's Program provides for the development of internal practices, procedures, and controls, designation of anti-money laundering compliance officers, an ongoing training program, and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that certain of its service providers have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, and conducting a complete and thorough review of all new account applications. The Fund will not transact business with any person or legal entity whose identity and beneficial owners, if applicable, cannot be adequately verified under the provisions of the USA PATRIOT Act.

Counsel

The law firm of Faegre Drinker Biddle & Reath LLP, One Logan Square, Ste. 2000, Philadelphia, Pennsylvania 19103-6996, serves as independent counsel to the Company and the Independent Directors.

Independent Registered Public Accounting Firm

Ernst & Young LLP, located at One Commerce Square, Suite 700, 2005 Market Street, Philadelphia, Pennsylvania 19103, serves as the Fund's independent registered public accounting firm, and in that capacity audits the Fund's financial statements.

FINANCIAL STATEMENTS

The audited financial statements and notes thereto in the Fund's Annual Report to Shareholders for the fiscal year ended August 31, 2021 (the "Annual Report") are incorporated by reference into this SAI. No other parts of the Annual Report are incorporated by reference herein. The financial statements included in the Annual Report have been audited by Ernst & Young LLP, the Fund's independent registered public accounting firm, whose report thereon also appears in the Annual Report and is incorporated by reference into this SAI. Such financial statements have been incorporated by reference herein in reliance upon such report given upon their authority as experts in accounting and auditing. Copies of the Annual Report may be obtained at no charge by calling the Fund at the telephone number appearing on the front page of this SAI.

APPENDIX A

DESCRIPTION OF SECURITIES RATINGS

Short-Term Credit Ratings

An *S&P Global Ratings* short-term issue credit rating is generally assigned to those obligations considered short-term in the relevant market. The following summarizes the rating categories used by S&P Global Ratings for short-term issues:

“A-1” – A short-term obligation rated “A-1” is rated in the highest category by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

“A-2” – A short-term obligation rated “A-2” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitments on the obligation is satisfactory.

“A-3” – A short-term obligation rated “A-3” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor’s capacity to meet its financial commitments on the obligation.

“B” – A short-term obligation rated “B” is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor’s inadequate capacity to meet its financial commitments.

“C” – A short-term obligation rated “C” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.

“D” – A short-term obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring.

Local Currency and Foreign Currency Ratings – S&P Global Ratings’ issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. A foreign currency rating on an issuer can differ from the local currency rating on it when the obligor has a different capacity to meet its obligations denominated in its local currency, versus obligations denominated in a foreign currency.

“NR” – This indicates that a rating has not been assigned or is no longer assigned.

Moody’s Investors Service (“Moody’s”) short-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

Moody’s employs the following designations to indicate the relative repayment ability of rated issuers:

“P-1” – Issuers (or supporting institutions) rated Prime-1 reflect a superior ability to repay short-term obligations.

“P-2” – Issuers (or supporting institutions) rated Prime-2 reflect a strong ability to repay short-term obligations.

“P-3” – Issuers (or supporting institutions) rated Prime-3 reflect an acceptable ability to repay short-term obligations.

“NP” – Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

“NR” – Is assigned to an unrated issuer.

Fitch, Inc. / Fitch Ratings Ltd. (“Fitch”) short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-term ratings are assigned to obligations whose initial maturity is viewed as “short-term” based on market convention.¹ Typically, this means up to 13 months for corporate, sovereign, and structured obligations and up to 36 months for obligations in U.S. public finance markets. The following summarizes the rating categories used by Fitch for short-term obligations:

“F1” – Securities possess the highest short-term credit quality. This designation indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.

“F2” – Securities possess good short-term credit quality. This designation indicates good intrinsic capacity for timely payment of financial commitments.

“F3” – Securities possess fair short-term credit quality. This designation indicates that the intrinsic capacity for timely payment of financial commitments is adequate.

“B” – Securities possess speculative short-term credit quality. This designation indicates minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

“C” – Securities possess high short-term default risk. Default is a real possibility.

¹ A long-term rating can also be used to rate an issue with short maturity.

“RD” – Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

“D” – Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

Plus (+) or minus (-) – The “F1” rating may be modified by the addition of a plus (+) or minus (-) sign to show the relative status within that major rating category.

“NR” – Is assigned to an unrated issue of a rated issuer.

The **DBRS Morningstar® Ratings Limited (“DBRS Morningstar”)** short-term debt rating scale provides an opinion on the risk that an issuer will not meet its short-term financial obligations in a timely manner. Ratings are based on quantitative and qualitative considerations relevant to the issuer and the relative ranking of claims. The R-1 and R-2 rating categories are further denoted by the sub-categories “(high)”, “(middle)”, and “(low)”.

The following summarizes the ratings used by DBRS Morningstar for commercial paper and short-term debt:

“R-1 (high)” - Short-term debt rated “R-1 (high)” is of the highest credit quality. The capacity for the payment of short-term financial obligations as they fall due is exceptionally high. Unlikely to be adversely affected by future events.

“R-1 (middle)” – Short-term debt rated “R-1 (middle)” is of superior credit quality. The capacity for the payment of short-term financial obligations as they fall due is very high. Differs from “R-1 (high)” by a relatively modest degree. Unlikely to be significantly vulnerable to future events.

“R-1 (low)” – Short-term debt rated “R-1 (low)” is of good credit quality. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favorable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable.

“R-2 (high)” – Short-term debt rated “R-2 (high)” is considered to be at the upper end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events.

“R-2 (middle)” – Short-term debt rated “R-2 (middle)” is considered to be of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events or may be exposed to other factors that could reduce credit quality.

“R-2 (low)” – Short-term debt rated “R-2 (low)” is considered to be at the lower end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events. A number of challenges are present that could affect the issuer’s ability to meet such obligations.

“R-3” – Short-term debt rated “R-3” is considered to be at the lowest end of adequate credit quality. There is a capacity for the payment of short-term financial obligations as they fall due. May be vulnerable to future events and the certainty of meeting such obligations could be impacted by a variety of developments.

“R-4” – Short-term debt rated “R-4” is considered to be of speculative credit quality. The capacity for the payment of short-term financial obligations as they fall due is uncertain.

“R-5” – Short-term debt rated “R-5” is considered to be of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet short-term financial obligations as they fall due.

“D” – Short-term debt rated “D” is assigned when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to “D” may occur. DBRS Morningstar may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

Long-Term Credit Ratings

The following summarizes the ratings used by **S&P Global Ratings** for long-term issues:

“AAA” – An obligation rated “AAA” has the highest rating assigned by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is extremely strong.

“AA” – An obligation rated “AA” differs from the highest-rated obligations only to a small degree. The obligor’s capacity to meet its financial commitments on the obligation is very strong.

“A” – An obligation rated “A” is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor’s capacity to meet its financial commitments on the obligation is still strong.

“BBB” – An obligation rated “BBB” exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor’s capacity to meet its financial commitments on the obligation.

“BB,” “B,” “CCC,” “CC” and “C” – Obligations rated “BB,” “B,” “CCC,” “CC” and “C” are regarded as having significant speculative characteristics. “BB” indicates the least degree of speculation and “C” the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions.

“BB” – An obligation rated “BB” is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor’s inadequate capacity to meet its financial commitments on the obligation.

“B” – An obligation rated “B” is more vulnerable to nonpayment than obligations rated “BB”, but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor’s capacity or willingness to meet its financial commitments on the obligation.

“CCC” – An obligation rated “CCC” is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.

“CC” – An obligation rated “CC” is currently highly vulnerable to nonpayment. The “CC” rating is used when a default has not yet occurred but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

“C” – An obligation rated “C” is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.

“D” – An obligation rated “D” is in default or in breach of an imputed promise. For non-hybrid capital instruments, the “D” rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The “D” rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to “D” if it is subject to a distressed debt restructuring.

Plus (+) or minus (-) – The ratings from “AA” to “CCC” may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

“NR” – This indicates that a rating has not been assigned, or is no longer assigned.

Local Currency and Foreign Currency Ratings - S&P Global Ratings’ issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. A foreign currency rating on an issuer can differ from the local currency rating on it when the obligor has a different capacity to meet its obligations denominated in its local currency, versus obligations denominated in a foreign currency.

Moody’s long-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of one year or more. Such ratings reflect both on the likelihood of default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment. The following summarizes the ratings used by Moody’s for long-term debt:

“Aaa” – Obligations rated “Aaa” are judged to be of the highest quality, subject to the lowest level of credit risk.

“Aa” – Obligations rated “Aa” are judged to be of high quality and are subject to very low credit risk.

“A” – Obligations rated “A” are judged to be upper-medium grade and are subject to low credit risk.

“Baa” – Obligations rated “Baa” are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

“Ba” – Obligations rated “Ba” are judged to be speculative and are subject to substantial credit risk.

“B” – Obligations rated “B” are considered speculative and are subject to high credit risk.

“Caa” – Obligations rated “Caa” are judged to be speculative of poor standing and are subject to very high credit risk.

“Ca” – Obligations rated “Ca” are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

“C” – Obligations rated “C” are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody’s appends numerical modifiers 1, 2, and 3 to each generic rating classification from “Aa” through “Caa.” The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

“NR” – Is assigned to unrated obligations.

The following summarizes long-term ratings used by **Fitch**:

“AAA” – Securities considered to be of the highest credit quality. “AAA” ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

“AA” – Securities considered to be of very high credit quality. “AA” ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

“A” – Securities considered to be of high credit quality. “A” ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

“BBB” – Securities considered to be of good credit quality. “BBB” ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

“BB” – Securities considered to be speculative. “BB” ratings indicate that there is an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

“B” – Securities considered to be highly speculative. “B” ratings indicate that material credit risk is present

“CCC” – A “CCC” rating indicates that substantial credit risk is present.

“CC” – A “CC” rating indicates very high levels of credit risk.

“C” – A “C” rating indicates exceptionally high levels of credit risk.

Defaulted obligations typically are not assigned “RD” or “D” ratings but are instead rated in the “CCC” to “C” rating categories, depending on their recovery prospects and other relevant characteristics. Fitch believes that this approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Plus (+) or minus (-) may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the “AAA” obligation rating category, or to corporate finance obligation ratings in the categories below “CCC”.

“NR” – Is assigned to an unrated issue of a rated issuer.

The **DBRS** Morningstar long-term rating scale provides an opinion on the risk of default. That is, the risk that an issuer will fail to satisfy its financial obligations in accordance with the terms under which an obligation has been issued. Ratings are based on quantitative and qualitative considerations relevant to the issuer, and the relative ranking of claims. All rating categories other than AAA and D also contain subcategories “(high)” and “(low)”. The absence of either a “(high)” or “(low)” designation indicates the rating is in the middle of the category. The following summarizes the ratings used by DBRS Morningstar for long-term debt:

“AAA” – Long-term debt rated “AAA” is of the highest credit quality. The capacity for the payment of financial obligations is exceptionally high and unlikely to be adversely affected by future events.

“AA” – Long-term debt rated “AA” is of superior credit quality. The capacity for the payment of financial obligations is considered high. Credit quality differs from “AAA” only to a small degree. Unlikely to be significantly vulnerable to future events.

“A” – Long-term debt rated “A” is of good credit quality. The capacity for the payment of financial obligations is substantial, but of lesser credit quality than “AA.” May be vulnerable to future events, but qualifying negative factors are considered manageable.

“BBB” – Long-term debt rated “BBB” is of adequate credit quality. The capacity for the payment of financial obligations is considered acceptable. May be vulnerable to future events.

“BB” – Long-term debt rated “BB” is of speculative, non-investment grade credit quality. The capacity for the payment of financial obligations is uncertain. Vulnerable to future events.

“B” – Long-term debt rated “B” is of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet financial obligations.

“CCC”, “CC” and “C” – Long-term debt rated in any of these categories is of very highly speculative credit quality. In danger of defaulting on financial obligations. There is little difference between these three categories, although “CC” and “C” ratings are normally applied to obligations that are seen as highly likely to default, or subordinated to obligations rated in the “CCC” to “B” range. Obligations in respect of which default has not technically taken place but is considered inevitable may be rated in the “C” category.

“D” – A security rated “D” is assigned when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to “D” may occur. DBRS Morningstar may also use “SD” (Selective Default) in cases where only some securities are impacted, such as the case of a “distressed exchange”.

Municipal Note Ratings

An **S&P Global Ratings** U.S. municipal note rating reflects S&P Global Ratings’ opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P Global Ratings’ analysis will review the following considerations:

- Amortization schedule - the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment - the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Municipal Short-Term Note rating symbols are as follows:

“SP-1” – A municipal note rated “SP-1” exhibits a strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

“SP-2” – A municipal note rated “SP-2” exhibits a satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

“SP-3” – A municipal note rated “SP-3” exhibits a speculative capacity to pay principal and interest.

“D” – This rating is assigned upon failure to pay the note when due, completion of a distressed debt restructuring, or the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions.

Moody’s uses the global short-term Prime rating scale (listed above under Short-Term Credit Ratings) for commercial paper issued by U.S. municipalities and nonprofits. These commercial paper programs may be backed by external letters of credit or liquidity facilities, or by an issuer’s self-liquidity.

For other short-term municipal obligations, Moody’s uses one of two other short-term rating scales, the Municipal Investment Grade (“MIG”) and Variable Municipal Investment Grade (“VMIG”) scales provided below.

Moody’s uses the MIG scale for U.S. municipal cash flow notes, bond anticipation notes and certain other short-term obligations, which typically mature in three years or less. Under certain circumstances, Moody’s uses the MIG scale for bond anticipation notes with maturities of up to five years.

MIG Scale

“MIG-1” – This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

“MIG-2” – This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

“MIG-3” – This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

“SG” – This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

“NR” – Is assigned to an unrated obligation.

In the case of variable rate demand obligations (“VRDOs”), a two-component rating is assigned. The components are a long-term rating and a short-term demand obligation rating. The long-term rating addresses the issuer’s ability to meet scheduled principal and interests payments. The short-term demand obligation rating addresses the ability of the issuer or the liquidity provider to make payments associated with the purchase-price-upon demand feature (“demand feature”) of the VRDO. The short-term demand obligation rating uses the VMIG scale. VMIG ratings with liquidity support use as an input the short-term Counterparty Risk Assessment of the support provider, or the long-term rating of the underlying obligor in the absence of third party liquidity support. Transitions of VMIG ratings of demand obligations with conditional liquidity support differ from transitions on the Prime scale to reflect the risk that external liquidity support will terminate if the issuer’s long-term rating drops below investment grade.

Moody’s typically assigns the VMIG short-term demand obligation rating if the frequency of the demand feature is less than every three years. If the frequency of the demand feature is less than three years but the purchase price is payable only with remarketing proceeds, the short-term demand obligation rating is “NR”.

“VMIG-1” – This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“VMIG-2” – This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“VMIG-3” – This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

“SG” – This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have a sufficiently strong short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

“NR” – Is assigned to an unrated obligation.

About Credit Ratings

An **S&P Global Ratings** issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P Global Ratings’ view of the obligor’s capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Ratings assigned on **Moody’s** global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities.

Fitch’s credit ratings are forward-looking opinions on the relative ability of an entity or obligation to meet financial commitments. Issuer default ratings (IDRs) are assigned to corporations, sovereign entities, financial institutions such as banks, leasing companies and insurers, and public finance entities (local and regional governments). Issue level ratings are also assigned, often include an expectation of recovery and may be notched above or below the issuer level rating. Issue ratings are assigned to secured and unsecured debt securities, loans, preferred stock and other instruments. Credit ratings are indications of the likelihood of repayment in accordance with the terms of the issuance. In limited cases, Fitch may include additional considerations (i.e., rate to a higher or lower standard than that implied in the obligation’s documentation).

DBRS Morningstar offers independent, transparent, and innovative credit analysis to the market. Credit ratings are forward-looking opinions about credit risk that reflect the creditworthiness of an issuer, rated entity, security and/or obligation based on DBRS Morningstar’s quantitative and qualitative analysis in accordance with applicable methodologies and criteria. They are meant to provide opinions on relative measures of risk and are not based on expectations of, or meant to predict, any specific default probability. Credit ratings are not statements of fact. DBRS Morningstar issues credit ratings using one or more categories, such as public, private, provisional, final(ized), solicited, or unsolicited. From time to time, credit ratings may also be subject to trends, placed under review, or discontinued. DBRS Morningstar credit ratings are determined by credit rating committees.
